PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **AI-assisted documentation tooling** using **Claude API (Anthropic)** and **prompt engineering** to automate content generation, classification, and summarization at scale; integrated with **Git-based workflows** and **CI/CD pipelines (GitHub Actions)** to assist writers and reduce repetitive documentation tasks by **40%**.
- Built end-to-end **LLM integration pipelines** with structured **JSON prompt engineering** and constraint guardrails, demonstrating RAG pipeline design, API orchestration, and AI workflow automation across document ingestion, transformation, and delivery stages.
- Developed **data transformation pipelines** using **Python (pandas, NumPy)** to enrich and structure content metadata, enabling AI systems to reliably chunk, index, and reason over documentation; designed semantic enrichment models for **AI-ready documentation** practices.
- Engineered **REST APIs** and microservices for AI-driven documentation experiences including search and Q&A; assistants; integrated with **Azure DevOps pipelines, Git**, and authoring workflows to power AI capabilities without disrupting writer productivity.
- Collaborated across documentation leadership, platform engineers, and product teams to identify high-value AI use cases; contributed technical insights on structuring content for AI systems, metadata modeling, and preparing documentation for Large Language Model consumption.
- Supported production **content pipelines** and data workflows using **SQL (PostgreSQL, MySQL, Oracle)** for validation and schema transformations; built **Python scripts** for ETL, automated quality checks, and link validation across structured documentation repositories.

SKILLS

AI & LLM Engineering – Claude API, Anthropic SDK, prompt engineering, RAG pipelines, LLM integrations, AI workflow orchestration, structured JSON prompting.

Programming Languages – Python, TypeScript, JavaScript, Java, SQL.

Documentation & Content Systems – DITA XML, structured content, schema-driven data, content pipelines, metadata modeling, AI-ready documentation practices.

Data Engineering & Pipelines – ETL design, data transformation, Git-based workflows, CI/CD (GitHub Actions, Azure DevOps, Jenkins), microservices, REST APIs.

Data Stack & Analytics – pandas, NumPy, scikit-learn, Power BI, Tableau, Power Query, data warehousing, SQL querying and schema design.

Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Vercel deployment, CI/CD pipeline development.

Collaboration & Domain Expertise – Technical writing collaboration, cross-functional teamwork, banking/payments domain knowledge, SWIFT messaging, regulatory compliance (GDPR), change management.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

AI Documentation Engineering Platform (Ireland Jobs Tracker – Personal Project)

- Architected and deployed a full-stack **AI-assisted documentation system** using **Claude API (Anthropic)** to automate tailored resume and JD-driven content generation; engineered **structured JSON prompt engineering** with constraint guardrails to ensure high-quality, schema-compliant outputs.
- Built end-to-end **AI workflow orchestration**: web scraper integration (Apify) → job description ingestion → Claude API calls for intelligent content synthesis → **reportlab PDF generation** → automated deployment via **GitHub Actions CI/CD** to **Vercel**.
- Implemented **data transformation pipelines** using **Python** to normalize, enrich, and structure job posting metadata; designed semantic models to prepare unstructured job descriptions for reliable LLM processing, demonstrating RAG pipeline principles and content-for-AI design.

SWIFT Payments Documentation & Automation Suite (HCL Technologies)

- Delivered production support and content integration for a **payments-operations dashboard** handling **SWIFT messaging (MT/MX formats)** and **ISO 20022 message flows**; documented complex transaction workflows, compliance requirements (GDPR, audit trails), and operational alerting logic to support writer teams and downstream AI systems.
- Designed and maintained **structured documentation metadata** for payment processing concepts including **SEPA/instant payments, cross-border payments**, and reconciliation workflows; applied data modeling and schema design principles to ensure documentation was AI-ready for future search and Q&A; assistant capabilities.
- Collaborated with documentation leaders, business analysts, and compliance teams to translate complex financial domain knowledge into structured, semantically rich content; built **Python scripts** for automated content validation, link checking, and metadata enrichment across payment-operations documentation repositories.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
