PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Swift** and **SwiftUI** applications for enterprise device management systems, delivering **3+ production features** across macOS, iOS, and iPadOS platforms with **zero critical defects** in UAT cycles.
- Designed and integrated **REST APIs** for Device Management and Asset Management services, enabling cross-platform device inventory synchronization and reducing manual asset reconciliation time by **40%**.
- Implemented **object-oriented design** patterns and **fundamental programming concepts** in Swift application architecture, applying **code review best practices** and mentorship from senior engineers to ship enterprise-grade MDM client software.
- Leveraged **generative AI tools** (Claude API) and **AI workflow automation** to accelerate software engineering processes, including automated code generation and intelligent testing frameworks that improved development velocity by **35%**.
- Resolved critical software issues on Apple platforms through systematic **troubleshooting**, root-cause analysis, and **problem-solving** methodologies, maintaining **99.2% SLA compliance** across device management deployments serving **10,000+ devices globally**.
- Collaborated cross-functionally with product teams, business stakeholders, and operations to translate business requirements into technical specifications, delivering Asset Management and Software Distribution features aligned with Apple's global scale and security posture.

SKILLS

Swift & Apple Platforms – Swift, SwiftUI, macOS, iOS, iPadOS, tvOS, visionOS, object-oriented design, application development.

Device & Asset Management – Device Management (MDM), Asset Management (ITAM), Software Distribution, device inventory, configuration management, system integrations.

API & System Integration – REST APIs, API design, microservices integration, cross-platform connectivity, data synchronization.

AI & Emerging Technologies – Generative AI tools, Claude API, prompt engineering, AI workflow automation, GenAI application in software engineering.

Software Engineering Practices – Code review, version control (Git), CI/CD pipelines, troubleshooting, debugging, problem-solving, attention to detail.

Additional Languages & Tools – Python, Java, SQL, PostgreSQL, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins.

Professional Development – Structured mentorship, collaborative team environments, Agile/Scrum methodologies, cross-functional collaboration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Device Management & Asset Tracking Dashboard (HCL Technologies)

- Built and maintained a **SwiftUI-based device management application** for Apple's internal infrastructure, providing real-time visibility into **10,000+ managed devices** across macOS, iOS, and iPadOS platforms.
- Integrated **REST APIs** with Apple's Device Management and Asset Management services, enabling automated device enrollment, asset reconciliation, and software distribution workflows at enterprise scale.
- Applied **object-oriented design** and **problem-solving** techniques to optimize device inventory synchronization, reducing asset discrepancies by **45%** and improving operational reliability for business units worldwide.
- Collaborated with senior engineers through structured **code reviews** and **mentorship** to implement best practices in Swift application architecture, error handling, and user-centric design for enterprise users.

AI-Powered Software Engineering Automation & Workflow Orchestration (Personal Project)

- Engineered an **end-to-end generative AI workflow** leveraging **Claude API (Anthropic)** and **prompt engineering** to automate intelligent software engineering tasks, including **AI-tailored resume generation** and structured JSON-based content orchestration.
- Designed and implemented **AI workflow automation** pipeline: data ingestion → Claude-powered intelligent processing → automated output generation, demonstrating hands-on expertise in **generative AI tools** and their real-world application in engineering efficiency.
- Deployed production automation infrastructure using **GitHub Actions CI/CD** and **Vercel cloud deployment**, showcasing practical experience with modern DevOps practices and emerging AI capabilities in software development workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
