PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **end-to-end AI automation workflows** using **Claude API (Anthropic)** and **prompt engineering** to generate job-description-tailored resumes at scale, orchestrating data ingestion → **structured JSON extraction** → **PDF generation** with **reportlab**, achieving **100% accuracy** on constraint guardrails and reducing manual resume curation time by **85%**.
- Built and maintained **scalable data pipelines** for enterprise Java/.NET applications, extracting raw logs and metrics from **Splunk, CloudWatch, and Dynatrace**, transforming unstructured operational data into **CRM-ready dashboards** and **alerting systems** that reduced incident detection time by **40%**.
- Developed **web scraping and data extraction solutions** using **Apify** and custom **Python** scripts to ingest job descriptions and company data from multiple online sources, implementing **rate limiting, session management, and dynamic platform handling** to ensure **99.2% uptime** of automated data collection pipelines.
- Implemented **data deduplication, enrichment, and normalization** workflows using **pandas, NumPy, and scikit-learn** across financial transaction datasets, applying **fuzzy matching and entity resolution** logic to consolidate **50,000+ records** monthly with **98.5% accuracy**, directly reducing duplicate lead ingestion into payment operations systems.
- Integrated **automation systems with CRM platforms** via **REST APIs and database-level data flows (PostgreSQL, MySQL, Oracle)**, synchronizing lead and transaction data across interconnected enterprise systems, ensuring **zero data loss** and **real-time pipeline visibility** for banking and ERP operations teams.
- Monitored and optimized **system performance, scalability, and reliability** of production automation workflows using **Jenkins CI/CD pipelines, GitHub Actions, and Vercel deployment**, executing **continuous testing and alert automation** to maintain **99.8% system uptime** across all data ingestion and integration endpoints.

SKILLS

AI & Automation Engineering – Claude API, Anthropic SDK, prompt engineering, AI workflow orchestration, LLM integration, structured JSON extraction, constraint guardrails, intelligent automation systems.

Web Scraping & Data Extraction – Apify, Python web scraping, rate limiting, session management, dynamic platform handling, OCR document processing, PDF extraction, scanned document digitization.

Data Pipeline & ETL – scalable data pipelines, data transformation, structured data processing, Python (pandas, NumPy, scikit-learn), SQL query optimization, data warehousing, Apache Spark, Hadoop.

Data Quality & Entity Resolution – data deduplication, fuzzy matching, entity resolution, data enrichment, normalization, record linkage, data validation, accuracy optimization.

CRM & System Integration – CRM platform integration, REST API integration, database-level data flows, PostgreSQL, MySQL, Oracle, system synchronization, pipeline data flows, lead lifecycle automation.

Backend & Automation Development – Python, Java, Spring Boot, Flask, FastAPI, Git, Jenkins, GitHub Actions, Docker, Lambda, automation frameworks, independent system design.

Operations & Monitoring – production support, system performance monitoring, scalability optimization, reliability engineering, CI/CD pipelines, incident management, SLA-driven operations.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

AI-Powered Resume Generation & Lead Enrichment Platform (Personal Project)

- Architected an **end-to-end AI automation system** integrating **Claude API (haiku-4-5)** with custom **prompt engineering** to generate job-description-tailored resumes and lead profiles at scale, reducing manual content curation by **85%**.
- Orchestrated **data extraction pipelines** using **Apify scraping infrastructure** to ingest job descriptions from multiple online sources, implementing **rate limiting and session management** to handle dynamic platforms reliably.
- Engineered **structured JSON extraction and constraint guardrail logic** within prompt templates to ensure **100% compliance** with business rules, followed by **reportlab PDF generation** for scalable output formatting.
- Deployed **end-to-end automation workflow** via **GitHub Actions CI/CD** and **Vercel serverless deployment**, achieving **zero-downtime updates** and enabling fully automated, scheduled lead enrichment and resume generation runs.

Enterprise SWIFT Payments Operations & Data Enrichment System (HCL Technologies)

- Designed and maintained **scalable data pipelines** for a SWIFT messaging and payments-operations dashboard, extracting and transforming **ISO 20022 message flows**, SEPA, and cross-border payment transaction data from multiple enterprise sources into **CRM-ready operational insights**.
- Implemented **data deduplication, enrichment, and normalization** workflows on **50,000+ monthly payment transactions** using **SQL (PostgreSQL, Oracle)** and **Python (pandas)**, applying **fuzzy matching and entity resolution** to consolidate duplicate lead records with **98.5% accuracy**.
- Integrated **automation systems with ERP and payment platforms** via **REST APIs** and database-level data flows, synchronizing transaction and lead data across **interconnected financial systems** with **zero data loss** and real-time pipeline visibility for banking operations teams.
- Monitored **system performance and reliability** using **Splunk, CloudWatch, and Dynatrace**, building **operational dashboards** for P1/P2 incident response and SLA management, reducing incident detection time by **40%** and maintaining **99.8% uptime** across production environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
