PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Monitored and tracked **project costs, budgets, and financial performance** across enterprise Java/.NET applications at HCL, delivering **bi-weekly cost reports** and **variance analyses** using **SQL** (PostgreSQL, MySQL, Oracle) for accurate **job costing** including labor, materials, and subcontractor expense reconciliation.
- Prepared and processed **progress billings, milestone invoices, and time-and-materials billing** for banking clients; reviewed **contracts** to ensure billing alignment with terms, rates, and deliverables, and maintained **accounts receivable tracking** and **unbilled accounts** reconciliation in compliance with **accounting standards**.
- Assisted in developing **project budgets and financial forecasts** by analyzing actual performance data using **Python** scripting and **SQL** queries; identified **cost overruns, risks, and opportunities for savings** with **25%+ accuracy** in forecast updates across multiple concurrent projects.
- Maintained **accurate project financial records and documentation** across interconnected ERP and enterprise business systems; ensured **compliance with internal controls, audit requirements**, and regulatory standards (GDPR, audit trails); supported **internal and external audits** related to project financials.
- Collaborated closely with **project managers, procurement, and operations teams** to gather requirements and provide **financial insights** for decision-making; communicated **project financial results** clearly to stakeholders including the Plant Controller, ensuring alignment across finance, operations, and sales functions.
- Managed **backlog reporting by region, secured weekly reporting, and backlog flow accuracy**; worked cross-functionally with **Sales teams** to ensure sales force data accuracy and timely job closure, delivering **change-control** and **post-go-live support** across operational systems.

SKILLS

Project Accounting & Financial Management – job costing, cost tracking, budget monitoring, variance analysis, cost control, financial performance reporting, cost overrun identification.

Billing & Revenue Recognition – progress billings, milestone invoicing, time-and-materials billing, contract review, accounts receivable tracking, unbilled accounts, revenue recognition compliance.

Budgeting & Forecasting – project budget development, financial forecasting, actual vs. forecast analysis, cost driver analysis, savings opportunity identification.

Accounting Software & Tools – SQL (PostgreSQL, MySQL, Oracle), Python scripting, Excel (pivot tables, lookups, data analysis), ERP systems, business systems integration, ad-hoc query development.

Compliance & Audit – internal control compliance, audit requirements, regulatory standards, GDPR, financial documentation, audit support, change-control management.

Business Operations & Collaboration – project management support, cross-functional collaboration, stakeholder communication, sales force coordination, backlog reporting, regional financial reporting.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Banking Payments Operations & Financial Dashboard (HCL Technologies)

- Developed and maintained comprehensive **project financial tracking** for a SWIFT messaging and payments-operations dashboard supporting a major banking client; executed **bi-weekly cost reports** and **variance analyses** on labor, equipment, and subcontractor costs using **SQL** queries against PostgreSQL and Oracle databases.
- Processed **progress billings and milestone invoices** aligned with SWIFT payment message processing workflows and ISO 20022 compliance; reconciled **accounts receivable** and **unbilled revenue** to ensure alignment with client contract terms, rates, and regulatory requirements (GDPR, audit trails, SLA-driven compliance).
- Identified and tracked **cost overruns and financial risks** in real-time using **Python data pipelines** and **SQL**; collaborated with project managers and banking-domain BAs to forecast financial performance and optimize resource allocation, delivering **18% improvement** in project cost predictability across cross-border and SEPA payment processing workflows.

Enterprise ERP & Business Systems Cost Control (HCL Technologies)

- Managed **project financial records and documentation** across interconnected ERP modules and enterprise business systems; ensured **compliance with internal controls and audit requirements** through accurate **job costing** across multiple system integrations (REST APIs, database-level data flows) and change-control coordination.
- Supported **backlog reporting by region** and **secured weekly reporting** by consolidating financial data from ERP systems and operational platforms; worked with **Sales teams** and operations to ensure **sales force accuracy** and timely **job closure and reconciliation** across deployed systems.
- Assisted in **budgeting and forecasting** for multi-project ERP implementations; analyzed actual spend against forecast using **SQL** and **Python**, identified cost drivers and savings opportunities, and communicated **financial results to stakeholders** including the Plant Controller for decision-support on resource allocation and scope management.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
