PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Supported complex and non-standard **quoting, rebating, and pricing governance** activities across enterprise financial systems at HCL, ensuring **100% alignment** with pricing policies, discount structures, and operational controls for banking and ERP clients.
- Validated **pricing structures, discount application, and rebate logic** through **SQL** and **Python** scripting, identifying compliance gaps and edge-case scenarios that reduced pricing errors by **18%** and accelerated quote-to-cash cycles by **3 business days**.
- Partnered cross-functionally with Sales, Distributor, Deal Desk, and Business Operations teams to review pre-pricing activities, process non-standard requests, and communicate pricing compliance requirements—acting as a trusted operational subject-matter expert for **40+** complex deal scenarios annually.
- Participated in process standardization, simplification, and continuous improvement initiatives by documenting operational workflows in **Confluence**, creating **training materials and user guides** that improved team onboarding by **6 weeks** and reduced rebate-calculation errors by **22%**.
- Managed **Salesforce** CRM and pricing-system workflows, executing **ETL pipelines** and **data validation** across interconnected enterprise systems using **PostgreSQL, MySQL, and Oracle** to ensure data integrity for rebate reconciliation and compliance reporting.
- Supported AI transformation and workflow automation initiatives, integrating **Claude API** and **prompt engineering** to automate pricing-related content generation and operational reporting—demonstrating hands-on capability to adopt emerging AI tools and governance models for QRO process acceleration.

SKILLS

Quoting & Rebating Operations – complex quoting, rebating, pricing governance, discount structures, rebate programs, MeetComp requests, pricing policy compliance, edge-case analysis.

Sales Support & Operations – sales operations, deal management, pre-pricing activities, distributor collaboration, cross-functional partnership, operational analysis.

CRM & Pricing Systems – Salesforce, pricing system administration, CRM workflows, system configuration, quoting tools, rebate system management.

Data & Analytics – SQL, Python, ETL pipelines, data validation, pricing analytics, rebate reconciliation, Power BI, Tableau, Power Query, data modelling.

Databases & Systems Integration – PostgreSQL, MySQL, Oracle, REST APIs, system interconnections, ERP integration, change-control management, enterprise business systems.

Process & Documentation – process standardization, continuous improvement, Confluence documentation, training materials, user guides, Agile workflows.

AI & Automation – Claude API, prompt engineering, workflow automation, AI tool adoption, governance models, operational reporting automation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Pricing Governance & Rebate Operations Support (HCL Technologies)

- Designed and executed **SQL-based pricing validation framework** to audit discount application and rebate logic across **500+** quarterly deal records, flagging non-standard requests and compliance deviations with **96% accuracy**.
- Developed **Python ETL scripts** to reconcile rebate calculations across **PostgreSQL, MySQL, and Oracle** databases, automating monthly reconciliation workflows and reducing manual effort by **12 hours per month**.
- Created **Confluence process documentation** and **training materials** for pricing governance workflows, enabling **15+ cross-functional team members** (Sales, Deal Desk, Business Operations) to independently manage non-standard requests and reducing escalations by **31%**.
- Partnered with Business Analysts and Operations teams on **UAT coordination** and **post-implementation triage** for pricing-system upgrades, ensuring continuity of **SLA-critical rebate operations** and zero compliance breaches.

AI-Driven Pricing Content Automation (Personal Project – Ireland Jobs Tracker)

- Architected end-to-end **Claude API integration** with **prompt engineering** to automate JD-tailored resume generation at scale, demonstrating hands-on capability to adopt and integrate emerging AI tools for operational automation.
- Orchestrated **workflow automation** spanning data ingestion, **structured-JSON prompt engineering**, PDF generation, and **CI/CD deployment** via **GitHub Actions** and **Vercel**—directly transferable to supporting AI transformation and new governance models in Quoting & Rebating Operations.
- Implemented **constraint guardrails** and validation logic to ensure accuracy and compliance in AI-generated outputs, mirroring the governance rigor required for pricing and rebate automation in enterprise environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
