PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **scalable REST APIs** using **Java Spring Boot** and **Python FastAPI**, delivering **12+ microservices** for enterprise payment systems with **99.9% uptime SLA** and sub-100ms response times.
- Built **cloud-native containerized solutions** using **Docker** and **AWS** (EC2, S3, Lambda, CloudWatch), implementing **CI/CD pipelines** with **Jenkins** and **GitHub Actions** to reduce deployment time by **60%** and enable **20+ daily releases**.
- Architected and maintained **PyTest**-driven test suites with **TDD/BDD practices**, achieving **85% code coverage** across **Python** and **Java** codebases; automated integration and performance testing reduced regression defects by **40%**.
- Implemented **AI-driven automation workflows** integrating **Claude API** with **Python async programming** and **Pydantic** data validation, orchestrating end-to-end ETL pipelines that processed **10K+ job descriptions** and generated personalized content at scale.
- Collaborated across **Agile Scrum teams** using **Jira** and **Confluence**, participating in sprint planning, daily standups, code reviews, and pair programming; delivered **4+ major releases** annually while maintaining **zero critical security incidents**.
- Secured enterprise applications implementing **OAuth2/OpenID Connect** authentication, **container vulnerability scanning**, and **role-based access control**; conducted security code reviews and achieved **GDPR/Data Protection compliance** across production banking systems.

SKILLS

Backend & API Development – Python (FastAPI, Flask, OOP, Async programming, Pydantic, Typing), Java Spring Boot, REST API design, microservices architecture.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD pipelines, Jenkins, GitHub Actions, cloud-native principles, ArgoCD.

Data Engineering & Databases – SQL (PostgreSQL, MySQL, Oracle), Python data stack (pandas, NumPy, scikit-learn), ETL pipelines, data warehousing, schema design.

Testing & Quality Assurance – PyTest, unit testing, integration testing, performance testing, TDD/BDD, test automation, code coverage analysis.

Security & Compliance – OAuth2, OpenID Connect, AuthN/AuthZ, container vulnerability scanning, GDPR, Data Protection, audit trails, secure coding practices.

Agile & Collaboration – Scrum, Kanban, Jira, Confluence, code reviews, pair programming, cross-functional teamwork, sprint delivery.

AI & Automation – Claude API integration, prompt engineering, workflow orchestration, LLM-driven automation, structured JSON processing.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Payment Operations Platform (HCL Technologies)

- Designed and built **scalable REST APIs** in **Java Spring Boot** and **Python FastAPI** for real-time SWIFT messaging and ISO 20022 transaction flows, processing **50K+ daily payment messages** with **99.9% SLA compliance**.
- Deployed **containerized microservices** on **AWS** using **Docker** and implemented fully automated **CI/CD pipelines** with **Jenkins** and **GitHub Actions**, reducing deployment duration from **4 hours to 45 minutes**.
- Integrated **OAuth2/OpenID Connect** authentication and role-based access control across payment services; ensured **GDPR** compliance, regulatory audit-trail requirements, and **zero security incidents** in production banking environment.
- Developed comprehensive **PyTest**-driven test suites with **TDD practices**, achieving **88% code coverage** across payment processing logic; automated integration tests caught **95% of regressions** before UAT.
- Collaborated with product management, cloud architects, and cross-functional banking operations teams to gather requirements, execute UAT, and deliver post-implementation triage; supported **3 major go-live releases** in Agile Scrum sprints.

Ireland Jobs Tracker – AI-Powered Resume Automation Engine (Personal Project)

- Engineered end-to-end **AI workflow orchestration** pipeline integrating **Claude API** (Anthropic) with **Python async programming**, **Pydantic** data validation, and structured JSON prompt engineering; scaled to generate **1K+ job-description-tailored resumes** automatically.
- Built **FastAPI** backend with **async I/O** for high-throughput content generation; implemented **GitHub Actions** CI/CD pipelines and deployed to **Vercel**, achieving **sub-2-second** resume generation latency and **99.5% uptime**.
- Designed robust **prompt engineering** strategies with constraint guardrails and error-handling logic; integrated **Apify web scrapers** → Claude API → **reportlab PDF** generation, demonstrating hands-on **LLM integration**, API orchestration, and DevOps automation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
