PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, built, and technically led **end-to-end features** across **Java Spring Boot, Python, and REST API** services at HCL Technologies, delivering production-quality software at scale for enterprise banking clients with **99.9% uptime SLA** across millions of daily transactions.
- Owned technical breakdown of product requirements into clear architectural designs and executable tasks, defining **system design** and **API contracts** for cross-functional teams; conducted rigorous **code reviews, design walkthroughs, and test strategy definition** to raise engineering quality and consistency across **Spring Boot microservices** and **cloud infrastructure**.
- Led **AI-assisted development** workflows and **LLM-based code scaffolding** through a personal project integrating **Claude API** (Anthropic) with structured prompt engineering, generating **production-ready code** and reducing template-to-deployment time by **60%**; demonstrated ownership of **validated, production-grade outputs** and **constraint-driven prompt design**.
- Investigated root causes of production incidents and performance degradation using **Splunk, Dynatrace, and CloudWatch dashboards**; identified **bottlenecks** across **application logs, metrics, and customer feedback**; implemented **optimizations** that improved P1/P2 incident resolution time by **35%** and customer CSAT scores by **18%**.
- Partnered closely with UX design, product management, and cross-functional engineering teams to balance delivery speed, code quality, and long-term sustainability; influenced technical direction through **architecture discussions** and mentored junior engineers on **best practices, testing strategies, and CI/CD pipelines**, fostering a culture of ownership and continuous improvement.
- Built end-to-end **data pipelines, ETL workflows, and operational dashboards** using **Python** (pandas, NumPy), **Power BI, and SQL**; automated **testing frameworks** in **Jenkins CI pipelines** and **Git-based deployment workflows**, reducing manual testing effort by **45%** and enabling rapid, reliable feature releases across **AWS (EC2, S3, Lambda)** infrastructure.

SKILLS

Languages & Core Development – Python, Java, Modern C++, TypeScript/JavaScript, SQL.

Back-End & API Architecture – Spring Boot, RESTful APIs, WebSockets, API design, microservices, system design, architectural patterns.

UI Frameworks & Frontend – React, Angular, Qt, responsive design, component-driven development.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins), Git, continuous integration, continuous delivery, DevOps practices.

Data Engineering & Analytics – ETL, data pipelines, Power BI, Tableau, SQL (PostgreSQL, MySQL, Oracle), data warehousing, data modelling, Power Query.

Testing & Quality Assurance – Unit testing, integration testing, end-to-end testing, contract testing, test automation, test strategy definition, CI pipeline testing.

AI-Assisted Development & Tools – LLM-based code scaffolding, Claude API, prompt engineering, AI-driven refactoring, test generation, debugging automation, developer productivity tools.

EDUCATION AND TRAINING

PROJECTS

Webex-Scale Payments & Messaging Platform (HCL Technologies)

- Designed and led development of a **SWIFT messaging dashboard** supporting enterprise banking operations with **real-time transaction-flow visibility**, **ISO 20022 message flows**, and **SEPA/cross-border payment processing**, delivering **99.9% uptime** for millions of end-users across multiple payment channels.
- Architected **RESTful APIs** and **WebSocket-based real-time feeds** for operational alerting, transaction reconciliation, and regulatory compliance reporting; implemented **end-to-end testing** and **contract testing** across microservices to validate payment-flow integrity and ISO 20022 message compliance.
- Conducted **system design** reviews and **technical decision-making** for cloud migration from on-premise to **AWS (EC2, Lambda, CloudWatch)**; optimized query performance across **PostgreSQL, Oracle, and MySQL** databases, reducing transaction-lookup latency by **40%** and improving dashboard responsiveness by **50%**.
- Mentored cross-functional teams on **code quality**, **testing strategies**, and **CI/CD best practices** using **Jenkins pipelines** and **Git branching**; led **design walkthroughs** and **code reviews** to ensure maintainability and adherence to financial-services regulatory standards (GDPR, audit trails, change-control management).

Ireland Jobs Tracker – AI-Powered Resume & JD Intelligence Platform (Personal Project)

- Built an end-to-end **AI-assisted development platform** integrating **Claude API** (Anthropic) with **LLM-based code scaffolding** and **structured prompt engineering** to generate production-ready, JD-tailored resume content at scale; implemented **constraint-driven prompts** and validation guardrails to ensure accurate, compliant outputs.
- Orchestrated a complete **data pipeline** from **web scraping** (Apify) → JD ingestion → Claude processing → **reportlab PDF generation** → deployment, demonstrating expertise in **system design**, **end-to-end testing**, and **DevOps practices** across **GitHub Actions CI** and **Vercel hosting**.
- Optimized **AI workflow automation** using advanced prompt engineering techniques and API rate-limiting; reduced resume-generation latency by **55%** through asynchronous processing and caching strategies, enabling real-time, scalable delivery of personalized content to job applicants worldwide.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
