PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **high-touch technical support** and subject-matter expertise for enterprise Java/Spring Boot applications across **production environments**, resolving **P1/P2 incidents** with **99.5% SLA adherence** and building deep product knowledge that translated customer feedback into actionable insights for Engineering and Product teams.
- Mastered **statistical analysis, data visualization, and analytical workflows** through MSc Data Analytics coursework and professional application, enabling confident communication of **statistical methods, visualization best practices, and analytical concepts** tailored to users ranging from early-career researchers to experienced data scientists.
- Developed and maintained **operational dashboards and knowledge base documentation** using **Splunk, CloudWatch, and Dynatrace** to support user onboarding, product ramp, and team enablement; authored **40+ support runbooks and troubleshooting guides** that reduced average resolution time by **35%** and scaled support capacity across cross-functional teams.
- Synthesized complex user feedback from **live chat, email, and escalation channels** into documented patterns and product recommendations; partnered with Product and Engineering on **5+ feature iterations** informed directly by customer pain points, demonstrating ability to bridge user needs and technical delivery in **early-stage / beta product environments**.
- Applied advanced **data analysis and statistical testing** (regression, hypothesis testing, A/B testing, time-series analysis) across **peer-reviewed research contexts** via MSc curriculum and professional analytics work; proficient in translating **statistical rigor, figure-panel composition, and visualization best practices** for scientific audiences and grant-funded research teams.
- Operated independently in **ambiguous, pre-launch product environments** at HCL, building processes, coordinating UAT, managing change control, and establishing escalation workflows for interconnected systems; demonstrated **self-directed bias toward action** by proactively identifying gaps, designing documentation, and driving adoption with **zero external direction** during product go-live phases.

SKILLS

Data Analysis & Statistics – statistical hypothesis testing, regression analysis, A/B testing, time-series analysis, exploratory data analysis, statistical methods for peer-reviewed publications.

Data Visualization & BI Tools – Power BI, Tableau, data modelling, DAX, Power Query, interactive dashboards, figure-panel design, scientific visualization.

Analytical & Programming Tools – Python (pandas, NumPy, scikit-learn), R/RStudio, SQL (PostgreSQL, MySQL, Oracle), scikit-learn, data engineering fundamentals.

Customer Support & SaaS – technical support, customer-facing communication, live chat and email support, escalation management, SLA management, knowledge base development, onboarding support.

Product & Research Context – early-stage product support, beta launch environments, user feedback synthesis, scientific research workflows, grant-funded research familiarity, life sciences domain knowledge.

Operational Tools & Documentation – Splunk, CloudWatch, Dynatrace, Slack, Jira, Confluence, Git, process documentation, runbook development, UAT coordination.

Software Engineering Fundamentals – Java Spring Boot, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, CI/CD, system integrations, ERP support.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SWIFT Payments Operations & Data Analysis Dashboard (HCL Technologies, Sep 2021 – Jan 2025)

- Owned end-to-end **customer-facing technical support** for a **payments-operations dashboard** serving a major banking client; delivered **subject-matter expertise** on **SWIFT messaging (MT/MX)**, **ISO 20022 message flows**, **SEPA instant payments**, and **cross-border payments** workflows to users ranging from operations teams to senior banking analysts.
- Built and maintained **operational dashboards and alerting systems** using **Splunk and CloudWatch** to provide transaction-flow visibility, regulatory compliance tracking (GDPR, audit trails), and SLA management; dashboard insights reduced incident detection time by **40%** and enabled proactive user communication during peak payment-processing windows.
- Synthesized recurring user pain points and feedback from **live chat, email, and escalation channels** into **product recommendations** that informed **3 major feature releases**; partnered with Product and Engineering on reconciliation workflows, tokenization concepts, and Open Banking / PSD2 compliance enhancements in a **regulated, beta-phase product environment**.
- Developed **comprehensive knowledge base documentation, training materials, and user guides** covering payments processing, error troubleshooting, and regulatory requirements; documentation served both internal teams (Customer Success, Sales) and external full-serve partners, reducing support ticket volume by **28%** and enabling self-service for **65% of inquiries**.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)

- Engineered an end-to-end **AI workflow automation platform** integrating **Claude API (Anthropic)** and **prompt engineering** to deliver job-description-tailored resumes at scale; orchestrated Apify web scrapers, JD ingestion pipelines, **structured-JSON prompt engineering with constraint guardrails**, reportlab PDF generation, and GitHub Actions CI/CD deployment to Vercel.
- Designed and deployed **user-facing technical support materials** and **interactive documentation** enabling researchers and job seekers to understand AI-generated resume customization, statistical accuracy, and best-practice application workflows; platform onboarded **500+ users** with **98% successful resume generation** on first attempt.
- Applied advanced **data analysis and prompt engineering methodology** to validate resume customization accuracy across **100+ unique job descriptions**; implemented A/B testing of Claude model variants (haiku-4-5) and structured output formats, resulting in **15% improvement in user-perceived relevance scores** and **22% reduction in manual editing overhead**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
