PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and deployed **autonomous AI agents** for inbound qualification and outbound engagement workflows using **n8n, Claude Code, and GitHub**, reducing manual SDR qualification time by **40%** and improving lead-to-opportunity conversion by **18%** across revenue teams.
- Operated and improved live **GTM automation workflows** in production, monitoring agent performance via **Splunk and CloudWatch**, iterating on execution quality, and reducing workflow failure rate from **12% to 2%** through continuous optimization and data-driven debugging.
- Drove **end-to-end AI tool adoption** across Sales, SDR, and Marketing teams by building comprehensive training materials, SOPs, and playbooks in **Confluence**, achieving **92% team adoption** and **35% productivity improvement** in first 90 days post-launch.
- Contributed to **revenue tech stack performance** by diagnosing and resolving integration gaps across **Salesforce, Outreach, and LISN** using **REST APIs and SQL**, flagging **14 critical performance bottlenecks** and collaborating with platform teams to eliminate **6-hour daily data sync delays**.
- Partnered with GTM teams to translate workflow pain points into **AI-powered automation opportunities**, delivering **8 production agents** that measurably improved productivity metrics: **25% faster inbound response**, **30% increase in outreach volume**, and **\$2.1M incremental pipeline** in 6 months.
- Designed scalable, documented **AI workflows and automation processes** using **AI Studio, n8n, and GitHub**, ensuring systems operated independently of single-person dependencies; supported **funnel diagnostics** through **SQL-based pipeline analysis**, surfacing **3 conversion bottlenecks** that drove **\$900K additional ARR** when addressed.

SKILLS

AI & Automation Platforms – Claude Code, n8n, AI Studio, autonomous agents, workflow orchestration.

Revenue Technology Stack – Salesforce, Outreach, LISN, CRM integrations, sales ops platforms.

Backend & Integration – Python, Java Spring Boot, REST APIs, SQL (PostgreSQL, MySQL, Oracle), system integrations.

DevOps & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines.

Monitoring & Operations – Splunk, CloudWatch, Dynatrace, production support, incident response, SLA management.

Process & Documentation – Confluence, Jira, SOPs, playbooks, change management, Agile/Scrum.

Data & Analytics – SQL pipeline analysis, funnel diagnostics, data-driven optimization, Power BI dashboards.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

AI-Powered GTM Automation Engine – Multi-Workflow Revenue Orchestration (HCL Technologies)

- Architected and deployed an integrated **AI agent ecosystem** across inbound qualification, outbound engagement, and lead nurturing workflows using **Claude Code, n8n, and AI Studio**, replacing manual processes that consumed **320 SDR hours/month**.
- Built **4 autonomous agents** for critical GTM motions: inbound lead classifier (scoring **2,400 leads/week** with **89% accuracy**), outbound email personalizer (generating **1,200 personalized outreach sequences/day**), meeting scheduler (auto-booking **180 demos/month**), and pipeline analyzer (surfacing deal-risk signals **7 days earlier** than manual review).
- Implemented **end-to-end monitoring and observability** using **CloudWatch + Splunk dashboards** tracking agent success rates, latency, and cost; reduced workflow failure rate from **11% to 1.5%** and improved average agent execution time by **42%** through iterative debugging and prompt optimization.
- Engineered **Salesforce and Outreach integrations** via **REST APIs and SQL pipelines** to sync agent outputs in real-time; eliminated **4-hour daily manual data reconciliation** and enabled **360-degree activity tracking** across CRM, email, and calendar systems.
- Led change-management rollout including training decks, video walkthroughs, and playbooks in **Confluence**; achieved **94% user adoption** within 60 days and captured qualitative feedback that informed **3 major feature iterations** improving agent relevance by **27%**.
- Delivered measurable business impact: **\$3.8M incremental pipeline**, **38% reduction in SDR qualification workload**, **52% faster average sales cycle**, and **25% improvement in conversion rate** from MQL to SQL in first full quarter.

SWIFT Payments Operations & Compliance Monitoring Dashboard (HCL Technologies)

- Supported and optimized production **SWIFT messaging dashboard** for global banking client, delivering real-time transaction-flow visibility for **45,000+ payment messages/day** across **SEPA, cross-border, and instant payment** channels using **AWS CloudWatch and Splunk**.
- Implemented **ISO 20022 message flow parsing and validation** logic in **Java Spring Boot REST APIs**, ensuring **100% regulatory audit trail compliance** and **GDPR data-protection controls**; reduced message validation errors from **0.8% to 0.02%** via automated pre-flight checks.
- Collaborated with banking-domain BAs and operations teams to translate **PSD2 compliance requirements** and **Open Banking payment standards** into production monitoring alerts; built **18 custom SLA dashboards** covering payment latency, settlement success, and regulatory reporting KPIs.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
