PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built **secure Microsoft-based infrastructure solutions** supporting enterprise banking operations at HCL Technologies, implementing **Windows Server 2019/2022** configurations, **Active Directory** management, and **Group Policy** controls across mission-critical payment systems serving 24x7 operational environments with **99.9% uptime SLA compliance**.
- Managed **vulnerability remediation and security patching** processes for production SWIFT messaging and payments-operations infrastructure, coordinating **change-control** procedures with cross-functional security and operations teams to ensure audit trails, regulatory compliance (GDPR, PSD2), and zero-downtime deployments across interconnected enterprise systems.
- Implemented **high-availability and disaster recovery solutions** for critical banking payment workflows, developing and testing **fail-over and resilience strategies** using **AWS** (EC2, S3, Lambda, CloudWatch) and **Docker** containerisation to guarantee service continuity and SLA adherence in high-availability, mission-critical environments.
- Produced high-quality technical documentation and operational runbooks supporting financial-services audits and compliance requirements, including **ISO 20022 message flows**, **SEPA** payment procedures, and reconciliation workflows for banking regulators and internal stakeholder sign-off.
- Performed system administration and escalation support for complex technical issues across enterprise Java/.NET applications and ERP integrations, troubleshooting production incidents, optimising **Linux** system performance via shell scripting and log analysis, and mentoring junior support staff on infrastructure best practices and incident response protocols.
- Recommended and implemented improvements to operational processes using **Python** automation scripts, **REST APIs** for system integrations, and **Jenkins** CI/CD pipelines, reducing manual operational overhead by **30%** and enhancing infrastructure reliability across mission-critical banking and ERP domains.

SKILLS

Microsoft Infrastructure & Security – Windows Server 2019/2022/2025, Active Directory, Group Policy, Windows 11 client environments, vulnerability management, security patching, high-availability architecture, disaster recovery design.

Cloud & Virtualisation – AWS (EC2, S3, Lambda, CloudWatch), Docker containerisation, VMware fundamentals, storage technologies.

Operating Systems & Networking – Linux (RedHat/OEL), shell scripting, network concepts, system troubleshooting, log analysis, cron job automation.

IT Operations & ITIL – 24x7 operational environments, SLA management, change-control management, incident escalation, system health monitoring, ITIL process alignment.

Automation & Integration – Python scripting, REST APIs, Jenkins CI/CD pipelines, Git version control, system integrations, ETL/data pipeline automation.

Finance & Compliance Domain – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2 regulations, GDPR compliance, audit trail management.

Business Intelligence & Documentation – Power BI dashboards, operational reporting, compliance documentation, technical runbooks, audit-ready system documentation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Secure Enterprise Banking Infrastructure – SWIFT Payments Dashboard (HCL Technologies)

- Designed and deployed **secure Microsoft infrastructure** supporting a tier-1 banking client's SWIFT messaging and payments-operations platform, implementing **Windows Server** hardening, **Active Directory** role-based access controls, and **Group Policy** enforcement to align with financial-services security standards.
- Managed **vulnerability remediation and security patching** cycles with **zero-downtime deployments**, coordinating **change-control procedures** across development, UAT, and production environments to maintain **99.9% SLA compliance** and regulatory audit readiness.
- Implemented **high-availability and disaster recovery strategies** using **AWS CloudWatch** monitoring and **Docker**-based failover containers, testing resilience procedures quarterly and documenting **ISO 20022** compliance workflows and **SEPA** payment-processing runbooks for banking regulators and internal stakeholders.

Enterprise ERP Systems Integration & Infrastructure Automation (HCL Technologies)

- Performed system administration and escalation support for enterprise ERP and business-system integrations, troubleshooting production incidents across **Linux** and **Windows Server** infrastructure and optimising performance via **Python** automation scripts and **shell scripting**.
- Recommended and implemented operational improvements using **Python** for ETL automation, **REST APIs** for cross-system data flows, and **Jenkins** CI/CD pipeline orchestration, reducing manual helpdesk tickets by **30%** and improving change-deployment velocity across interconnected ERP systems.
- Produced comprehensive technical documentation supporting **ITIL**-aligned change-management procedures, system runbooks, and compliance audits for financial and regulatory stakeholders, mentoring junior support engineers on incident response and infrastructure resilience best practices.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
