PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed **smoke testing and regression testing** across enterprise Java/.NET applications in production environments, validating **new releases and feature updates** with **SLA-critical accuracy** for banking and financial-services clients; documented **25+ test cycles** per release cycle using **structured bug reporting** standards.
- Identified, documented, and reported bugs with clarity and precision using **Jira** and **Asana** for issue tracking and progress monitoring; participated in **bug triage processes** with developers and product teams, reducing defect resolution time by **40%** through collaborative cross-functional support.
- Performed **manual test case execution** across **multiple browsers and mobile devices**, validating functionality for web and mobile applications; used **browser developer tools** to inspect elements, monitor HTTP requests, and support technical troubleshooting across **REST API integrations**.
- Managed test cases and tracked testing progress using **test management tools** including **Jira** for centralized defect and test-case documentation; contributed to **improving QA processes and documentation standards** by authoring **structured test case templates** and **QA runbooks** for cross-functional teams.
- Validated **functionality across different browsers and mobile devices** using **browser developer tools** and responsive-design testing methods; ensured **web and mobile application** quality through device-specific test scenarios and performance monitoring on **AWS CloudWatch**.
- Collaborated closely with **product managers, developers, and designers** across cross-functional teams to ensure smooth, high-performing user experiences; communicated **clear and accurate bug reports** with attention to detail, supporting **UAT coordination** and post-go-live quality assurance for enterprise systems.

SKILLS

QA Testing & Validation – smoke testing, regression testing, manual test case execution, structured bug reporting, test case documentation.

Test Management & Project Tools – Jira, Asana, test management workflows, defect tracking, bug triage processes.

Browser & Mobile Testing – cross-browser validation, mobile device testing, browser developer tools, HTTP request monitoring, responsive design testing.

Quality Assurance Processes – QA documentation standards, test case design, UAT coordination, quality metrics, SLA management.

Technical Skills – REST APIs, JSON structures, HTML, AWS CloudWatch, production environments, enterprise application support.

Collaboration & Communication – cross-functional teamwork, clear written communication, attention to detail, stakeholder reporting.

Domain Knowledge – financial-services applications, payment systems, enterprise business systems, regulatory compliance environments.

EDUCATION AND TRAINING

PROJECTS

Enterprise Banking Dashboard QA & Validation (HCL Technologies)

- Performed comprehensive **smoke testing and regression testing** on a **SWIFT messaging** and **payments-operations dashboard** supporting banking-client production; validated **transaction-flow visibility, operational alerting, and payment message processing** across **multiple browsers and mobile devices**.
- Identified and documented **50+ defects** using **structured bug reporting** in **Jira**, categorizing severity and supporting **bug triage discussions** with developers and operations teams; ensured **SLA compliance** for payment-critical features and regulatory **audit trail** requirements.
- Validated **functionality across different browsers and mobile devices** for cross-border payments, SEPA transactions, and **ISO 20022 message flows**; used **browser developer tools** to monitor **HTTP requests** and troubleshoot integration issues with **REST APIs** connecting payment-processing systems.

ERP & Enterprise Business Systems Quality Assurance (HCL Technologies)

- Executed **manual test cases** across **enterprise business systems** and **ERP modules** to validate system integrations and cross-system data flows; tested **web and mobile applications** supporting financial and operational business processes.
- Participated in **UAT coordination** and **change-control management** for system configuration updates, documenting test results and supporting **post-go-live quality assurance**; collaborated with **product managers, developers, and designers** to ensure smooth user experiences across interconnected systems.
- Contributed to **improving QA processes and documentation standards** by creating **test case templates** and quality-assurance guides for enterprise system validations; communicated **clear and accurate bug reports** with attention to detail across **multiple browsers and mobile devices**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
