PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered IT application support and reliability assurance for enterprise Laboratory Systems and QC laboratory environments, managing system availability, incident response, and post-deployment validation across production infrastructure using **CloudWatch, Splunk, and Dynatrace**; achieved **99.5% uptime SLA** through proactive monitoring and root-cause analysis.
- Authored, reviewed, and approved technical documentation for laboratory system deployments, IOQ test protocols, and system configuration specifications; coordinated cross-functional requirements gathering with site teams, QC operations, and IT stakeholders to ensure **21 CFR Part 11 compliance** and **data integrity guidelines** adherence.
- Conducted risk assessments and change-control reviews for laboratory capital projects and system configuration updates; documented validation evidence, audit trails, and regulatory compliance artifacts (**21 CFR Part 11**, data integrity, traceability) in support of laboratory certification and ongoing quality control operations.
- Designed and deployed system content and end-user training materials for laboratory system deployments; provided on-site support during UAT, system go-live, and operational handover; demonstrated capability to communicate technical concepts to non-technical laboratory and operations personnel.
- Performed Windows operating system administration and troubleshooting across **Windows 10, Windows 11, and server-based operating systems**; configured system settings, managed user access, and resolved infrastructure issues to maintain laboratory IT system reliability and security compliance.
- Integrated laboratory systems with enterprise business platforms via **REST APIs** and database-level data flows; architected cross-system data pipelines using **Python, SQL (PostgreSQL, MySQL, Oracle), and ETL processes** to ensure seamless information flow and operational reporting across QC, ERP, and analytical systems.

SKILLS

Laboratory Systems & Quality Control – QC laboratory system support, Laboratory capital project delivery, IOQ test protocols, system configuration specifications, laboratory system reliability, pharmaceutical production QC operations.

Regulatory Compliance & Data Integrity – 21 CFR Part 11 requirements, data integrity guidelines, audit trails, traceability, regulatory compliance documentation, quality assurance frameworks.

System Administration & Infrastructure – Windows 10, Windows 11, Windows Server operating systems, system monitoring, CloudWatch, Splunk, Dynatrace, incident management, SLA management.

Application Support & Deployment – IT application support, system deployment, end-user training, UAT coordination, post-go-live support, change management, problem-solving.

Backend & Integration Technologies – Java Spring Boot, REST APIs, Python, SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, system integrations, data engineering.

Cross-Functional Collaboration – stakeholder communication, requirements gathering, site team coordination, cross-functional relationship building, oral and written communication, team-based problem-solving.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments & QC Laboratory Operations Dashboard (HCL Technologies)

- Designed and maintained a production Laboratory Systems monitoring dashboard integrated with **Splunk and Dynatrace** to provide real-time visibility into system health, operational alerting, and transaction-flow monitoring; enabled site teams and QC operations to track laboratory instrument status and data integrity with **SLA-compliant alerting**.
- Authored comprehensive technical documentation for laboratory system configurations, IOQ test protocols, and system validation procedures; coordinated cross-functional UAT support with banking-domain QC teams and IT site personnel to ensure **21 CFR Part 11 compliance** and regulatory audit readiness.
- Conducted risk assessments and change-control reviews for system updates and configuration changes; documented audit trails, validation evidence, and regulatory compliance artifacts to support laboratory certification and ongoing operational compliance in a pharmaceutical production environment.

Enterprise Laboratory Systems Integration & Data Pipeline (HCL Technologies)

- Built end-to-end data integration pipeline connecting laboratory instrumentation systems, ERP platforms, and QC operational databases using **Python, Java Spring Boot REST APIs, SQL (PostgreSQL, Oracle), and ETL processes**; ensured **data integrity, traceability, and 99.5% pipeline reliability** for laboratory operations.
- Developed automated validation and reconciliation workflows using **Python scripting, SQL queries, and scheduled ETL jobs** to verify laboratory data accuracy, instrument readings, and QC compliance across interconnected systems; reduced manual validation effort by **40%** and eliminated data discrepancies.
- Provided on-site system deployment support and end-user training for laboratory IT systems across Windows-based infrastructure; managed post-go-live troubleshooting, system configuration tuning, and ongoing operational support to ensure **seamless laboratory workflow integration** and user adoption.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
