PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built **end-user features** for enterprise-scale applications serving millions of users, leveraging **Java Spring Boot, REST APIs, and modern C++** to deliver high-quality, maintainable components within existing frameworks; implemented **unit, integration, and end-to-end testing** strategies within **CI/CD pipelines** using **Jenkins** to ensure reliability across **Windows, macOS, Linux, and Web platforms**.
- Translated product requirements into clear technical tasks and elegant architectural solutions, breaking down complex problems through **scientific and creative problem-solving**; collaborated closely with product managers, UX designers, and cross-functional engineers to iterate rapidly and deliver customer-delighting experiences measured by **CSAT, NPS, and operational metrics**.
- Optimised application performance and reliability across multiple platforms using **CloudWatch, Dynatrace, and Splunk** for real-time monitoring and alerting; managed **P1/P2 incident response** and **SLA-driven production support**, reducing mean-time-to-resolution by **35%** through data-driven troubleshooting and proactive system improvements.
- Leveraged **AI-assisted development tools** including **LLM-based code generation and refactoring** to accelerate scaffolding, test generation, and debugging workflows; demonstrated strong ownership and validation of shipped code through rigorous **contract testing** and **test automation** within continuous delivery pipelines.
- Developed full-stack applications using **TypeScript/JavaScript, React, Angular, and Python** across backend (**Spring, WebSockets, API design**) and frontend layers; implemented **Git-based workflows, DevOps practices, and continuous integration/continuous delivery** to ship features at velocity while maintaining code quality.
- Applied statistical and scientific methods to troubleshoot customer issues and elevate user experience; built **Power BI and Tableau dashboards** to surface product metrics, **A/B testing** results, and operational insights for stakeholders; acted as a detective to understand user feedback and translate findings into engineering improvements.

SKILLS

Languages & Core Development – Java, Python, TypeScript/JavaScript, Modern C++, SQL (PostgreSQL, MySQL, Oracle).

Frameworks & UI Libraries – Spring Boot, React, Angular, REST APIs, WebSockets, API design patterns.

Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines, continuous delivery, continuous integration, Linux.

Testing & Quality Assurance – Unit testing, integration testing, end-to-end testing, contract testing, test automation, test strategies.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, application performance monitoring, SLA management, incident response.

Data & Analytics – Power BI, Tableau, Data modelling, ETL, data warehousing, statistical analysis, A/B testing, pandas, NumPy, scikit-learn.

AI & Automation – LLM-based tools, prompt engineering, Claude API, AI-assisted development, code generation, refactoring automation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies)

- Designed and implemented end-to-end features for a **SWIFT messaging and payments-operations dashboard** supporting a banking client's production environment, enabling real-time transaction-flow visibility and operational alerting across **MT/MX message formats** and **ISO 20022 message flows**.
- Built **REST API integrations** connecting payment processing systems, **ERP modules**, and enterprise business systems; developed **Python data pipelines and ETL workflows** for reconciliation and **SEPA / cross-border payments processing**, ensuring **GDPR compliance** and audit trail requirements in a highly regulated financial-services environment.
- Collaborated with banking-domain business analysts and operations teams on requirements gathering, **UAT coordination**, and post-implementation triage; managed **change-control processes** for system configuration updates and leveraged **Splunk and Dynatrace monitoring** to maintain **SLA-driven production support** across interconnected systems.

Ireland Jobs Tracker – AI Resume Generation Engine (Personal Project)

- Architected and deployed a full-stack web application orchestrating end-to-end **AI workflow automation**: integrated **Claude API (Anthropic)** with **prompt engineering** to generate tailored resumes at scale; ingested job descriptions via **Apify web scrapers**, processed structured JSON payloads with constraint guardrails, and generated PDF artifacts using **reportlab**.
- Demonstrated hands-on mastery of **LLM-based code generation, refactoring, and AI-assisted development**; implemented **GitHub Actions CI/CD pipelines** for automated testing and deployment to **Vercel**, showcasing strong ownership of shipped code quality and DevOps practices.
- Built responsive frontend using **React and TypeScript/JavaScript** with interactive UI components; designed efficient backend API layer to orchestrate multi-step workflows, validated **API design patterns** and **test automation**, and delivered a production-grade application demonstrating full-stack capability across modern web technologies.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
