PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built **distributed data systems** on **AWS (EC2, S3, Lambda)** and **cloud databases** supporting enterprise-scale analytics and business-critical insights; engineered **high-throughput data pipelines** using **Python** and **SQL (PostgreSQL, Oracle, MySQL)** for ETL and scheduled reporting, reducing data latency by **40%** and enabling real-time insights for 50+ internal analytics stakeholders.
- Developed scalable **RESTful APIs** using **Java Spring Boot** integrated with **relational databases** and implemented **test-driven development** practices across CI/CD pipelines (**Jenkins, Git**); delivered 7+ **production microservices** handling **10M+ daily transactions** with **99.8% uptime SLA** through rigorous code review and change-control management.
- Built **BI dashboards** and **data visualization** solutions using **Power BI** and **Tableau** incorporating **DAX measures** and **data modelling** to surface analytics workflows and data needs for key business partners; reduced reporting turnaround time by **60%** and enabled **self-service analytics** for 30+ cross-functional stakeholders.
- Applied **Generative AI and intelligent automation** concepts to optimize data processing workflows; architected solutions leveraging **LLMs and prompt engineering** to enhance data accessibility and deliver performant, reliable, and scalable AI-augmented analytics systems for internal customers with **25%** faster query resolution.
- Managed production support and incident response for enterprise data systems using **Splunk, CloudWatch, Dynatrace** for real-time monitoring and reliability; implemented **software engineering best practices** including automated alerting and post-mortem processes, achieving **45-minute MTTR** on P1 incidents and **98% SLA compliance**.
- Partnered with internal customers across banking, ERP, and enterprise business systems to gather analytical requirements and design data platform enhancements; coordinated UAT, change-control, and post-implementation support across interconnected systems using **REST APIs** and **data warehousing** architectures, streamlining ecosystem adoption by **35%**.

SKILLS

Languages & Frameworks – Python, Java, Spring Boot, Flask, FastAPI, Scala.

Data Platforms & Databases – Snowflake, BigQuery, PostgreSQL, MySQL, Oracle, distributed systems, cloud databases, data warehousing.

Data Engineering & Analytics – ETL pipelines, data modelling, Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn, data visualization.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, CI/CD.

AI & Analytics – Generative AI, LLMs, prompt engineering, machine learning, statistical analysis, A/B testing, hypothesis testing, R/RStudio.

Software Engineering & Reliability – RESTful API development, test-driven development, code review, monitoring (Splunk, Dynatrace), incident management, change-control, BI concepts.

Collaboration & Tools – Jira, Confluence, Agile/Scrum, cross-functional requirements gathering, UAT coordination.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Intelligent Data Lakehouse Platform with Generative AI Analytics (HCL Technologies)

- Architected and shipped a **distributed data lakehouse** on **AWS (S3, Lambda, CloudWatch)** ingesting **2TB+ daily** from heterogeneous enterprise sources (ERP, payments systems, operational platforms) into a unified **cloud database** layer with **sub-100ms query latency** for **analytics and BI dashboards**.
- Engineered **high-performance ETL pipelines** using **Python, SQL**, and **Apache Spark** concepts to orchestrate data transformations and **data modelling** across **PostgreSQL, Oracle, MySQL** backend stores; reduced ingestion time by **55%** and improved data quality metrics to **99.2% accuracy**.
- Embedded **Generative AI and intelligent automation** into the platform using **LLMs and prompt engineering** to enable natural-language query generation and **automated insights summarization**; powered **self-service analytics** for 60+ business users and reduced analyst manual query time by **50%**.
- Designed **BI dashboards** in **Power BI** and **Tableau** with interactive **data visualization** and **DAX measures** to surface analytics workflows and key business metrics; delivered **12+ published reports** supporting strategic decision-making for finance, operations, and payments teams.
- Implemented **test-driven development** and comprehensive monitoring via **CloudWatch and Splunk** to ensure platform reliability and **99.7% availability** across distributed components; conducted UAT and change-control coordination with internal customers, achieving seamless adoption and **zero critical incidents** in production.

Real-Time Payments Analytics & Compliance Dashboard (HCL Technologies)

- Built scalable **RESTful APIs** in **Java Spring Boot** integrated with **relational databases (Oracle, PostgreSQL)** to surface **SWIFT messaging flows, ISO 20022 message structures**, and **SEPA payment transactions** at real-time throughput of **50K events/second** for banking operations and regulatory reporting.
- Developed **BI dashboard** in **Power BI** consolidating **payment analytics**, transaction-flow visibility, and operational KPIs with **data modelling** and **DAX measures**; enabled compliance teams to track **100% of cross-border transactions** with **GDPR audit trails** and regulatory reconciliation workflows at **sub-second latency**.
- Engineered **high-throughput data pipelines** using **Python** and **SQL** for ETL of payment records across interconnected enterprise systems; delivered **automated reconciliation logic** reducing manual effort by **70%** and improving month-end close timelines from **5 days to 1 day**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
