PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **agentic workflows** integrating **Claude API** (Anthropic SDK) with **structured JSON prompt engineering** and function calling patterns; orchestrated end-to-end LLM-driven automation pipelines reducing manual resume generation overhead by **85%**.
- Built user-facing features in **React** and **Angular** with **Node.js** and **Python** backends for agent integration; developed reusable UI components for agent invocation, status visualization, and error handling across payment-operations and ERP dashboards serving **50+ internal stakeholders**.
- Implemented **prompt engineering**, **tool schemas**, and **retrieval strategies** for agentic reliability; managed **context windows** and **memory** patterns for multi-turn LLM interactions, achieving **98% agent execution success rate** in production workflows.
- Developed **REST API** integrations with **OpenAI specifications** (tool definitions, function schemas) and **GitHub Actions** CI/CD pipelines; deployed **GitHub automation workflows** and **Claude model endpoints** via **Vercel**, supporting developer ecosystem integration with **zero-downtime deployments**.
- Shipped high-quality code with **unit and e2e tests** (Jest, Cypress), **CI/CD automation** (GitHub Actions, Jenkins), and **observability instrumentation** (CloudWatch, Dynatrace logs and metrics); documented **OpenAI/MCP spec contracts** and developer guides for internal platform consumers.
- Integrated **agentic agents** with **input validation**, **secrets management**, and **rate limiting** guardrails; applied **prompt versioning** and **evaluation patterns** for LLM output consistency; reduced P1 incident response time by **40%** through automated agent-driven triage and alerting.

SKILLS

AI/LLM Agent Engineering – LLM agentic workflows, Claude API, OpenAI API, MCP (Model Context Protocol), prompt engineering, function calling, tool schemas, context window management, memory patterns, guardrails, input validation, secrets management, rate limiting, prompt versioning, evaluation, golden sets.

Frontend Development – React, AngularJS, Angular, TypeScript, JavaScript, REST APIs, GraphQL, reusable UI components, design systems, accessibility (WCAG), Jest, Cypress, linting.

Backend & Agent Integration – Node.js, Python, FastAPI, Flask, REST API design, OpenAI specifications, function orchestration, tool invocation patterns, error handling, retry logic.

DevOps, CI/CD & Observability – GitHub Actions, Jenkins pipelines, CI/CD automation, Vercel deployment, CloudWatch, Dynatrace, OpenTelemetry, logging, metrics, traces, observability instrumentation.

Data Engineering & RAG – RAG pipelines, embeddings, vector stores, pandas, NumPy, scikit-learn, SQL (PostgreSQL, MySQL, Oracle), data retrieval strategies, semantic search.

Version Control & Infrastructure – Git, GitHub APIs, Docker, containerization, Linux, shell scripting.

Domain & Compliance – payments processing, SWIFT messaging (MT/MX), ISO 20022, SEPA, OpenBanking/PSD2, ERP integration, change-control management, GDPR, data protection, audit trails, regulatory compliance.

EDUCATION AND TRAINING

PROJECTS

Ireland Jobs Tracker – AI-Powered Resume Generation at Scale (Personal Project)

- Architected end-to-end **agentic workflow** integrating **Claude API** (claude-haiku-4-5) with **structured JSON prompt engineering** and **constraint guardrails** to generate job-description-tailored resumes; orchestrated multi-stage pipeline: **Apify web scrapers** → job-description ingestion → **LLM function calling** → **reportlab PDF generation** → deployment.
- Implemented **prompt engineering** with dynamic tool schemas and **context management** for LLM-driven content personalization; achieved **92% relevance accuracy** on generated resume sections against target job specifications.
- Deployed scalable infrastructure with **GitHub Actions CI/CD**, **Vercel hosting**, and **observability logging**; automated testing and validation pipelines reduced manual QA overhead by **75%** and enabled continuous deployment of LLM-generated artifacts.
- Documented **API schemas**, **prompt design patterns**, and **LLM integration architecture** for future maintainers; open-sourced on GitHub with complete onboarding guides for prompt versioning and A/B evaluation methodologies.

SWIFT Payments Dashboard & Agent-Driven Incident Automation (HCL Technologies)

- Built **React**-based dashboard for **payment-operations monitoring** integrating **SWIFT message flows** (MT/MX standards) and **ISO 20022** transaction visibility; implemented real-time **agent-assisted alerting** using **Claude API** to auto-classify **P1/P2 incidents** and generate remediation workflows, reducing manual triage time by **40%**.
- Designed **agentic tool schemas** for payment-system state queries, message retrieval, and **reconciliation workflow** orchestration; integrated **REST APIs** across **PostgreSQL**, **MySQL**, and **Oracle** databases for cross-system data consistency checks and **audit trail** generation.
- Implemented **prompt engineering** for context-aware agent responses in regulated financial environments; applied **input validation** and **role-based access control** guardrails to enforce **GDPR** and **PSD2 compliance** on agent-generated incident summaries and payment-instruction modifications.
- Deployed dashboard with **CloudWatch** and **Dynatrace observability** instrumentation; captured agent execution logs, metrics, and **traces** for SLA tracking and regulatory audit; coordinated **UAT** with banking-domain business analysts and operations teams to validate agent-driven workflows against **change-control management** policies.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
