PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **Python**-based microservices and REST APIs for enterprise storage platforms, leveraging **Flask** and **FastAPI** frameworks across the full software development lifecycle from architecture to continuous delivery and production maintenance, reducing feature deployment cycle time by **30%**.
- Developed and maintained comprehensive technical documentation and architectural designs for storage platform capabilities; created detailed implementation guides and API contracts using **Git** version control and **Confluence** knowledge bases to enable team collaboration and onboarding across **Scrum**-based engineering organization.
- Engineered low-level systems integration work including Linux kernel module debugging, container orchestration via **Docker**, boot-sequence optimization, and network device driver troubleshooting; conducted discovery tasks and proof-of-concept implementations for modern networking solutions including ethernet and infiniband connectivity.
- Implemented company standards and security practices through **Jenkins** CI/CD pipeline automation, code review governance, and change-control management; established **Linux** system hardening practices, vulnerability scanning, and compliance verification across storage infrastructure deployments supporting **15+** critical production systems.
- Executed analytical debugging and problem-solving across complex storage subsystems using **Linux** diagnostic tools, kernel tracing, and performance profiling; identified and resolved **40+** P1/P2 incidents in production storage environments, achieving **99.8%** uptime SLA through root-cause analysis and preventive architecture improvements.
- Demonstrated self-driven ownership of tasks from design through implementation; contributed to storage systems architecture decisions, capacity planning workflows, and data flow optimization across multi-component platforms; collaborated with cross-functional teams in Agile ceremonies to translate business requirements into technical specifications and scalable engineering solutions.

SKILLS

Programming Languages & Core Technologies – Python, C, Java, SQL, Linux kernel, Linux drivers, containers, early boot.

Storage & Infrastructure – Storage systems architecture, storage platforms, networking (ethernet, infiniband), system integration, capacity planning.

Development Practices & Tools – CI/CD (Jenkins), Git, Docker, REST APIs, Spring Boot, technical design documentation, full software development lifecycle, Scrum, Agile.

Debugging & Performance Analysis – Analytical problem-solving, debugging, performance profiling, kernel tracing, Linux diagnostic tools, root-cause analysis.

Enterprise & Reliability Engineering – Production support, monitoring, incident response (P1/P2), SLA management, change-control, security standards, compliance implementation.

Data & Reporting – Data modeling, ETL, SQL (PostgreSQL, MySQL, Oracle), Power BI, Tableau, data warehousing.

Cloud & Deployment – AWS (EC2, S3, Lambda, CloudWatch), deployment automation, system hardening, vulnerability management.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

ObjectScale High-Performance Storage Kernel Integration Platform (HCL Technologies)

- Architected and implemented a **Python**-based storage platform abstraction layer exposing low-level **Linux kernel** and **driver** capabilities via REST APIs, enabling unified access to modern networking subsystems (ethernet, infiniband) and container-based deployment targets; reduced infrastructure setup time by **45%** and improved cross-team integration velocity.
- Designed comprehensive technical documentation suite covering kernel module interfaces, boot-sequence optimization procedures, and networking configuration workflows; created executable proof-of-concept implementations demonstrating storage platform compatibility with emerging networking topologies, accelerating architecture decisions by **3 quarters**.
- Established **Jenkins**-based continuous delivery pipeline with automated kernel compliance testing, **Docker** containerization validation, and security scanning gates; implemented company security standards across **12+ storage subsystems**, reducing vulnerability-to-remediation mean time from **6 weeks to 5 days**.
- Executed detailed debugging and performance profiling of storage I/O pathways using **Linux** kernel tracing tools and custom diagnostic utilities; resolved critical memory allocation bottlenecks affecting networking driver throughput, improving storage platform aggregate bandwidth by **28%** and reducing P1 incident frequency by **60%**.
- Led discovery and proof-of-concept work for modern networking protocol integration; authored technical specifications, conducted hands-on testing across ethernet and infiniband infrastructures, and validated platform readiness for next-generation storage deployments serving **Fortune 500** data-intensive customers.

SWIFT Payments Operations Dashboard & ISO 20022 Migration Support (HCL Technologies)

- Built production support and monitoring infrastructure for SWIFT messaging dashboard using **Splunk** and **CloudWatch**, tracking **10,000+** daily payment messages with real-time alerting for transaction-flow anomalies; achieved **99.9%** SLA compliance through proactive P1/P2 incident response and SEPA / cross-border payments regulatory validation.
- Designed **SQL** (PostgreSQL, Oracle) data models for payment reconciliation workflows and ISO 20022 message structure validation; created Power BI dashboards visualizing transaction audit trails, GDPR data-protection compliance flags, and operational KPIs for banking-domain stakeholders and regulators.
- Collaborated with cross-functional banking operations teams and business analysts on change-control procedures for PSD2 / Open Banking feature rollouts; coordinated UAT sign-offs, post-implementation triage, and compliance documentation across interconnected ERP and payments-processing systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
