PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analysed complex datasets across **PostgreSQL, MySQL, Oracle** databases to identify trends, patterns, and actionable insights; designed and deployed **Python-based predictive models** using **scikit-learn** achieving **87% accuracy** on transaction-flow anomaly detection for banking operations.
- Developed and deployed **machine learning** and **AI-driven solutions** for production monitoring dashboards using **Splunk, CloudWatch, Dynatrace**; engineered **automated data pipelines** and **ETL workflows** in **Python** reducing manual reporting overhead by **65%**.
- Contributed to design, development, and implementation of **AI initiatives** across global enterprise systems; integrated **generative AI** and **LLM technologies** (Claude API / Anthropic SDK) into automation workflows; evaluated and implemented emerging **AI technologies and best practices** for workflow orchestration.
- Collaborated with cross-functional teams including business analysts, operations, and IT stakeholders to translate business requirements into **data science and AI solutions**; supported **data governance** and **model governance** frameworks across payment-processing and ERP integration systems.
- Developed interactive **dashboards and reporting tools** using **Power BI, Tableau** with **DAX measures, data modelling**, and **Power Query ETL**; presented findings and recommendations to both technical and non-technical stakeholders; demonstrated **responsible AI** principles in model transparency and auditability.
- Explored and implemented emerging **data science and artificial intelligence** tools and techniques including **NLP, time-series forecasting, A/B testing**; applied **statistical analysis** and **hypothesis testing** methodologies; contributed to **model evaluation metrics** and continuous learning in AI best practices.

SKILLS

Programming & Data Science – Python, R, scikit-learn, pandas, NumPy, statistical analysis, hypothesis testing.

Machine Learning & AI – Predictive modelling, supervised learning, unsupervised learning, NLP, time-series forecasting, model evaluation metrics, responsible AI, generative AI, LLM technologies, prompt engineering.

Data Visualization & BI – Power BI, Tableau, DAX, Power Query, data modelling, interactive dashboards, business intelligence reporting.

Data Engineering & Pipelines – ETL workflows, data pipelines, SQL (PostgreSQL, MySQL, Oracle), data warehousing, Hadoop, Spark.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, CI/CD (Jenkins), Linux.

AI/ML Frameworks & Tools – TensorFlow, PyTorch, scikit-learn, Claude API, Anthropic SDK, GitHub Actions, Vercel.

Domain & Governance – Data governance, model governance, pharmaceutical industry context, large datasets, version control, API integration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Payments Operations & AI Analytics Platform (HCL Technologies)

- Engineered end-to-end **data pipeline** and **AI-driven monitoring system** for SWIFT messaging platform supporting global banking operations; integrated **predictive models** using **Python, scikit-learn** to forecast transaction anomalies with **92% precision**, reducing incident detection time by **40%**.
- Designed **Power BI dashboards** with **DAX measures** and **real-time data visualisation** for SWIFT message flows (MT/MX), ISO 20022 compliance, and SEPA payment reconciliation; enabled cross-functional stakeholders to monitor SLAs and operational metrics across interconnected banking systems.
- Implemented **data governance** and **responsible AI** frameworks for regulatory compliance (GDPR, audit trails); collaborated with banking domain teams on **model governance** and **change-control management** for AI-enhanced transaction-flow visibility and operational alerting.

Ireland Jobs Tracker – AI Resume Generation & Workflow Automation (Personal Project)

- Built and deployed a scalable **AI workflow automation** system leveraging **generative AI, LLM technologies** (Claude Haiku 3.5), and **prompt engineering** to generate tailored resume content at scale; orchestrated end-to-end pipeline with **Apify scraper integrations, structured JSON prompt engineering**, and constraint guardrails.
- Engineered data pipeline combining **job description ingestion, AI-driven content generation, and PDF reportlab generation**; deployed on **GitHub Actions CI/CD** and **Vercel** with version control and automated testing, achieving sub-second resume generation latency.
- Demonstrated advanced **prompt engineering, API integration** (Anthropic SDK), and **AI model orchestration** capabilities; applied emerging **generative AI tools and concepts** to real-world automation use cases, directly validating readiness for **AI initiatives** and **emerging AI technologies** implementation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
