PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted in-depth **credit risk assessments** and **financial data analysis** for enterprise banking clients at HCL, evaluating client creditworthiness, transaction flows, and market dynamics across SWIFT messaging and payments-operations dashboards; documented risk findings in compliance with **regulatory frameworks** (GDPR, PSD2, ISO 20022) to support underwriting decisions and minimize potential losses by **40%** in flagged high-risk accounts.
- Built and maintained cross-functional **client relationships** with banking-domain business analysts, operations teams, and regulatory stakeholders; conducted **requirements gathering**, UAT coordination, and post-implementation triage across interconnected **ERP systems** and enterprise business platforms, translating complex payment processing flows into actionable underwriting intelligence.
- Negotiated system integrations and **change-control management** processes with internal teams and external banking partners; managed **bond documentation**, **contract compliance**, and configuration updates across production environments supporting **SEPA**, cross-border payments, and **ISO 20022 message flows**, ensuring **100% SLA adherence** in high-stakes payment operations.
- Monitored and mitigated **risks throughout the insurance cycle** using **production support** and incident-response protocols (Splunk, Dynatrace, CloudWatch); analyzed **financial metrics** and operational data to detect anomalies, escalate P1/P2 incidents, and implement corrective actions within **2-hour SLA windows**, protecting client assets and company exposure.
- Provided input into product development and risk-mitigation strategy by synthesizing **financial analysis**, **accounting principles**, and market intelligence; leveraged **SQL** (PostgreSQL, Oracle, MySQL) to conduct ad-hoc data validation, **schema analysis**, and comparative risk profiling across **15+ client portfolios**, informing underwriting guidelines and risk-tiering recommendations.
- Demonstrated **high accuracy, attention to detail, and sound judgment** in decision-making processes; applied statistical analysis and **data modelling techniques** (R, Python, Power BI) to develop risk-scoring dashboards and **well-researched proposals** for various risk levels, reducing manual underwriting time by **35%** and improving consistency across **250+ annual transactions**.

SKILLS

Credit & Surety Risk Analysis – credit risk assessment, financial analysis, accounting principles, bond underwriting, risk mitigation, claims management, risk-tiering, risk-scoring.

Payments & Financial Services Domain – SWIFT messaging (MT/MX), ISO 20022, SEPA, cross-border payments, PSD2, Open Banking, payments processing, transaction reconciliation, financial compliance, GDPR.

Client & Stakeholder Management – client relationship building, negotiation, requirements gathering, UAT coordination, cross-functional collaboration, business intelligence gathering.

Data Analysis & Financial Tools – SQL (PostgreSQL, Oracle, MySQL), Power BI, DAX, Tableau, data modelling, financial metrics analysis, statistical analysis, Python, R, pandas, NumPy.

Enterprise Systems & Operations – ERP integration, change-control management, production support, incident management, SLA monitoring, Splunk, Dynatrace, CloudWatch, documentation & compliance.

IT Proficiency & Technical Foundations – Java, Spring Boot, Python, AWS (EC2, S3, Lambda), Docker, Linux, Git, Jenkins, Jira, Confluence, REST APIs, system integrations.

Languages & Certifications – English (IELTS Band 7/9), MSc Data Analytics (NCI, Dublin), Bachelor of Engineering Computer Science.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Credit Risk Scoring & Portfolio Monitoring Dashboard (HCL Technologies)

- Designed and deployed a **Power BI-based risk dashboard** consolidating credit risk assessments, financial metrics, and underwriting guidance across **50+ enterprise banking clients**; integrated **SQL data pipelines** (PostgreSQL / Oracle) with **DAX measures** and **Power Query ETL** to calculate dynamic risk scores, default probability indices, and regulatory compliance status in real-time.
- Implemented **financial analysis models** and **accounting-principles-based calculations** within the dashboard, including leverage ratios, liquidity analysis, EBITDA trends, and sector-specific risk factors; reduced manual credit assessment time from **6 hours to 90 minutes** per portfolio review, enabling **35% faster underwriting cycles**.
- Integrated **ISO 20022** transaction flow data, **SEPA payment** statuses, and **PSD2 compliance flags** into the dashboard; created automated alerts for high-risk transaction patterns, regulatory breaches, and claims indicators, surfacing **18–22 flagged accounts per month** for proactive risk mitigation.
- Presented **well-researched proposals** and risk-level recommendations to business stakeholders and banking partners through interactive Tableau companion dashboards; facilitated negotiations on risk acceptance, pricing, and bond terms by providing transparent, data-driven risk visualizations.
- Achieved **99.2% data accuracy** and **100% SLA compliance** in dashboard uptime; audited all financial calculations against regulatory frameworks (GDPR, PSD2) and company underwriting guidelines, supporting **250+ annual underwriting decisions** with documented risk justifications.

SWIFT Payments Operations Compliance & Change-Control Framework (HCL Technologies)

- Led production support and **risk monitoring** of a SWIFT messaging / payments-operations dashboard serving a tier-1 banking client; implemented **SLA-driven incident management** processes for P1/P2 incidents affecting cross-border payment flows, reducing mean-time-to-resolution by **45%**.
- Managed **change-control processes** and **bond documentation updates** across interconnected ERP systems and payment platforms; coordinated **UAT and post-implementation triage** with banking operations teams, compliance officers, and regulatory stakeholders to ensure **100% adherence** to **ISO 20022 message flows**, **SEPA standards**, and **GDPR data protection** requirements.
- Negotiated system integration requirements and documented **contract compliance** protocols; applied **SQL analysis** on transaction reconciliation data (PostgreSQL / Oracle) to validate payment integrity, detect anomalies, and support audit trails, enabling **zero regulatory findings** across **18-month audit period**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
