PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **responsive, modern user interfaces** using **TypeScript, Angular, and React** alongside **Node.js** and **NPM**, translating business requirements into functional web components with effective state management across 8+ enterprise applications, achieving **99.2% UI test coverage**.
- Built **maintainable, scalable server-side code** in **Java Spring Boot** and **.NET Core** using **Dependency Injection (DI)** and **Inversion of Control (IoC)** patterns, refactoring legacy monoliths into microservices and reducing technical debt by **40%** while managing data via **MySQL, PostgreSQL, and AWS**.
- Implemented **native application development** with **Swift, SwiftUI, and SwiftPM** package management, transitioning web logic to mobile constraints and leveraging **Core Data, UIKit, and Core frameworks** to deliver **3 iOS applications** supporting **50K+ daily active users**.
- Managed **Objective-C legacy code support** and **Android/Java environments** across production systems, conducting code reviews and mentoring junior developers on **Object-Oriented Programming (OOP)** and **software design patterns**, achieving **zero production incidents** related to legacy integration points.
- Orchestrated **Source Control Management (Git)** workflows, **Containerization via Docker**, and **CI/CD pipeline automation** using **Jenkins**, reducing deployment time by **65%** and enabling **daily production releases** across full-stack applications serving enterprise clients.
- Demonstrated exceptional **logical problem-solving and rapid context-switching** between backend logic, frontend interfaces, and mobile applications, articulating technical challenges clearly to cross-functional teams and mentoring peers on new technologies, resulting in **100% sprint velocity targets** and **zero blocked work items**.

SKILLS

Frontend Development – TypeScript, Angular, React, Node.js, NPM, responsive design, state management, component architecture.

Backend Development – Java Spring Boot, C# .NET Core, Kotlin, Dependency Injection, Inversion of Control, clean code, refactoring, design patterns.

Mobile Development – Swift, SwiftUI, SwiftPM, UIKit, Core Data, Core frameworks, iOS application lifecycle, native app development.

Databases & Cloud – MySQL, PostgreSQL, Oracle, AWS (EC2, S3, Lambda, CloudWatch), data persistence, schema design.

DevOps & Source Control – Git, Docker, Containerization, Jenkins, CI/CD pipelines, code review, Git branching strategies.

Core Competencies – Object-Oriented Programming (OOP), software design patterns, Objective-C legacy code support, Android/Java environments, Computer Science fundamentals, technical communication, full-stack development.

Tools & Platforms – Jira, Confluence, Linux, shell scripting, Splunk, Dynatrace, Agile/Scrum.

EDUCATION AND TRAINING

PROJECTS

Full-Stack Agricultural IoT Platform (HCL Technologies)

- Architected and developed a **cross-platform IoT dashboard** combining **TypeScript/React frontend**, **Java Spring Boot REST APIs**, and **Swift iOS native application** for real-time dairy farm monitoring, processing sensor telemetry from **2,000+ connected devices**.
- Implemented **responsive, modern user interfaces** in **React using Node.js and NPM** with real-time data visualization; built **scalable backend microservices** in **Java Spring Boot** applying **Dependency Injection and Inversion of Control patterns**, reducing API latency by **55%**.
- Delivered **native iOS application** in **Swift and SwiftUI** with **Core Data** persistence and **SwiftPM** dependency management, enabling **offline-first data synchronization** across **500+ farms**, supporting **12M monthly API requests**.
- Deployed entire stack on **AWS (EC2, S3, Lambda, CloudWatch)** with **Docker containerization** and **Jenkins CI/CD pipelines** implementing **Git branching strategies**, achieving **99.8% uptime SLA** and reducing deployment time from **4 hours to 45 minutes**.
- Maintained **Objective-C legacy code** in integration layer and supported **Android/Java backend components**, refactoring **20% of codebase** to modern **OOP principles and design patterns**, improving code maintainability score by **62%**.

Real-Time Payments Operations Dashboard – SWIFT MT/MX Processing (HCL Technologies)

- Built enterprise **monitoring and alerting system** for SWIFT payments processing, translating **ISO 20022 message flows** into **responsive, modern dashboards** using **React and TypeScript**, providing real-time transaction-flow visibility across **50,000+ daily payment messages**.
- Engineered **scalable Java Spring Boot backend** using **Dependency Injection patterns** to normalize **SWIFT MT/MX message formats**, **SEPA / cross-border payment workflows**, and **PSD2 compliance rules**, reducing message reconciliation time by **70%**.
- Implemented **Docker containerization** and **AWS (Lambda, CloudWatch, S3)** infrastructure with **Jenkins CI/CD pipelines** supporting **Git-based deployment workflows**, enabling **regulatory audit trails** and **GDPR data retention** compliance across **100+ production instances**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
