PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Operated as primary point of contact for **network monitoring and incident response** across enterprise data center infrastructure at HCL Technologies, detecting and diagnosing error/failure conditions across routing, switching, and physical network devices; managed **P1/P2 incident escalation** with **SLA adherence** using **Splunk, CloudWatch, and Dynatrace** monitoring tools, achieving **99.5% uptime** for critical payment-processing networks.
- Managed **ticketing systems (Jira)** for network and application incident tracking, acknowledging and documenting all incidents with detailed troubleshooting steps, categorizing by severity and impact, and ensuring **accurate logs and ticket updates** in accordance with Service Level Agreements and operational workflows.
- Performed **fault isolation and resolution** across Layer 1–3 network issues, including **VLAN configuration, subnet management, routing protocols, and switching device troubleshooting**; coordinated with smart hands teams and equipment vendors to restore service and minimize operational impact.
- Developed and deployed **Python automation scripts** for network monitoring, alerting, and operational reporting; created **dashboards and metrics** using **Power BI and Splunk** to drive efficiency improvements and provide real-time visibility into network health, reducing manual troubleshooting time by **30%**.
- Documented and optimized **operational procedures, Methods of Procedure (MOPs), and Standard Operating Procedures (SOPs)** for data center network operations; maintained up-to-date **network change documentation** including VLAN assignments, subnet configurations, DNS updates, and equipment inventory in alignment with audit and RMA requirements.
- Collaborated cross-functionally with network operations teams, deployment and change-management groups, and audit teams to support **move, add, and change (MAC) operations** for data center infrastructure; ensured **accurate documentation and process adherence** across all network configuration updates and return merchandise authorization workflows.

SKILLS

Network Monitoring & Troubleshooting – Data Center network operations, routing and switching device troubleshooting, fault isolation and resolution, Layer 1–3 network diagnostics, physical network component troubleshooting (cables, patch panels, optics, transceivers), VLAN configuration, subnet management, DNS updates.

Monitoring Tools & Platforms – Splunk, CloudWatch, Dynatrace, dashboard creation, alert configuration, operational metrics and SLA monitoring.

Ticketing & Incident Management – Jira, ticket queue management, incident documentation, SLA tracking, prioritization, escalation procedures, cross-regional coordination.

Automation & Scripting – Python, command-line interfaces (CLI) for routers and switches, network monitoring automation, workflow optimization, shell scripting.

Data & Business Intelligence – Power BI, operational dashboards, data modelling, performance metrics visualization, reporting.

Infrastructure & Cloud – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, CI/CD pipelines.

Domain Knowledge – Enterprise banking and payments infrastructure, production support, change-control management, audit and compliance documentation, MOPs and SOPs development.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Data Center Network Monitoring & Incident Response System (HCL Technologies)

- Architected and maintained a **Splunk-based network monitoring dashboard** providing real-time visibility into payment-operations data center infrastructure, including routing, switching, and physical network device health across multiple network segments.
- Implemented **automated alerting and threshold-based monitoring** using **Splunk and CloudWatch** to detect and diagnose Layer 1–3 network issues, reducing mean-time-to-detection (MTTD) by **40%** and enabling proactive fault isolation before service impact.
- Developed **Python automation scripts** to process network event logs, categorize incidents by severity and impact, and generate escalation notifications aligned with SLAs; integrated with ticketing system to ensure **accurate documentation of troubleshooting steps** and resolution timelines.
- Documented comprehensive **Methods of Procedure (MOPs) and Standard Operating Procedures (SOPs)** for network troubleshooting workflows, VLAN configuration updates, subnet management, and escalation processes; maintained **change documentation** and audit trails for all network modifications.

Enterprise Network Operations & Change Management (HCL Technologies)

- Coordinated **move, add, and change (MAC) operations** for data center network infrastructure, supporting deployment teams in VLAN provisioning, subnet allocation, routing configuration, and switch fabric updates across production environments.
- Managed cross-functional collaboration with smart hands teams, equipment manufacturers, and regional network operations centers to resolve critical network incidents and restore service; tracked and escalated blocked cases while maintaining **clear communication with stakeholders** and operational teams.
- Created and maintained **network inventory documentation**, RMA tracking spreadsheets, and equipment deployment records in alignment with audit requirements; ensured **accuracy in logs and network change documentation** for compliance and post-implementation triage.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
