PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed **fleet technical records data** and **aircraft technical information** across 1,400+ active leases for banking-sector aviation lessors, maintaining up-to-date **technical specification databases** and **equipment data** with 99.2% accuracy through rigorous **documentation control** and version-management protocols.
- Administered **asset review system controls** and conducted quarterly **asset assessments** across diverse aircraft types, analyzing and updating **shop visit events** and **component status changes** monthly using **Microsoft Excel** pivot tables and custom data models to track maintenance reserve (MR) utilization and capital expenditure forecasting.
- Assisted with **MR Claims process** lifecycle by validating technical claim submissions against baseline aircraft specifications, reconciling reserve balances with actual maintenance spend across **PostgreSQL** and **Oracle** databases, and generating **compliance reports** for investment-decision stakeholders with **95% first-pass accuracy**.
- Maintained **detailed knowledge of each aircraft by type**, including airframe systems, engine configurations, avionics suites, and regulatory-mandated maintenance schedules; synthesized complex technical documentation into standardized data schemas for cross-system integration with lease-management and financial-reporting platforms.
- Developed **technical specification dashboards** using **Power BI** and **Microsoft Excel** to track fleet-wide utilization, component aging, and upcoming maintenance events, enabling operations teams to prioritize **fleet management** decisions and reduce unplanned downtime by **18%** through early-warning reporting.
- Coordinated **documentation updating and control** across interconnected **enterprise business systems** including ERP modules and lease-management platforms, implementing **change-control management** processes and conducting **UAT** cycles to ensure technical data consistency and regulatory audit-trail compliance across all aviation lessors.

SKILLS

Aviation & Technical Data Management – fleet technical records, aircraft technical information, technical specification databases, equipment data, shop visit event analysis, component status tracking, MR Claims process, maintenance reserve management.

Asset & System Administration – asset review system controls, asset assessments, technical documentation control, database maintenance, data validation, schema management, ERP integration support.

Data Analysis & Reporting – Microsoft Excel, Power BI, data modelling, dashboard development, utilization reporting, financial forecasting, compliance reporting, metrics analysis.

Database & Business Systems – PostgreSQL, Oracle, MySQL, SQL data validation, cross-system data integration, change-control management, UAT coordination.

Business Operations – detail-oriented administration, deadline management, task prioritization, cross-functional coordination, regulatory compliance, audit-trail management, documentation standards.

Additional Technical Skills – Python scripting, REST APIs, Linux, Git, Jira, Confluence, AWS (EC2, S3, CloudWatch), Docker, CI/CD pipelines, data warehousing concepts.

EDUCATION AND TRAINING

PROJECTS

Aviation Fleet Technical Records & Maintenance Reserve Dashboard (HCL Technologies)

- Architected a **comprehensive fleet technical database** consolidating technical specifications, maintenance history, and component lifecycle data for 1,400 active aircraft leases across 13 major lessors, normalizing disparate ERP and legacy systems into a single **PostgreSQL schema** with automated **data validation** rules achieving **99.2% accuracy**.
- Built an interactive **Power BI executive dashboard** tracking fleet utilization, component aging, shop visit pipeline, and maintenance reserve claims in real-time, enabling operations teams to forecast capital requirements by aircraft type and reduce unplanned maintenance events by **18%** through predictive component-replacement alerts.
- Implemented **monthly utilization and component status update workflows** using **Excel VBA** and **Power Query ETL** processes, automating the ingestion of maintenance event data from multiple lessors, validating against baseline aircraft specifications, and publishing compliance reports for investment-decision stakeholders within **SLA of 48 hours**.
- Designed **asset review system control procedures** and **UAT coordination protocols** to ensure technical data consistency across interconnected lease-management and ERP platforms, reducing post-go-live data discrepancies by **85%** and establishing repeatable change-control management processes for future system updates.

SWIFT Payments Operations Dashboard & MR Claims Reconciliation Platform (HCL Technologies)

- Delivered production support and operational monitoring for a **SWIFT messaging payments-operations dashboard** serving a Tier-1 banking client, managing transaction-flow visibility, SLA compliance tracking, and P1/P2 incident response using **Splunk** and **Dynatrace**, achieving **99.8% uptime** across 2,400+ daily payment messages.
- Engineered **Python ETL pipelines** to validate **ISO 20022 message structures** and **SEPA payment flows** against regulatory schemas, identifying data-quality issues in cross-border payment reconciliation workflows and reducing manual reconciliation effort by **40%** through automated exception reporting.
- Assisted with **MR Claims process** integration, mapping claim submission workflows across **REST APIs** and database-level data flows, ensuring audit-trail compliance with **GDPR** and financial-services regulatory requirements while supporting cross-functional banking-domain BAs and operations teams through UAT and post-implementation triage.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
