PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and optimized **ETL/ELT pipelines** processing **100M+ financial records daily** using **Python, SQL, and Spark** for enterprise data workflows in banking and financial services; implemented data quality controls and validation frameworks achieving **99.8% accuracy** across payment transactions and reconciliation datasets.
- Architected **Lakehouse solutions** on **Databricks** leveraging **Delta Live Tables** for real-time data ingestion and transformations; designed **Unity Catalog** governance structures and **IAM best practices** to enforce security and access control across **50+ datasets** in AWS cloud environment.
- Built **data infrastructure monitoring** solutions using **CloudWatch** and **Dynatrace** to track pipeline performance, latency, and data quality metrics; reduced incident resolution time by **40%** through proactive alerting and automated remediation on **Databricks Jobs**.
- Integrated financial services APIs and legacy ERP systems with **Databricks Lakehouse Platform** via **REST APIs** and **AWS Glue**; implemented **real-time processing** for payments, SWIFT messaging, and cross-border transaction flows supporting **SEPA, ISO 20022**, and regulatory compliance workflows.
- Managed infrastructure as code using **Terraform** to provision and scale **Databricks clusters, AWS S3** storage, and **Lambda** functions; automated CI/CD pipelines in **Git** and **Jenkins** for reproducible data deployments, reducing manual configuration overhead by **60%**.
- Demonstrated hands-on experience with **AI tools and LLM APIs** (Anthropic Claude) to enhance data engineering productivity; applied **prompt engineering** and **AI workflow orchestration** to automate schema inference, data lineage documentation, and transformation code generation, accelerating pipeline development by **35%**.

SKILLS

Data Engineering & Platforms – Databricks, Lakehouse Architecture, Delta Live Tables, Unity Catalog, Delta Lake.

ETL/ELT & Pipeline Development – Python, Spark, SQL, data modeling, real-time processing, Apache Glue, data quality controls.

Cloud & Infrastructure – AWS (S3, Glue, Lambda, CloudWatch), Terraform, infrastructure as code, resource management.

Data Governance & Security – IAM best practices, access control, data lineage, compliance frameworks, regulatory standards.

Development & Collaboration – Git, Jenkins, CI/CD pipelines, Agile/Scrum, Jira, code reviews, technical documentation.

Financial Services & Domain – Payments processing, SWIFT messaging (MT/MX), ISO 20022, SEPA, cross-border transactions, ERP integrations.

AI & Emerging Technologies – LLM APIs, prompt engineering, AI workflow automation, Claude (Anthropic SDK).

EDUCATION AND TRAINING

PROJECTS

Enterprise Centralized Data Platform – Payments & Reconciliation Pipeline (HCL Technologies)

- Designed and deployed end-to-end **Lakehouse data pipeline** on **Databricks** to ingest, transform, and serve **SWIFT messaging data** (MT/MX formats) and **ISO 20022 payment flows** from legacy banking systems into **Delta tables** for real-time analytics and reconciliation.
- Implemented **Delta Live Tables** for multi-stage data ingestion and quality validation; enforced **Unity Catalog** security policies and **IAM controls** to ensure regulatory compliance (GDPR, data protection) and audit-trail requirements across **100M+ daily transactions**.
- Optimized **Spark transformations** and **SQL queries** to reduce pipeline latency from **4 hours to 45 minutes**; built **AWS CloudWatch** dashboards and **real-time alerting** to monitor data quality, SLA adherence, and P1/P2 incident escalation for payments operations teams.

Ireland Jobs Tracker – AI-Powered Data Automation & Pipeline Orchestration (Personal Project)

- Built scalable **end-to-end data pipeline** orchestrating **Apify web scrapers** → **JD ingestion** → **Claude API (Anthropic)** transformations → **reportlab PDF generation** → **GitHub Actions CI/CD** → **Vercel deployment**; processed and enriched **500+ job descriptions** with AI-generated tailored resumes at scale.
- Engineered **prompt engineering** and constraint guardrails using **claude-haiku-4-5** to generate structured-JSON outputs with **99.5% formatting accuracy**; demonstrated hands-on expertise in **LLM API integration**, **AI workflow automation**, and data transformation pipelines.
- Implemented **Git** version control, **GitHub Actions** CI/CD automation, and **Vercel** cloud deployment; documented data flows, API contracts, and transformation logic, showcasing technical documentation and **DevOps practices** relevant to modern data engineering environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
