PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, implemented, and commissioned **electrical distribution systems** and **control panels** for production line upgrades across multi-site manufacturing environments; coordinated **electrical project lifecycles** from URS preparation through handover, ensuring **on-time and on-budget delivery**.
- Supported **industrial electrical systems** and **automation-related projects** by applying company **project management procedures and SOPs**; managed contractor coordination and **site supervision** during installation and commissioning phases, achieving **100% safety compliance** across all electrical work.
- Prepared **User Requirement Specifications (URS)**, **tender documentation**, and **technical evaluations** for electrical and building services projects; conducted **verification and commissioning** of electrical systems and performed **technical handover** to site engineering and production teams.
- Developed and tracked **project budgets and timelines** using **MS Project** and **MS Office**; created **AutoCAD electrical design documentation** and schematic layouts for production utilities and control system upgrades across beef and lamb processing facilities.
- Provided **technical electrical support** to production, maintenance, and site engineering teams on **motors, drives, instrumentation, and electrical distribution systems**; led troubleshooting and continuous improvement initiatives focused on **energy efficiency** and operational reliability.
- Collaborated cross-functionally with production operations, maintenance engineers, and external contractors to coordinate **multi-disciplinary engineering projects** including **building services, utilities upgrades, and production line installations**; demonstrated strong **communication, organisational, and problem-solving skills** in fast-paced food processing manufacturing environments.

SKILLS

Electrical Engineering & Industrial Systems – electrical distribution systems, control panels, motors, drives, instrumentation, commissioning and handover.

Project Engineering & Management – project design and implementation, User Requirement Specifications (URS), tender documentation, technical evaluation, budget and timeline tracking, contractor management, site supervision.

Electrical Design & Documentation – AutoCAD electrical design software, electrical schematics, building services design, production line technical drawings.

Project Management Tools – MS Project, MS Office (Word, Excel, PowerPoint), Jira, Confluence.

Manufacturing & Safety Systems – Health and Safety legislation, safe systems of work, multi-site production facility coordination, energy-efficiency projects, continuous improvement.

Professional Competencies – communication, organisational skills, problem-solving, technical support, cross-functional collaboration, fast-paced manufacturing environments.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Production Line Electrical Upgrade & Automation Systems Project (HCL Technologies – Manufacturing & Industrial Support)

- Designed and coordinated implementation of **electrical distribution systems** and **control panel upgrades** for a multi-site beef and lamb processing facility's production line modernisation; prepared **User Requirement Specifications (URS)** and **technical tender documentation** for electrical equipment procurement.
- Managed **site supervision** and contractor coordination across installation and **commissioning phases**; conducted **verification testing** of **motors, drives, and instrumentation** systems to ensure compliance with safety standards and operational requirements.
- Developed **AutoCAD electrical design documentation** and schematic layouts for control systems; tracked **project budgets and timelines** using **MS Project** and delivered technical **handover to production and maintenance teams**, enabling **100% on-time project completion**.

Building Services & Utilities Infrastructure Engineering (HCL Technologies – Enterprise Systems & Operations)

- Supported **multi-disciplinary engineering projects** focused on building services and utilities upgrades across manufacturing facilities; applied company **project management procedures and SOPs** to ensure safe, compliant, and timely project delivery.
- Collaborated with production operations teams and external contractors to coordinate electrical elements across multiple production sites; provided **technical electrical support** on system design, **energy-efficiency initiatives**, and continuous improvement recommendations.
- Prepared technical documentation including **tender evaluations**, installation specifications, and **commissioning checklists**; conducted post-handover support and troubleshooting of **electrical distribution systems**, ensuring sustained operational reliability and **Health and Safety compliance**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
