PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built **AI-powered product experiences** using **Claude API / Anthropic SDK** and **prompt engineering** to automate resume generation at scale, orchestrating end-to-end workflows from data ingestion through PDF delivery, reducing manual content creation by **85%**.
- Designed and deployed **production-grade Python applications** integrating **AI tools** into development workflows—design, implementation, testing, and documentation—leveraging **FastAPI**, **structured JSON prompt engineering**, and constraint guardrails to move faster while maintaining correctness and reliability across **1000+ generated outputs**.
- Owned **end-to-end AI workflow orchestration** from possibility to production: **data pipeline design** (Apify scrapers → ETL → structured ingestion), **LLM integration**, and **deployment automation** via **GitHub Actions CI** and **Vercel**, delivering code built for scale and reproducibility.
- Drove **application reliability and incident management** across enterprise systems using **Splunk**, **CloudWatch**, and **Dynatrace** for SLA compliance and P1/P2 response, while simplifying operational complexity through **automation scripts**, reducing mean-time-to-resolution by **40%**.
- Engineered **data pipelines and ETL workflows** in **Python (pandas, NumPy)** and **SQL (PostgreSQL, MySQL, Oracle)** to transform raw operational data into actionable insights, supporting **30+ scheduled reports** and **real-time dashboards** for cross-functional stakeholders.
- Mastered diverse technology stacks with **end-to-end ownership**: **Java Spring Boot REST APIs**, **AWS (EC2, S3, Lambda, CloudWatch)**, **Docker containerisation**, **Jenkins CI/CD pipelines**, **Git branching**, and **Linux system administration**, delivering robust, maintainable solutions across monolithic and microservice architectures.

SKILLS

AI & Machine Learning – Claude API, Anthropic SDK, prompt engineering, LLM integration, structured JSON design, constraint-based guardrails, AI workflow orchestration.

Python & Data Engineering – Python, FastAPI, Flask, pandas, NumPy, scikit-learn, data pipeline design, ETL workflows, scheduled reporting, data transformation.

Backend & System Design – Java Spring Boot, REST API development, microservices, end-to-end ownership, system architecture, code quality, reproducibility at scale.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD pipelines, Git branching, Linux, production deployment.

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), data warehousing, Power BI, Tableau, DAX, Power Query, business intelligence, dashboard development, statistical analysis.

Reliability & Observability – Splunk, Dynatrace, CloudWatch, application monitoring, SLA management, incident response, production support, operational alerting.

Professional – Jira, Confluence, Agile/Scrum, cross-functional collaboration, stakeholder communication, IELTS Band 7.

EDUCATION AND TRAINING

PROJECTS

Ireland Jobs Tracker – AI-Powered Resume Generation Platform (Personal Project)

- Architected and deployed a **production-grade AI application** integrating **Claude API (claude-haiku-4-5)** with advanced **prompt engineering** and **structured JSON constraints** to generate tailored job application resumes at scale, demonstrating deep proficiency in **LLM integration** and **API orchestration**.
- Engineered end-to-end **AI workflow automation**: **Apify web scrapers** → **ETL data ingestion** → **Claude API processing** → **reportlab PDF generation** → **GitHub Actions CI** → **Vercel deployment**, delivering reproducible, production-ready code built for reliability and scalability.
- Demonstrated hands-on mastery of **prompt engineering techniques**, **JSON schema design**, and **LLM constraint guardrails** to ensure output quality and consistency across 1000+ resume variants, showcasing ability to integrate AI tools into real-world product workflows.

SWIFT Payments Operations & Monitoring Dashboard (HCL Technologies)

- Owned **production support and real-time monitoring** for a mission-critical **SWIFT messaging dashboard** serving a tier-1 banking client, ensuring **99.9% uptime SLA** through **Splunk**, **CloudWatch**, and **Dynatrace** observability, and delivering **P1/P2 incident response** averaging **15-minute resolution time**.
- Engineered **ISO 20022 message flow analytics** and **SWIFT MT/MX format processing**, implementing transaction-flow visibility and operational alerting for **50,000+ daily payment messages** across SEPA, instant payments, and cross-border payment corridors, ensuring regulatory compliance and audit trail integrity.
- Collaborated across cross-functional teams including banking-domain BAs and operations to translate SWIFT/payments requirements into production systems, coordinating **UAT cycles**, **change-control workflows**, and **post-implementation support** for interconnected ERP and payments platforms.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
