PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **full-stack applications** using **Python** (Flask/FastAPI backend) and **React.js** (frontend) to support enterprise operational dashboards, delivering **real-time features for agent monitoring, logging, and performance tracking** across **AWS infrastructure (EC2, S3, Lambda, CloudWatch)** with **99.2% uptime** SLA compliance.
- Developed **APIs and microservices** using **Java Spring Boot** and **REST APIs** to enable data exchange and system integrations across **enterprise business systems and ERP modules**, implementing **CI/CD pipelines via Jenkins** and **Git branching workflows** for **agile delivery** across iterative sprints with zero regression in production deployments.
- Troubleshoot and resolved technical issues across the **full stack** (backend Python/Java, frontend React, databases PostgreSQL/MySQL/Oracle, AWS services) by conducting **log analysis on Linux systems**, utilizing **Splunk, CloudWatch, and Dynatrace** for debugging and performance optimization, reducing mean-time-to-resolution by **40%** for P1/P2 incidents.
- Implemented **containerization using Docker** for application deployment consistency and wrote **clean, maintainable, and efficient code** adhering to **security and data protection best practices** including GDPR compliance and audit-trail requirements, conducting **code reviews** and mentoring junior developers on design patterns and fundamental computer science concepts.
- Collaborated with **product managers, designers, and cross-functional engineering teams** across multiple geographies in an agile environment, supporting **UAT coordination and post-implementation triage** while translating stakeholder requirements into technical specifications and high-quality production solutions.
- Leveraged **AI tools and exploratory data analysis techniques** to identify optimization opportunities across the software development lifecycle, applying **machine learning fundamentals and statistical analysis** using **Python (pandas, NumPy, scikit-learn)** to improve code quality, system performance, and engineering efficiency by **35%**.

SKILLS

Full-Stack Development – Python (Flask, FastAPI), Java (Spring Boot), React.js, REST APIs, microservices architecture.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, CI/CD (Jenkins, Git), agile delivery methodology.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, data pipelines, ETL workflows, data modelling.

Monitoring & Reliability – Splunk, CloudWatch, Dynatrace, production support, incident management, SLA monitoring, P1/P2 incident response.

AI/ML & Analytics – LangChain, OpenAI API, machine learning fundamentals, scikit-learn, pandas, NumPy, statistical analysis, algorithms and design patterns.

Linux & Infrastructure – Linux log analysis, shell scripting, cron jobs, infrastructure basics.

Collaboration & Tools – Jira, Confluence, code reviews, stakeholder management, cross-functional team coordination.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

AI Agent Real-Time Monitoring & Analytics Platform (HCL Technologies)

- Architected and built a **full-stack AI agent monitoring platform** combining **Python (FastAPI) backend microservices** with a **React.js frontend dashboard** to deliver **real-time agent performance tracking, logging, and alerting** for distributed AI workflows running across **AWS Lambda and EC2 instances**.
- Integrated **LangChain and OpenAI API** libraries to power intelligent agent communication protocols, enabling dynamic data exchange between backend **REST APIs** and **containerized Docker services**, reducing agent latency by **45%** and supporting **500+ concurrent agent instances**.
- Implemented **real-time data ingestion pipeline** using **Python ETL workflows** to capture agent metrics (execution time, token usage, success rates) into **PostgreSQL data warehouse**, then surfaced insights via **interactive React dashboards with live performance visualizations** and **CloudWatch-based alerting**.
- Deployed the entire platform using **Docker containerization** and automated **CI/CD pipelines via Jenkins** with **Git version control**, achieving **99.5% production uptime** and enabling **zero-downtime deployments** across agile sprint cycles.
- Applied **machine learning models (scikit-learn)** to detect anomalies in agent behavior and predict performance bottlenecks with **87% accuracy**, enabling proactive optimization and reducing operational incident response time by **50%**.

Payments Processing Integration & SWIFT Message Flow Modernization (HCL Technologies)

- Redesigned and deployed a **full-stack SWIFT messaging and payments-operations dashboard** supporting a major banking client, combining **Java Spring Boot microservices APIs** with **Python data pipelines** and **React.js frontend** to provide **real-time transaction-flow visibility and operational alerting** for **ISO 20022 message formats (MT/MX)** and **SEPA cross-border payments**.
- Implemented **REST API integrations** across **PostgreSQL and Oracle databases** to consolidate payment reconciliation data, achieving **99.9% SLA compliance** for banking-grade production environments while ensuring **GDPR compliance, audit trails, and regulatory data protection** requirements.
- Coordinated **UAT support and post-implementation triage** with banking domain BAs and operations teams, managing **change-control workflows** and **system configuration updates** across interconnected ERP modules and payment processors, delivering **zero post-go-live critical defects**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
