PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **Java Spring Boot** microservices for healthcare enterprise applications, delivering **15+ production features** with **99.8% uptime SLA** through rigorous testing, code review, and CI/CD pipeline automation via **Jenkins** and **Git**.
- Managed end-to-end application support and incident response for mission-critical healthcare systems using **Splunk**, **CloudWatch**, and **Dynatrace** dashboards; resolved **P1/P2 incidents** within SLA targets and implemented **automated alerting rules** reducing MTTR by **40%**.
- Engineered **Python** data pipelines and **ETL workflows** for healthcare data integration, processing **500K+ daily records** across **PostgreSQL**, **MySQL**, and **Oracle** databases; built **Power BI dashboards** for operational reporting and regulatory compliance visibility.
- Implemented **REST API integrations** connecting enterprise healthcare systems and ERP modules; coordinated cross-system data flows, managed **change-control processes**, and performed **UAT coordination** and post-go-live support across interconnected hospital and clinic infrastructure.
- Developed **Linux shell scripts** and **scheduled cron jobs** for automated healthcare data validation, system monitoring, and log analysis; reduced manual operational overhead by **35%** and improved data accuracy through constraint-based integrity checks.
- Containerized legacy healthcare applications using **Docker**; provisioned cloud infrastructure on **AWS (EC2, S3, Lambda, CloudWatch)** for HIPAA-aligned secure deployment; implemented **Infrastructure as Code** principles for reproducible healthcare system environments.

SKILLS

Backend Development & Languages – Java, Spring Boot, REST APIs, Python, SQL.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, ETL pipelines, data warehousing, SQL query optimization.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD, Git version control, Infrastructure as Code.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch dashboards, SLA management, incident response, alerting rules.

Business Intelligence & Reporting – Power BI, Tableau, DAX measures, data modelling, operational dashboards, regulatory reporting.

Enterprise Systems & Healthcare IT – ERP integration, change-control management, HIPAA compliance, system interconnectivity, UAT coordination, healthcare data standards.

Agile & Collaboration – Jira, Confluence, Scrum ceremonies, cross-functional team leadership, code review, Agile sprint delivery.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Healthcare Payments & Operations Dashboard (HCL Technologies)

- Built and maintained production-grade **Java Spring Boot** dashboard platform supporting enterprise healthcare payments processing, SWIFT messaging flows, and financial transaction visibility for **15+ hospital and clinic endpoints**.
- Designed **real-time monitoring dashboards** using **Splunk** and **Dynatrace** to track payment message flows, transaction reconciliation, and operational SLA compliance; implemented **automated alerting** for **P1/P2 incidents**, achieving **99.8% system availability**.
- Engineered **PostgreSQL** and **Oracle** queries for healthcare transaction audit trails, regulatory compliance reporting (HIPAA / data protection), and cross-system data reconciliation; created **Power BI operational dashboards** for finance and operations teams.
- Orchestrated **REST API integrations** between healthcare payment systems and ERP modules; managed **change-control processes**, **UAT coordination**, and post-implementation support across interconnected enterprise infrastructure; reduced integration defects by **30%** through automated validation.

Automated Healthcare Data Pipeline & Compliance Reporting System (HCL Technologies & MSc Data Analytics)

- Architected end-to-end **Python ETL pipeline** processing **500K+ daily healthcare records** from multiple hospital systems (PostgreSQL, MySQL, Oracle); implemented **data validation constraints** and automated reconciliation logic reducing manual verification time by **45%**.
- Deployed **Power BI data warehouse** with **DAX measures** and advanced **data modelling** for regulatory compliance dashboards (HIPAA audit trails, patient data protection); published **automated reports** to **50+ healthcare administrators** via scheduled refresh.
- Built **AWS Lambda** functions and **CloudWatch Events** for serverless healthcare data ingestion and validation; containerized pipeline components using **Docker** and orchestrated via **Jenkins CI/CD**, enabling **daily deployment cadence** with **zero compliance violations**.
- Applied **statistical analysis and hypothesis testing** (R / RStudio) to identify data quality anomalies and healthcare operational trends; communicated findings to clinical and administrative stakeholders through **interactive Tableau dashboards** and executive summary reports.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
