PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **cloud, mobile, and IoT software features** using **Python, JavaScript, and React**, collaborating with product managers and architects to translate requirements into maintainable, well-documented code that met technical and business objectives; delivered **8+ feature releases** in Agile sprints with **zero critical production defects**.
- Implemented **front-end and back-end development** across internet-connected IoT lighting systems using **React** for UI components and **Python Flask/FastAPI** for REST API microservices; integrated **SQL (PostgreSQL, MySQL)** data layers and achieved **40% reduction in API response latency** through optimization.
- Participated in full **Agile and Scrum ceremonies** including sprint planning, daily stand-ups, code reviews, and retrospectives; contributed to peer code review practices, learning and applying best practices from senior engineers that improved team velocity by **20%**.
- Supported **automated testing efforts** and test-driven development practices using **Git version control** and **Jenkins CI/CD pipelines**; wrote unit and integration tests achieving **85% code coverage** and identified and fixed **30+ performance issues** during QA cycles.
- Debugged and resolved software defects across cloud, mobile, and web applications using **Git branching, debugging techniques, and development tools**; reduced mean-time-to-resolution (MTTR) by **35%** through systematic root-cause analysis and patch validation.
- Demonstrated strong problem-solving and communication skills by documenting technical decisions, authoring onboarding guides for **5 junior team members**, and presenting architecture trade-offs to cross-functional stakeholders; maintained **IELTS Academic Band 7/9** fluency in written and verbal English.

SKILLS

Programming Languages & Frameworks – Python, JavaScript, React, HTML, C#, Java Spring Boot, Flask, FastAPI.

Front-End & Web Development – React, JavaScript, HTML, CSS, responsive UI design, component-based architecture.

Back-End & Cloud Development – REST APIs, microservices, Python web frameworks, AWS (EC2, S3, Lambda, CloudWatch), Docker containerization.

Data & Databases – SQL, PostgreSQL, MySQL, Oracle, data modelling, schema design, query optimization.

DevOps & Development Tools – Git version control, Jenkins CI/CD pipelines, Jira, Confluence, Linux, shell scripting, debugging techniques, automated testing.

Agile & Software Engineering – Agile methodologies, Scrum ceremonies, peer code review, test-driven development, software engineering best practices, clean code principles.

Data Science & Analytics – pandas, NumPy, scikit-learn, Power BI, Tableau, statistical analysis, machine learning fundamentals.

EDUCATION AND TRAINING

PROJECTS

IoT Lighting & Payments Operations Dashboard (HCL Technologies)

- Designed and developed **cloud-based IoT dashboard** connecting **internet-connected lighting systems** and payments transaction flows using **Python backend services, React front-end components, and PostgreSQL data layer**; integrated **REST APIs** for real-time sensor data and transaction visibility.
- Implemented **automated testing framework** with **unit and integration tests** achieving **80% code coverage**; deployed via **Jenkins CI/CD pipelines** and **Docker containerization**, reducing deployment cycle time by **45%**.
- Collaborated with product managers and QA engineers in **Agile sprint ceremonies** to implement customer-focused features; performed **peer code reviews** applying SOLID principles and documenting **REST API contracts** for mobile and web clients.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)

- Built end-to-end **cloud-based IoT and AI workflow orchestration** system integrating **Claude API (Anthropic), Python backend, and React front-end**; scraped job descriptions using **Apify**, processed via **Python data pipelines**, generated tailored resumes using **structured-JSON prompt engineering**, and deployed via **GitHub Actions CI/CD to Vercel**.
- Developed **REST API microservices** in **Python FastAPI** handling JD ingestion, LLM orchestration, and PDF generation with reportlab; implemented **constraint guardrails and error handling** achieving **99% generation success rate** across **500+ job descriptions**.
- Designed **React front-end components** for interactive resume preview and customization; applied **Git branching workflows, automated testing, and debugging techniques** to maintain code quality and demonstrated **problem-solving skills** in integrating third-party APIs and cloud deployment.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
