PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and assessed data accuracy against client policies in production environments, identifying and resolving **98%** of discrepancies through systematic validation workflows using **SQL**, **Python**, and **automated data quality scripts**.
- Engaged with business stakeholders via outbound communication and customer support interactions to verify information, update client platforms, and resolve data-related inquiries with **99.2% first-contact resolution rate** across **SWIFT messaging** and payments operations domains.
- Demonstrated adaptability and flexibility in dynamic, fast-paced environments while managing repetitive data validation and compliance tasks across interconnected systems, adhering to **GDPR**, **regulatory audit trails**, and **SLA commitments** in banking-regulated production support.
- Collaborated with cross-functional business teams, predominantly operations and compliance stakeholders, to gather requirements, troubleshoot data integrity issues, and implement platform updates with **zero regulatory violations** across **3.5 years** of enterprise support.
- Executed data moderation workflows including classification, tagging, and policy-compliance checks using **Python** automation, **ETL pipelines**, and **data quality frameworks** to ensure content accuracy and platform reliability for financial-services and enterprise clients.
- Demonstrated excellent verbal and written communication skills through production incident management, customer-facing UAT support, Confluence documentation, and cross-regional collaboration with teams in Dublin and global locations.

SKILLS

Data Moderation & Review – data accuracy assessment, client policy compliance, data quality validation, automated quality checks, content review workflows.

Programming & Scripting – Python, SQL, shell scripting, data automation, ETL pipeline development, Jira/Confluence ticketing.

Data Platforms & Tools – Power BI, Tableau, pandas, NumPy, scikit-learn, PostgreSQL, MySQL, Oracle, data modelling, data warehousing.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins CI/CD, Git.

Domain Expertise – banking and financial services, SWIFT messaging (MT/MX), ISO 20022, payments processing, SEPA, regulatory compliance, GDPR, audit trails, production support, SLA management.

Stakeholder Engagement – customer communication, business requirement gathering, cross-functional collaboration, UAT coordination, verbal and written communication, German language fluency.

Compliance & Operations – incident response, change-control management, dynamic environment adaptability, attention to detail, problem-solving, repetitive task focus.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Messaging & Payments Operations Dashboard (HCL Technologies)

- Led production support and real-time data monitoring for a banking client's SWIFT payment-messaging dashboard, reviewing transaction data for accuracy against **ISO 20022 message flows** and **SEPA compliance** requirements across **10,000+ daily transactions**.
- Engaged with banking operations teams and business stakeholders via outbound communication to verify transaction details, update payment-processing platforms, and resolve data discrepancies with **98.5% accuracy** and **SLA adherence of 99.8%**.
- Implemented **Python**-based data quality scripts and **SQL** validation queries to assess payment-message accuracy, regulatory audit-trail compliance, and **GDPR data-protection** requirements, eliminating **92%** of manual review overhead.
- Demonstrated problem-solving and adaptability in a fast-paced banking environment, managing repetitive data-validation tasks while adhering to financial-services compliance protocols, incident escalation procedures, and **P1/P2 SLA commitments**.

Data Quality & Content Compliance Automation (HCL Technologies & MSc Project)

- Designed and deployed an automated data moderation workflow using **Python**, **pandas**, and **ETL pipelines** to assess data accuracy, classify content against client policies, and generate compliance reports for financial and enterprise platforms.
- Built **Power BI** dashboards and **Tableau** interactive reports to visualize data quality metrics, policy-violation trends, and operational KPIs, enabling stakeholders to make data-driven decisions and identify process improvements with **35% reduction in review cycle time**.
- Integrated **REST APIs** and database-level data flows across **PostgreSQL**, **MySQL**, and **Oracle** to ingest client data, apply moderation logic, and export validated records for platform updates, achieving **99.1% data consistency** across interconnected systems.
- Applied **machine learning** techniques using **scikit-learn** and **statistical analysis** to predict data-quality issues and prioritize high-risk content for manual review, reducing false-positive flagging by **28%** and improving team efficiency.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
