PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and assessed business information accuracy for enterprise client platforms by applying **market-specific knowledge** and **judgment** to validate data quality against client policies; collaborated with cross-functional business teams via **outbound phone calls** to verify business details, achieving **98% data accuracy** and reducing client disputes by **32%**.
- Engaged in customer service-driven interactions across multinational teams, demonstrating **excellent written and oral communication skills** with **attention to detail** when updating client platforms; managed **deadline-driven workflows** and **prioritization** of verification requests across **8+ global markets**, maintaining **SLA compliance at 96%**.
- Applied **judgment on the job** to make well-balanced decisions on ambiguous business information scenarios, leveraging **market-specific knowledge** of regional regulations and client policies; documented decision rationale in **Confluence** and trained team members on edge cases, reducing escalations by **28%**.
- Managed time efficiently and worked without close supervision while under pressure, handling **120+ verification tasks per week** in a **fast-paced, deadline-driven atmosphere**; demonstrated multitasking capability by balancing **outbound phone calls**, platform updates, and **data validation workflows** simultaneously.
- Supported production systems for banking and payments operations using **monitoring tools** and **incident response procedures**, developing strong customer service fundamentals through **cross-functional collaboration** with business stakeholders, operations teams, and compliance officers on time-sensitive regulatory and SLA-critical issues.
- Developed proficiency in **attention to detail** and **business information validation** through SQL-driven data audits and **data quality analysis** at HCL; translated technical findings into clear business recommendations for non-technical stakeholders, demonstrating ability to communicate complex information with clarity and precision.

SKILLS

Customer Service & Communication – outbound phone calls, customer interaction, written communication, oral communication, attention to detail, stakeholder engagement.

Business Analysis & Judgment – market-specific knowledge, business information verification, data accuracy assessment, decision-making under ambiguity, client policy application.

Time Management & Workflow – prioritization, deadline-driven task management, multitasking, work without close supervision, time management under pressure.

Data & Platform Management – data validation, platform updates, business information accuracy, SQL, PostgreSQL, MySQL, Oracle.

Languages – English (C1), IELTS Academic Band 7/9.

Enterprise Systems & Tools – Confluence, Jira, Git, power BI, change management, cross-system integrations, production support monitoring.

Domain Knowledge – banking and payments operations, regulatory compliance, GDPR, SLA management, international business processes.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Global Maps Data Verification & Client Platform Sync Platform (HCL Technologies)

- Designed and led end-to-end **business information verification workflow** using **outbound phone call protocols** and **judgment-based decision trees** to assess data accuracy against client policies; integrated verification results with client platforms via **REST APIs** and **SQL-driven batch updates**, processing **500+ records daily** across **12 markets**.
- Built **data quality dashboard** using **Power BI** to track **verification accuracy metrics**, **SLA compliance**, and **market-specific anomalies**; created **DAX measures** for real-time business information validation rates and call-attempt success tracking, enabling management to identify regional bottlenecks and improve targeting by **35%**.
- Developed **market-specific knowledge base** in **Confluence** documenting client policies, regulatory requirements, and edge-case decision logic across **6 geographic regions**; trained **8 team members** on business information judgment calls and communication best practices, reducing **escalations by 28%** and **average call handling time by 18%**.
- Managed **prioritization and multitasking** in a **deadline-driven atmosphere** by optimizing phone-call scheduling, platform-update batching, and quality-assurance audits; implemented **time-management processes** that allowed the team to work **without close supervision** while maintaining **96% SLA compliance** and **98% data accuracy** across **2,000+ monthly verifications**.

Banking Payments Operations Monitoring & SWIFT Message Verification System (HCL Technologies)

- Supported production **SWIFT messaging dashboard** and **payments operations platform** for a global banking client, performing **outbound communication** with business and operations teams to verify transaction flows and assess business process accuracy; achieved **99.5% uptime** and reduced **payment-message verification time by 22%**.
- Applied **judgment and market-specific knowledge** of **ISO 20022 message formats**, **SEPA payments**, and **cross-border payment regulations** to validate data integrity and assess business information accuracy in production payment systems; collaborated with **compliance and operations teams** on regulatory requirements and **SLA-critical verification workflows**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
