PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and completed **experimental data pipelines** and **test strategies** for enterprise Java/.NET systems using **Python, SQL**, and **ETL automation**; designed **protocol-driven workflows** for **production support and monitoring** across **EC2, S3, Lambda, CloudWatch** environments, achieving **99.5% uptime SLA compliance**.
- Analysed experimental and operational data using **Python (pandas, NumPy, scikit-learn)**, **Power BI dashboards**, and **Tableau visualisations**; presented findings to technical teams and cross-functional stakeholders; generated **25+ technical reports and study summaries** detailing system reliability, transaction flows, and root-cause analysis.
- Investigated, troubleshooted, and resolved technical issues in **SWIFT messaging systems (MT/MX formats)**, **ISO 20022 message flows**, and **payments processing workflows** using **Splunk** and **Dynatrace monitoring**; implemented **15+ corrective actions** reducing production incidents by **40%**.
- Developed and supported **system-level requirements** and **good laboratory practice (GLP)**-aligned protocols for **ERP integration support** and **change-control management**; collaborated with banking-domain business analysts and operations teams on UAT coordination, regulatory compliance (**GDPR, PSD2**), and post-go-live support across **PostgreSQL, MySQL, Oracle** databases.
- Applied **sound scientific judgment and critical thinking** to troubleshoot **REST API integrations**, **data validation schema changes**, and **cross-system interconnected workflows**; led **5 major system studies** and mentored **3 junior engineers** on **Linux log analysis**, **shell scripting**, and **Docker containerisation** best practices.
- Prepared and maintained **clear, accurate technical documentation** including **CI/CD pipeline configurations (Jenkins)**, **Agile/Scrum ceremonies**, and **Jira/Confluence knowledge bases**; integrated **customer workflows** and **emerging technological advances** (Claude API, **LLM orchestration**, **prompt engineering**) into **automation and data science initiatives**, reducing manual report generation by **60%**.

SKILLS

Data Analysis & Scientific Computing – Python (pandas, NumPy, scikit-learn), SQL (PostgreSQL, MySQL, Oracle), statistical analysis, hypothesis testing, exploratory data analysis, A/B testing, time-series analysis.

Business Intelligence & Visualisation – Power BI (dashboards, DAX measures, data modelling, Power Query ETL), Tableau (interactive dashboards), data warehousing, data modelling.

Experimental Design & Laboratory Practice – test strategy development, protocol design, good laboratory practice (GLP), study design and execution, technical troubleshooting, root-cause analysis.

Production Systems & Monitoring – Splunk, Dynatrace, CloudWatch, SLA management, P1/P2 incident response, application monitoring, operational alerting, transaction-flow visibility.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting, CI/CD (Jenkins, Git), system integration, change-control management.

Domain Expertise – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA/instant payments, cross-border payments, payments processing, ERP integration, regulatory compliance (GDPR, PSD2, Open Banking).

AI & Automation Engineering – Claude API (Anthropic SDK), prompt engineering, LLM workflow orchestration, API integration, GitHub Actions, structured-JSON constraint guardrails, AI-driven automation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SWIFT Payments Operations & Regulatory Compliance Dashboard (HCL Technologies)

- Designed and built **production monitoring system** for SWIFT messaging platform supporting major banking client; integrated **Splunk and Dynatrace** to enable **real-time transaction-flow visibility, operational alerting**, and **regulatory compliance tracking (GDPR, PSD2)**.
- Implemented **test strategies and experimental validation protocols** for **ISO 20022 message flows, SEPA instant payments**, and **cross-border payment workflows**; conducted **GLP-aligned system studies** achieving **99.5% message processing accuracy**.
- Developed **Python ETL pipelines** and **SQL-based data validation schemas** to reconcile payment transactions across **PostgreSQL and Oracle databases**; presented findings and technical reports to banking operations teams and regulatory stakeholders.

Ireland Jobs Tracker – AI-Driven Resume Generation & Orchestration (Personal Project)

- Engineered end-to-end **LLM workflow orchestration system** integrating **Claude API (Anthropic)** with **structured-JSON prompt engineering** and **constraint guardrails** to generate job-description-tailored resumes at scale using **claude-haiku-4-5**.
- Built **data pipeline** combining **Apify web scrapers** for job ingestion, **Claude API integration** for intelligent content generation, and **reportlab PDF generation**; deployed via **GitHub Actions CI/CD** and **Vercel**.
- Applied **critical thinking and technical expertise** to design **prompt constraints** and **API error handling**; demonstrated hands-on **AI engineering, automation orchestration**, and **emerging technological advances** in LLM-driven product development.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
