PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **multidisciplinary team coordination** and **technical quality assurance** on enterprise infrastructure projects, managing cross-functional inputs from ecologists, planners, engineers, and environmental specialists using **Jira, Confluence, and project management frameworks** to deliver **complex environmental documentation** including planning applications, environmental assessments, and statutory compliance reports on schedule and within budget.
- Directed **environmental consenting strategy** and **Irish planning legislation** compliance across **Strategic Infrastructure Development (SID)** applications and **Part 10 planning processes**, liaising with **An Coimisiún Pleanála** and **local authorities** to guide projects through statutory approval pathways, resulting in **100% consent success rate** across 12+ major infrastructure projects.
- Executed **EIAR screenings, optioneering assessments, and Multi-Criteria Assessment procedures** for major infrastructure projects, applying **EU EIA Directive guidelines, Irish environmental regulations, and waste legislation** to determine project scope and environmental assessment requirements with **zero regulatory non-compliance findings**.
- Coordinated **Natura Impact Statements (NIS), environmental impact assessments, and related specialist studies** ensuring **technical excellence, accuracy, and full compliance** with **Irish planning laws, EU environmental legislation**, and national statutory requirements through rigorous **peer review processes** and **quality assurance workflows**.
- Led **MAC applications with MARA** and managed **environmental consenting workflows** for major transport, energy supply, water/wastewater, and marine infrastructure projects, aligning **EIA activities with project objectives and stakeholder expectations** across feasibility, design, and consenting phases.
- Provided **senior environmental expertise** and **technical peer review** support to broader environmental teams on **linear infrastructure and major development projects**, mentoring junior specialists in **EIA methodology, environmental legislation interpretation, and planning consenting best practices** to uphold consistent **technical standards** across the portfolio.

SKILLS

Environmental Impact Assessment & Planning – EIAR management, EU EIA Directive compliance, Irish planning legislation, Strategic Infrastructure Development (SID), Part 10 planning applications, Natura Impact Statements (NIS), EIAR screening, optioneering assessments, Multi-Criteria Assessment procedures, environmental consenting strategy.

Regulatory & Compliance Framework – Irish environmental regulations, EU environmental legislation, waste legislation, An Coimisiún Pleanála liaison, MARA MAC applications, planning approval processes, statutory requirements, audit trails, data protection (GDPR).

Infrastructure Project Types – transport & linear infrastructure, energy supply projects, water and wastewater infrastructure, commercial and industrial developments, residential developments, marine projects.

Multidisciplinary Leadership & Coordination – team leadership, specialist coordination (ecology, planning, engineering), budget management, project timelines, quality assurance, peer review, stakeholder management, change-control management, UAT support.

Project & Documentation Management – Jira, Confluence, planning applications, environmental assessments, specialist reports, technical documentation, project scheduling, cross-functional collaboration.

Technical & Data Analysis – Power BI dashboards, data modelling, SQL, PostgreSQL, MySQL, Oracle, statistical analysis, report generation, business intelligence, performance metrics.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Cross-Modal Transport Corridor EIA & Consenting Strategy (HCL Technologies)

- Led **EIAR coordination and technical quality assurance** for a **250 km national transport infrastructure project** spanning road, rail, and utility corridors across three Irish counties, managing inputs from 8+ specialist disciplines (ecology, hydrology, air quality, noise, archaeology, landscape, traffic, social) and ensuring **100% compliance** with **EU EIA Directive, Irish Planning and Development Regulations, and environmental legislation**.
- Developed **environmental consenting strategy** and managed **Strategic Infrastructure Development (SID) application** process, coordinating **Natura Impact Statement (NIS), habitat surveys, and protected species assessments** across ecologically sensitive zones; liaised with **An Coimisiún Pleanála** and **6 local authorities** to navigate statutory consultation phases, resulting in **positive screening decision within 6 months**.
- Conducted **EIAR optioneering assessments** using **Multi-Criteria Assessment procedures** to evaluate **4 route alternatives** against environmental, economic, and social criteria; produced **comparative impact matrices** and **consenting-risk assessments** using **Power BI dashboards** to support client decision-making and stakeholder engagement.
- Executed rigorous **peer review and quality assurance workflows** on **8 specialist environmental chapters** (totalling 1,200+ pages), ensuring technical accuracy, regulatory alignment, and consistency; implemented **Jira-tracked change management** to manage **450+ reviewer comments** through resolution with **zero rework cycles**.
- Led **MAC application submissions with MARA** for marine environmental assessments and coordinated **MARA consultation response strategy**, managing **regulatory feedback and iterative submission cycles** to secure environmental licence approval for coastal infrastructure components within **target timescales**.

Environmental Assessment Data & Reporting Hub (HCL Technologies)

- Designed and deployed **Power BI environmental assessment dashboard** consolidating baseline environmental data, specialist study outputs, and regulatory compliance metrics across **15+ active infrastructure projects**; leveraged **SQL data warehousing** (PostgreSQL, Oracle) and **Power Query ETL** to integrate **spatially-referenced environmental datasets, stakeholder feedback logs, and timeline tracking**.
- Implemented **DAX-driven performance measures** for environmental compliance scoring, EIAR progress tracking, and consenting-milestone monitoring; delivered **executive dashboards** for project leadership and client reporting, reducing **manual status-update cycles by 70%** and enabling **real-time risk visibility** across the portfolio.
- Coordinated **specialist report ingestion and validation workflows** using **Python automation scripts** to extract, validate, and publish ecological survey data, baseline environmental characterisation, and impact predictions from disparate sources; automated **regulatory compliance checklist generation** against **EIA Directive requirements** and **Irish planning legislation**, reducing **QA turnaround from 5 days to 1 day**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
