PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed manual and exploratory testing for consumer-facing enterprise applications serving 500K+ concurrent users; designed and maintained **test cases** covering feature development, regression testing, and smoke testing with **98% pass-rate accuracy** across release cycles.
- Performed **defect reporting and investigation support** with software engineers across Java Spring Boot and .NET services; documented test results in **Jira**, prioritized P1/P2 issues, and coordinated resolution workflows ensuring **SLA compliance** for production stability.
- Validated application reliability through **Windows-based desktop application testing** and cross-platform compatibility checks; identified **15+ critical bugs** pre-release that prevented customer-facing outages and improved application stability by **22%**.
- Built test documentation and contributed to continuous improvement of **test coverage** using structured test plans; maintained organized test repositories in **Confluence** and collaborated with QA and engineering teams on shared ownership of quality standards.
- Supported release validation workflows using **CI/CD pipelines** and **Git**-based version control; executed structured **regression testing** activities across application builds and participated in post-release triage with cross-functional stakeholders.
- Demonstrated technical depth in **Python** scripting for test data generation and automation support; applied **bug tracking tools** expertise and collaborative communication skills to resolve defects and coordinate quality initiatives across distributed engineering teams.

SKILLS

Quality Assurance & Testing – manual software testing, exploratory testing, test case design and execution, defect reporting, regression testing, smoke testing, test documentation, test coverage optimization.

Testing Tools & Platforms – Jira, bug tracking systems, CI/CD pipelines, Jenkins, Git.

Windows & Desktop Application Testing – Windows-based application validation, cross-platform compatibility testing, client-side application quality assurance.

Test Automation & Scripting – Python, test data generation, automation scripting, shell scripting.

Software Engineering & Collaboration – release validation workflows, SLA management, incident response coordination, cross-functional team collaboration, Agile/Scrum ceremonies.

Enterprise Systems & Domains – consumer-facing applications, enterprise software quality, financial services systems, production support, application stability.

Technical Foundation – Java Spring Boot, REST APIs, SQL, AWS, Docker, Linux, data analysis fundamentals.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Payments Operations Dashboard – Quality Assurance & Release Validation (HCL Technologies)

- Executed comprehensive manual and exploratory testing for a consumer-facing SWIFT messaging and payments-operations dashboard supporting a major banking client; designed **test cases** validating transaction-flow visibility, operational alerting, and payment message processing across production environments.
- Performed **regression testing** and **smoke testing** across application releases; identified and reported **25+ defects** with clear documentation and collaborated with software engineers on root-cause investigation and resolution, ensuring **99.5% uptime** SLA compliance.
- Contributed to **release validation** workflows and UAT coordination; documented test results and maintained **test documentation** in structured formats; participated in post-implementation triage and cross-functional quality meetings with banking-domain BAs and operations teams to ensure regulatory compliance and audit-trail integrity.

Enterprise Application Monitoring & Stability Program (HCL Technologies)

- Supported quality and stability of production enterprise Java/.NET applications by executing structured **test plans** and monitoring application behavior across **Windows-based desktop** and web-based client interfaces; validated feature work, bug fixes, and system integrations against business requirements.
- Collaborated with software engineering teams on **defect investigation** and resolution; used **Jira** for organized **defect tracking**, prioritized issues by severity, and coordinated handoffs to developers, reducing mean-time-to-resolution by **18%**.
- Applied **Python** scripting to automate test data generation and **CI/CD** validation tasks; maintained continuous improvement of **test coverage** through documentation in **Confluence** and collaborative knowledge-sharing with QA team members on testing best practices and application quality standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
