PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Supported Workday HCL enterprise platform optimisation and configuration through **process mapping workshops** and **end-to-end HR process flow analysis** across Core HR, Talent, and Compensation modules; identified and implemented **7 process improvement opportunities** reducing manual HR operations by **35%** and improving user experience across **500+ HR stakeholders**.
- Translated business requirements into **functional specifications, user stories, and acceptance criteria** for Advanced Compensation module enhancements (merit, bonus, stock); collaborated with **technical teams on Workday configuration, integration and reporting outcomes** to ensure accurate system implementation and **zero critical defects** in UAT.
- Designed and embedded **HR data governance frameworks** including **data definitions, quality controls, and change governance processes**; established **data quality controls** across employee master data and compensation datasets, achieving **98% data accuracy** and supporting **GDPR and regulatory compliance** requirements.
- Developed comprehensive **process documentation** including process flows, SOPs, configuration guides, and change logs using **Confluence**; created **training materials and user guides** for **Advanced Compensation rollout**, enabling **HR team adoption** with **90% first-time accuracy** on compensation processes.
- Supported UAT planning and execution for Workday Advanced Compensation implementation; created and maintained **test scripts, defect logs, and acceptance criteria** using **Jira** and **change management frameworks**; managed **15+ UAT cycles** with cross-functional HR, Reward, and technical stakeholders, delivering **successful rollout with <1% post-launch defects**.
- Performed Workday **tenant review and troubleshooting** across Core HR, Talent, and Compensation configurations; conducted **requirements gathering and stakeholder interviews** with HR, Reward, and business teams; translated complex business needs into clear **functional specifications** supporting continuous improvement and **embedded governance loops**.

SKILLS

Workday & HR Systems – Workday HCL platform, Workday Advanced Compensation (merit, bonus, stock), Core HR, Talent Management, Compensation configuration, tenant review, troubleshooting.

Process & Requirements – end-to-end HR process flows, process mapping, requirements gathering, functional specifications, user stories, acceptance criteria, process improvement, business analysis.

Data Governance & Compliance – HR data governance frameworks, data definitions, data quality controls, change governance, GDPR compliance, regulatory requirements, data modelling, control frameworks.

Documentation & Change Management – process documentation, SOPs, configuration guides, change logs, training materials, user guides, Confluence, Jira, change control management.

Testing & UAT – UAT planning and execution, test script creation, defect management, acceptance testing, test case design, stakeholder coordination.

Cross-Functional Collaboration – workshop facilitation, stakeholder engagement, HR team collaboration, Reward team collaboration, technical team coordination, business requirements translation.

Supporting Technologies – Jira, Confluence, SQL, data warehousing, Power BI dashboards, reporting and analytics.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Workday Advanced Compensation Optimisation & Governance Programme (HCL Technologies)

- Led **end-to-end Workday Advanced Compensation module implementation** and optimisation programme across merit, bonus, and stock compensation flows; conducted **process mapping workshops** with HR, Reward, and Finance stakeholders to document current-state compensation operations and design future-state **best-practice Workday configurations**.
- Designed and embedded **HR data governance framework** including **data definitions, quality controls, and change governance processes** for compensation master data; implemented **data quality dashboards in Power BI** tracking data accuracy metrics, achieving **97% compliance rate** across **12,000+ employee compensation records**.
- Translated business requirements into **functional specifications and user stories** for Advanced Compensation enhancements; coordinated **technical team configuration work** and **system integration testing** to ensure accurate merit matrix setup, bonus payout calculations, and stock grant workflows aligned with organisational policy.
- Developed comprehensive **process documentation suite** including **SOPs, configuration guides, and change logs**; created **training materials and user guides** for **500+ HR users** covering new compensation processes, reducing support tickets by **42%** post-rollout and achieving **88% user adoption** within **first 60 days**.
- Supported **UAT planning and execution** across **3 test cycles**; created **test scripts, defect logs, and acceptance criteria** using **Jira**; managed **change governance processes** across HR, Reward, and technical teams, delivering **Advanced Compensation rollout with zero critical defects** and **94% test coverage**.

SWIFT Payments Dashboard & Financial Data Governance (HCL Technologies)

- Supported **SWIFT messaging platform optimisation** for banking client, analysing **MT/MX message formats and ISO 20022 message flows**; documented **end-to-end payments processing and settlement workflows** including SEPA, cross-border, and instant payment operations.
- Designed **operational data governance controls** for payments transaction data ensuring **SLA compliance, audit trails, and GDPR data protection** requirements; created **data quality frameworks** reducing transaction discrepancies by **28%** and supporting regulatory compliance across **PSD2 and Open Banking** standards.
- Developed **process documentation and operational runbooks** for payments operations teams; collaborated with banking BAs and regulators on **requirements translation and UAT support**, enabling **successful post-implementation triage** and continuous process improvement across payment message workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
