PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Served as a business-facing data analytics partner to HR Business Partners, People Leadership Team, and senior leaders at HCL Technologies, translating complex workforce data into clear insights, narratives, and recommendations that informed organizational strategy and people decisions across **3,500+ employee populations**.
- Conducted ongoing workforce analysis, ad hoc analytics, and quarterly business reviews (QBRs) using **Power BI, Tableau, and SQL** to track organizational health metrics, attrition trends, hiring pipeline velocity, retention risks, and performance patterns across revenue-generating teams and Go-To-Market functions.
- Led data storytelling initiatives, translating people data across disparate systems—**Workday, ERP platforms, PostgreSQL, Oracle, and MySQL**—into executive dashboards and board-level narratives that tracked talent acquisition, sales-team retention, organizational effectiveness, and workforce mobility.
- Proactively partnered with People Operations, Talent Acquisition, and Total Rewards teams on strategic workforce areas including attrition analysis, hiring funnel optimization, performance benchmarking, org design, and retention strategy, using data to identify trends, risks, and opportunities across **Sales and GTM-aligned cohorts**.
- Built **data models** and **ETL pipelines** using **Python, pandas, and Power Query** to connect and standardize people data across interconnected HR and business systems, enabling standardized workforce reporting, proactive analytics, and data-driven decision-making for **40+ ad hoc leadership requests annually**.
- Demonstrated statistical rigor and analytical tenacity, applying **hypothesis testing, time-series analysis, regression modelling, and exploratory data analysis** to uncover workforce insights on compensation equity, hiring bias, team performance trends, and organizational redesign impact.

SKILLS

People Analytics & Workforce Data – workforce analysis, organizational health metrics, attrition analysis, hiring pipeline optimization, retention strategy, performance benchmarking, talent mobility, Go-To-Market analytics, QBR reporting.

Business Intelligence & Data Visualization – Power BI, Tableau, DAX, Power Query, data modelling, dashboard development, executive reporting, data storytelling.

Data Engineering & ETL – Python, pandas, NumPy, SQL (PostgreSQL, Oracle, MySQL), ETL pipelines, data warehousing, Workday data integration, HR system connectivity.

Statistical & Analytical Methods – hypothesis testing, time-series analysis, regression analysis, exploratory data analysis, A/B testing, statistical evaluation metrics.

Enterprise Systems & HR Technology – Workday, ERP platforms, business-system integrations, change-control management, data governance, compliance (GDPR).

Tools & Platforms – Git, Jira, Confluence, GitHub Actions, Vercel, R / RStudio.

Domain & Soft Skills – consultative advisory, cross-functional partnership, business acumen, requirements gathering, UAT coordination, executive communication, remote-first collaboration.

EDUCATION AND TRAINING

PROJECTS

Workforce Analytics & Organizational Health Dashboard (HCL Technologies)

- Designed and deployed a **Power BI** and **Tableau** integrated analytics platform connecting **Workday**, **PostgreSQL**, and ERP systems to deliver real-time people data insights on attrition, hiring velocity, retention rates, performance distribution, and organizational effectiveness across **3,500+ employee base**.
- Engineered **ETL pipelines** using **Python**, **pandas**, and **Power Query** to extract, transform, and standardize disparate HR and business-system data feeds; built **DAX measures** for cohort analysis, trend detection, and predictive workforce metrics.
- Delivered **40+ quarterly business reviews (QBRs)** and ad hoc strategic analyses to People Leadership Team, HRBPs, and senior business leaders, translating data storytelling into actionable recommendations on headcount strategy, Sales-team retention, compensation equity, and org design decisions.

Sales & Go-To-Market Workforce Analytics Program (HCL Technologies)

- Partnered with Sales leadership, GTM teams, and People Operations to build a dedicated **workforce analytics framework** tracking hiring pipeline, ramp time, quota attainment, retention patterns, and team composition across revenue-generating functions; delivered monthly insights and trend reports via **Power BI** dashboards.
- Conducted proactive **attrition analysis**, **performance benchmarking**, and **retention-risk modelling** using **statistical methods** and **time-series analysis** to identify flight risks, underperformance cohorts, and mobility opportunities; recommended data-driven interventions that improved Sales-team retention by informing targeted compensation and development strategies.
- Standardized people analytics across **HR business partner** workflows, creating reusable **data models**, **SQL queries**, and **Tableau templates** for consistent organizational health reporting, enabling scaled delivery of strategic insights to **15+ business unit leaders** without expanding team headcount.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
