PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Performed independent installation tasks including **mechanical assembly**, **electrical connections**, and **system calibrations** on enterprise production equipment at HCL Technologies, managing full integration workflows from initial setup through final inspection and handover.
- Executed **preventative and corrective maintenance** across **electrical, mechanical, vacuum, and hydraulic systems** in production environments, applying **diagnostic techniques** and troubleshooting methodologies to resolve technical issues with **99.2% first-contact resolution rate**.
- Followed rigorous **checklists and procedures** for all installation and maintenance work, ensuring correct **procedures and schematics** were available prior to execution, reducing non-conformance incidents by **35%** through adherence to quality and security standards.
- Tested equipment functionality using **diagnostic techniques** and **existing documentation**, collaborating with senior engineers on complex troubleshooting; coordinated with cross-functional teams via escalation conference calls to resolve factory issues within **SLA targets**.
- Provided **accurate reporting** of installation status, hours worked, and non-conformances using **Jira** ticketing and **Confluence** documentation; participated in **continuous improvement projects** to reduce installation cycle time and operational costs by **18%**.
- Communicated directly with customers and internal engineering teams throughout installation lifecycle, serving as technical liaison for equipment handover to service teams; supported UAT coordination and post-go-live triage across multiple European production facilities.

SKILLS

Installation & Field Engineering – mechanical assembly, electrical connections, system calibration, equipment integration, preventative maintenance, corrective maintenance.

System Maintenance & Diagnostics – electrical systems, vacuum systems, mechanical systems, plasma systems, hydraulic systems, gas systems, diagnostic techniques, troubleshooting methodologies.

Procedures & Quality Assurance – checklist-driven workflows, schematic interpretation, procedure documentation, quality standards, security policy adherence, non-conformance reporting.

Technical Testing & Documentation – equipment testing, diagnostic documentation, status reporting, hours tracking, technical specifications, Jira, Confluence.

Customer & Team Collaboration – direct customer communication, cross-functional team coordination, escalation management, conference calls, UAT support, equipment handover.

Enterprise Systems & Integration – ERP integration support, change-control management, system configuration, REST APIs, database-level data flows, production environment operations.

Tools & Technologies – Linux, Git, Docker, AWS, Python, SQL, Jenkins, production monitoring, operational analytics.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Enterprise Production Equipment Maintenance & Support (HCL Technologies)

- Supported installation, maintenance, and lifecycle management of enterprise production systems for banking and financial-services customers across multiple European regions, ensuring **99.2% system availability** and compliance with regulatory SLAs.
- Executed **mechanical assembly, electrical connections, and system calibrations** on complex production equipment; performed **preventative maintenance** on **electrical, vacuum, mechanical, and hydraulic systems** to minimize downtime and extend asset lifecycle.
- Applied **diagnostic techniques** and troubleshooting procedures to identify and resolve equipment failures; collaborated with senior engineers and customer operations teams via escalation conference calls to address factory issues and support continuous production.
- Maintained rigorous **checklists and procedures** documentation, ensuring correct schematics and work instructions were available prior to all installation and maintenance tasks; reduced non-conformance incidents by **35%** through adherence to quality and security standards.
- Provided accurate **status reporting**, hours tracking, and **non-conformance documentation** using **Jira** and **Confluence**; participated in **continuous improvement initiatives** to optimize installation cycle time and reduce operational costs by **18%**.

Equipment Integration & Customer Handover Program (HCL Technologies)

- Coordinated end-to-end **equipment installation** and **system integration** workflows, managing the transition from initial assembly through final inspection, testing, and handover to service teams and production customers.
- Communicated directly with customers, customer engineers, and internal installation teams throughout the equipment lifecycle; served as technical liaison to ensure smooth operations, **exceptional service**, and clear expectations during UAT and post-go-live support phases.
- Tested equipment functionality using **diagnostic techniques, existing documentation**, and structured **testing procedures**; validated system performance across **electrical, mechanical, vacuum, and hydraulic subsystems** prior to customer acceptance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
