PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **multi-agent workflows** using **Claude API** and **prompt engineering** to orchestrate end-to-end automation pipelines; engineered **system prompts**, **agent customization**, and structured JSON constraints achieving **95% output accuracy** across 500+ JD-tailored resume generations.
- Developed production **Python** and **Java Spring Boot** microservices with **TDD** and **CI/CD** best practices; integrated **REST APIs** across banking payment systems, reducing integration defects by **40%** and enabling real-time transaction visibility for **ISO 20022 message flows**.
- Built **agentic workflow orchestration** combining **Apify scrapers**, **Claude API ingestion**, and **reportlab PDF generation**; deployed via **GitHub Actions CI/CD** and **Vercel**, demonstrating hands-on **context engineering** and **LLM reasoning** optimization for large-scale data processing.
- Implemented **LLM context window management** strategies within multi-stage agent pipelines; evaluated **Claude-haiku-4-5** performance against **GPT-4** variants, reducing token consumption by **35%** while maintaining prompt evaluation accuracy and enabling cost-effective agentic scaling.
- Operated production monitoring dashboards using **Splunk**, **CloudWatch**, and **Dynatrace**; managed **P1/P2 incident response** and **SLA compliance** for financial-services workloads, implementing **Python automation scripts** that reduced MTTR by **50%** and **shell scripting** for operational alerting.
- Collaborated cross-functionally with domain architects and engineering teams to design **agent skill definitions** and **MCP** (Model Context Protocol) integrations; prototyped **LangGraph** and **CrewAI** workflows for experimental AI-driven developer tooling, validating prompt robustness through red-teaming and edge-case evaluation.

SKILLS

Languages & Frameworks – Python, Java, Node.js, Spring Boot, FastAPI, Flask, React, Angular.

AI & Agentic Systems – Multi-agent workflows, Claude API, LLM context engineering, system prompts, agent customization, agent skills, MCP, prompt engineering evaluation, red-teaming, LangGraph, CrewAI, AutoGen.

Software Engineering Practices – TDD, CI/CD, code reviews, Git workflows, Jenkins pipelines, GitHub Actions, design patterns, orchestrator/specialist patterns.

Data & Backend – SQL, PostgreSQL, MySQL, Oracle, ETL pipelines, data warehousing, pandas, NumPy, scikit-learn, REST API design and consumption.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, Linux, shell scripting, Vercel deployment.

Monitoring & Analytics – Splunk, Dynatrace, CloudWatch, Power BI, Tableau, data visualization, operational dashboards, real-time alerting.

Domain Expertise – Financial services, payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, SLA management, incident response, regulatory compliance, GDPR.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

AI-Driven Resume Generation Workflow (Ireland Jobs Tracker)

- Architected end-to-end **agentic workflow** integrating **Claude API** (haiku-4-5) with **Apify web scrapers**, **structured JSON prompt engineering**, and **reportlab PDF generation** to automate JD-tailored resume creation at scale.
- Implemented **context engineering techniques** including **system prompts**, **constraint guardrails**, and **LLM reasoning optimization** to deliver **95% accuracy** resume customization; evaluated token efficiency and **context window management** to reduce API costs by **35%**.
- Deployed production pipeline via **GitHub Actions CI/CD** and **Vercel**; integrated multi-stage **agent orchestration** enabling real-time prompt evaluation, red-teaming, and iterative LLM output refinement across 500+ concurrent job descriptions.

Multi-Agent Payment Operations Dashboard (HCL Technologies – Banking Domain)

- Developed **Python** and **Java Spring Boot** backend services supporting **ISO 20022 message flow** monitoring; engineered **REST API orchestration** across interconnected banking systems to provide real-time transaction visibility and **SLA-driven alerting**.
- Built operational **dashboards** using **Splunk**, **CloudWatch**, and **Dynatrace** enabling cross-functional teams to monitor **P1/P2 incident metrics**, **SWIFT messaging** throughput, and regulatory compliance events; reduced **MTTR by 50%** through automated escalation logic.
- Implemented **TDD** and **CI/CD pipelines** via **Jenkins** for payments infrastructure; collaborated with domain architects to design **agent skill definitions** for autonomous incident triage, demonstrating expertise in **LLM reasoning** application to financial-services reliability engineering.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
