PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and developed **microservices and RESTful APIs** in **Java Spring Boot** for enterprise payment-operations systems, implementing **cloud-native** patterns on **AWS (EC2, Lambda, S3)** and reducing API latency by **35%** through optimized database queries and caching strategies.
- Designed and deployed **containerized applications using Docker** with **Kubernetes** orchestration for highly integrated distributed systems, automating infrastructure provisioning with **Terraform** and achieving **99.95% uptime** across multi-region production deployments.
- Built end-to-end full-stack web applications leveraging **Java, Node.js, JavaScript, Vue.js** and **SQL/NoSQL databases (PostgreSQL, MySQL, Oracle)** for cross-functional teams, delivering complex features under tight deadlines while maintaining **100% test coverage** via **JUnit** and automated testing frameworks.
- Implemented comprehensive **continuous integration and continuous deployment (CI/CD)** pipelines using **Jenkins**, orchestrating code reviews, automated testing, and multi-stage releases that reduced deployment time by **60%** and incident response time from **4 hours to 45 minutes**.
- Established **observability and monitoring infrastructure** using **Dynatrace** and **CloudWatch**, instrumenting distributed systems for real-time visibility into application health, resource utilization, and transaction flows; implemented **SLA-driven alerting** that reduced mean-time-to-resolution (MTTR) by **50%**.
- Collaborated with cross-functional teams including **DevOps, Quality Engineering, Design, and Product** on distributed, global projects; documented system architecture, API specifications, and operational runbooks; mentored junior engineers through code reviews and pair programming sessions, improving team velocity by **25%**.

SKILLS

Backend & Full Stack – Java, Spring Boot, Node.js, REST APIs, GraphQL, microservices architecture, API design patterns.

Frontend & Web Technologies – JavaScript, Vue.js, React, Angular, HTML5, CSS3, responsive design.

Databases & Data Systems – PostgreSQL, MySQL, Oracle, SQL, NoSQL, data modelling, schema design, query optimization.

Cloud Platforms & Infrastructure – AWS (EC2, Lambda, S3, CloudWatch), Azure, GCP, cloud services, serverless computing.

DevOps, Containerization & IaC – Docker, Kubernetes, Terraform, Pulumi, infrastructure-as-code, container orchestration.

CI/CD & Testing – Jenkins, Git, continuous integration, continuous deployment, JUnit, automated testing frameworks, code review workflows.

Observability & Monitoring – Dynatrace, CloudWatch, Splunk, application performance monitoring, distributed tracing, alerting, SLA management, incident response.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Distributed Microservices Platform for Media Operations (HCL Technologies)

- Architected a **full-stack microservices ecosystem** serving Apple TV Studio & Production operations, built with **Java Spring Boot** backend services and **Vue.js** frontend consuming **GraphQL and RESTful APIs**, deployed on **AWS Lambda and EC2** with **Kubernetes** for service orchestration.
- Designed and implemented **PostgreSQL and NoSQL database schemas** supporting 50+ concurrent operations, optimized queries reducing median response time from **2.1s to 340ms**, and maintained referential integrity across distributed data layers handling **2M+ transactions daily**.
- Established **Terraform-driven infrastructure-as-code** for automated provisioning of multi-environment deployments (dev, staging, production), reducing environment setup time from **3 days to 2 hours** and enabling rapid scaling during peak production windows.
- Implemented end-to-end **CI/CD pipelines using Jenkins** with automated **JUnit test suites, code quality gates, and containerized builds** via **Docker**, reducing lead time for changes from **1 week to 2 days** and catching **94%** of defects before production.
- Deployed comprehensive **Dynatrace monitoring and observability** across all microservices, capturing distributed traces for **100M+ monthly requests**, establishing real-time dashboards for service health and business metrics that enabled data-driven performance optimization and **30%** reduction in production incidents.

Global Payments Dashboard & ISO 20022 Integration (HCL Technologies)

- Developed a real-time **payments operations dashboard** in **Node.js** with **Vue.js** frontend, integrating **SWIFT messaging (MT/MX formats)**, **ISO 20022 message flows**, and **SEPA/cross-border payment** data streams to provide transaction-flow visibility for banking operations teams across **15+ countries**.
- Built **REST APIs and microservices** for message transformation and validation, consuming **PostgreSQL and Oracle databases**, achieving **sub-100ms latency** on payment-status queries supporting **SLA commitments** and regulatory compliance requirements including **audit trails and GDPR data handling**.
- Implemented **Kubernetes** deployments with **CloudWatch monitoring and Dynatrace instrumentation**, ensuring **99.99% availability** for mission-critical payment systems and enabling rapid incident response for **P1/P2 payment disruptions** affecting **\$500M+ in daily transaction volume**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
