PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected scalable **React** and **TypeScript** user interfaces with modern state management, delivering high-performance frontend components for enterprise SaaS platforms serving 50K+ concurrent users; implemented **Tailwind CSS** and **shadcn/ui** component libraries to accelerate development velocity by **40%** while maintaining design consistency across 12+ customer-facing applications.
- Developed and maintained **Node.js RESTful APIs** using **Express** and **NestJS** frameworks, implementing **OpenAPI/Swagger** documentation standards for robust API contracts; optimized API response latency by **35%** through query optimization and caching strategies, supporting 500K daily requests across interconnected microservices.
- Drove technical excellence through **Test-Driven Development (TDD)** using **Testing Library** and **Jest**, achieving **87% code coverage** and reducing production defects by **60%**; conducted peer code reviews ensuring adherence to quality standards and fostering a culture of clean, maintainable code across 8-person engineering team.
- Integrated **AI-driven features** into frontend applications, connecting **React** components with LLM services to enhance customer journey workflows; built intelligent chatbot interface reducing customer support ticket volume by **32%** and improving user satisfaction scores from **3.8 to 4.6/5.0**.
- Deployed containerized full-stack applications using **Docker** and **CI/CD pipelines** via **Jenkins** and **Git**; orchestrated **Google Cloud Platform (GCP)** infrastructure with automated testing and deployment gates, reducing time-to-production by **50%** and enabling 15+ production releases per sprint.
- Collaborated on backend **Node.js services** and **RESTful API integrations** with frontend requirements, translating business logic into efficient data flows; partnered with product and design teams on full-stack feature delivery for eSIM provisioning and connectivity workflows, shipping 8 major features in 6 months with zero critical production incidents.

SKILLS

Frontend Development – React, TypeScript, Tailwind CSS, shadcn/ui, state management, component architecture, performance optimization.

Backend Development – Node.js, Express, NestJS, RESTful APIs, OpenAPI/Swagger, API design, microservices.

Testing & Quality Assurance – Test-Driven Development (TDD), Testing Library, Jest, code coverage, peer code review.

AI Integration – LLM integration, AI-driven workflows, intelligent feature design, customer experience enhancement.

DevOps & Cloud Infrastructure – Docker, containerization, CI/CD pipelines, Jenkins, Git, Google Cloud Platform (GCP), local-to-production consistency.

Languages & Runtimes – JavaScript, TypeScript, Python, SQL, Java.

Additional Technical Skills – AWS, Linux, data modelling, ETL, banking domain expertise (SWIFT MT/MX, ISO 20022, SEPA, PSD2), enterprise system integration.

EDUCATION AND TRAINING

PROJECTS

AI-Integrated Global Connectivity Portal – Fullstack Redesign & LLM Integration (HCL Technologies)

- Led end-to-end redesign of customer connectivity dashboard using **React**, **TypeScript**, and **shadcn/ui** component library; architected modern state management reducing component re-renders by **58%** and improving Lighthouse performance score from **62** to **91** across 8 primary user flows.
- Developed backend **Node.js APIs** with **NestJS** framework, documenting all endpoints using **OpenAPI/Swagger** standards; implemented 12 new microservices supporting real-time eSIM provisioning, country-specific data plan logic, and user account management, handling **2.5M monthly API calls** with **99.8% uptime**.
- Integrated **AI-driven customer assistant** into frontend, connecting **React** components with LLM backend service to provide intelligent travel recommendations and plan optimization; reduced customer support volume by **28%** and improved onboarding completion rate from **71% to 89%**.
- Implemented comprehensive **TDD testing strategy** using **Jest** and **Testing Library**, achieving **92% code coverage** and establishing automated testing gates in **Jenkins CI/CD** pipeline; eliminated 47 defects in UAT and reduced post-launch critical incidents by **75%**.
- Containerized full-stack application using **Docker** and deployed to **Google Cloud Platform** with automated **CI/CD** orchestration, enabling zero-downtime deployments and reducing release cycle from **3 weeks to 5 days**; established GCP infrastructure as code standards adopted across 3 squads.
- Collaborated with product, design, and backend teams across 6-month sprint cycle, conducting peer code reviews and mentoring 2 junior engineers; shipped AI-integrated portal to production supporting 180K+ active users across 150+ destinations with zero data loss incidents.

SWIFT Messaging Operations Dashboard & Payment Processing Automation (HCL Technologies)

- Developed production support monitoring system for SWIFT messaging platform handling 50K+ daily payment transactions; architected real-time alerting logic using **CloudWatch** and **Dynatrace**, reducing MTTR for P1 payment incidents by **62%** and maintaining **99.95% SLA** compliance.
- Built **REST API** integration layer connecting banking **ERP systems** with SWIFT messaging middleware, enabling cross-border payment workflows compliant with **ISO 20022 message flows**, **SEPA** standards, and **PSD2 regulations**; processed **€2.1B in transaction volume** with zero reconciliation discrepancies.
- Implemented **Python** automation scripts and **ETL data pipelines** for daily payment reconciliation reporting, integrating **PostgreSQL** and **Oracle** databases; reduced manual reconciliation effort by **81%** and eliminated audit exceptions through automated data validation logic.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
