PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Directed **24x7 on-call incident response** and **root-cause analysis** for mission-critical enterprise applications across **AWS EC2, S3, Lambda** and **CloudWatch**, achieving **99.9% SLA compliance** through proactive **anomaly detection** and rapid **change management** processes.
- Designed and deployed **operational health monitoring dashboards** using **Splunk** and **Dynatrace** to track **availability, reliability, latency, and performance** metrics across distributed services; authored **actionable bug reports** and operational runbooks that reduced mean-time-to-resolution (MTTR) by **35%**.
- Orchestrated **CI/CD pipelines** and **infrastructure-as-code automation** using **Jenkins, Git, Docker containerization**, and **AWS infrastructure**; developed **Python automation scripts** for **change management documentation** review, **operational backlog** triage, and **system configuration updates** across interconnected cloud services.
- Built and maintained **REST API integrations** between enterprise systems using **Java Spring Boot** and **SQL** (PostgreSQL, MySQL, Oracle); collaborated with **cross-functional teams** on **UAT coordination**, **post-implementation triage**, and **service team education** on operational practices and system behavior.
- Engineered **data pipeline automation** and **ETL workflows** using **Python, SQL, and AWS Lambda** to ingest, validate, and report on operational metrics; delivered **Power BI dashboards** and **operational reporting** for real-time visibility into service health, incident trends, and system performance across high-availability environments.
- Demonstrated technical leadership in a **high-availability, regulated environment** by documenting **operational procedures, training materials, and system runbooks**; mentored peer engineers on incident-response methodologies, **reliability engineering principles**, and best practices for building **scalable services** aligned with **AWS customer satisfaction** standards.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, Jenkins CI/CD, Git version control, infrastructure automation.

Operations & Reliability Engineering – 24x7 on-call incident management, root-cause analysis, SLA management, anomaly detection, change management, operational health monitoring, availability optimization.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch dashboards, operational alerting, performance tracking, latency analysis, real-time metrics.

Backend Development & APIs – Java Spring Boot, Python scripting, REST API development, system integrations, microservices architecture.

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), Python data engineering, ETL pipelines, Power BI dashboards, operational reporting, data modelling.

Linux & Scripting – Linux system administration, shell scripting, cron job scheduling, log analysis, automation.

Process & Documentation – Agile/Scrum, Jira ticketing, change-control workflows, runbook development, cross-functional collaboration, UAT coordination.

EDUCATION AND TRAINING

PROJECTS

European Sovereign Cloud (ESC) Operations Infrastructure (HCL Technologies)

- Architected **end-to-end operational monitoring and automation framework** for high-availability AWS services (EC2, S3, Lambda, Dynamo) deployed in EU-regulated environments; integrated **Splunk dashboards, CloudWatch alerting, and anomaly-detection workflows** to track **availability, reliability, latency, and performance** KPIs.
- Developed **Python-based automation scripts** for **operational backlog management, change-control validation, and incident-response orchestration**; engineered **CI/CD pipeline enhancements** using **Jenkins and Git** to streamline service-team deployments and reduce **change-related incidents** by 28%.
- Collaborated with **global AWS teams and technology leaders** to establish **operational procedures, runbooks, and training materials** for ESC service-team onboarding; led **UAT coordination and post-implementation triage** to ensure seamless service launch and **customer satisfaction** across EU sovereign-cloud regions.

Enterprise Financial Payments Operations & Reliability Dashboard (HCL Technologies)

- Designed and deployed **operational dashboards** for mission-critical **SWIFT messaging (MT/MX formats) and ISO 20022 payment-processing systems**; integrated **Dynatrace monitoring, Splunk log aggregation, and CloudWatch metrics** to provide **real-time transaction-flow visibility and operational alerting** for payment operations teams.
- Engineered **Python ETL pipelines and SQL queries** (PostgreSQL, Oracle) to validate payment-message reconciliation, detect anomalies, and generate **operational reporting dashboards** using **Power BI**; reduced **incident detection time** by 40% through proactive **SLA monitoring and reliability optimization**.
- Implemented **change-management workflows and UAT coordination procedures** across interconnected **ERP and payments-operations systems**; collaborated with banking-domain stakeholders, business analysts, and compliance teams to ensure **regulatory compliance (GDPR, PSD2, SEPA standards)** and **audit-trail integrity** throughout system updates and enhancements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
