PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **production-grade Java Spring Boot microservices** supporting enterprise HR and payments platforms, implementing **REST API development**, database querying, and **system design** patterns across **large-scale corporate environments** with 5+ years of full-stack development experience.
- Built and maintained **full-stack capabilities** across **React (JavaScript/TypeScript)** UI components and **Java backend services**, delivering **responsive user experiences** and **reliable backend integrations** while adhering to **secure coding practices**, authentication/authorization patterns, and input validation protocols.
- Executed **system design, application development, testing**, and **operational stability** initiatives in **AWS environments (EC2, S3, Lambda, CloudWatch)**, deploying, operating, and troubleshooting applications at scale; reduced incident response time by **40%** through proactive monitoring and alerting architecture.
- Implemented **CI/CD pipelines** using **Jenkins** and **Git** branching strategies; containerized applications using **Docker** and orchestrated deployments in cloud-native patterns; conducted code reviews and maintained **application resiliency** across interconnected distributed systems.
- Gathered, analyzed, and synthesized large, diverse data sets using **SQL (PostgreSQL, MySQL, Oracle)** and **Python data engineering** workflows to generate **visualizations and reporting** dashboards; identified hidden patterns in production logs via **Splunk** and **Dynatrace** observability tooling, driving **25%** improvement in system architecture and coding hygiene.
- Demonstrated mastery of **Software Development Life Cycle (SDLC)**, **DevOps/CI-CD**, **Agile/Scrum** methodologies, and microservices-oriented design in enterprise financial-services and HR technology contexts; collaborated across cross-functional teams to deliver secure, maintainable solutions in regulated environments.

SKILLS

Languages & Core Development – Java, Python, JavaScript, TypeScript, SQL (PostgreSQL, MySQL, Oracle), R.

Backend Frameworks & Architecture – Spring Boot, REST APIs, microservices architecture, distributed systems design, system design patterns.

Frontend Development – React, component design, state management, accessibility, performance optimization, responsive UI.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, containerization, CI/CD (Jenkins, Spinnaker), Git, application deployment and troubleshooting.

Data Engineering & Analytics – ETL pipelines, data warehousing, pandas, NumPy, scikit-learn, Power BI, Tableau, Power Query, DAX, observability (Splunk, Dynatrace).

Enterprise & Security – Secure coding practices, authentication/authorization patterns, input validation, SDLC, Agile/Scrum, change management, large-scale enterprise systems.

Additional Expertise – Linux shell scripting, Jira, Confluence, application monitoring, incident management, SLA management.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments Operations Dashboard (HCL Technologies)

- Architected and maintained a **production-grade application** supporting enterprise banking operations with **system design** for real-time transaction-flow visibility, transaction reconciliation workflows, and operational alerting for **SWIFT messaging (MT/MX)** and **ISO 20022 message flows**.
- Implemented **REST API integrations** with backend **microservices** and **database querying** across **PostgreSQL and Oracle** to deliver **secure, maintainable code** with **authentication/authorization patterns** and compliance controls for regulated financial-services environments.
- Deployed and operated the application in **AWS cloud environments** using **EC2, CloudWatch** monitoring, and **observability tooling** (Splunk, Dynatrace); achieved **99.95% SLA compliance** through **application resiliency** patterns and incident-response automation, reducing P1 incident resolution time by **35%**.

Ireland Jobs Tracker – AI Resume Automation & Full-Stack Deployment (Personal Project)

- Engineered an end-to-end **full-stack application** integrating **React (JavaScript)** frontend with **Python backend** services orchestrating **system design** for AI-driven content generation and batch processing, combining **distributed systems** concepts (async task queuing) with **microservices-oriented design**.
- Built **REST API endpoints** for JD ingestion, resume generation, and reporting; deployed on **AWS Lambda** and **Vercel** using **CI/CD (GitHub Actions)** and containerization principles; implemented **secure coding practices** including input validation and rate-limiting.
- Created data visualization dashboards and job-market analytics using **Python data engineering** (pandas, NumPy), demonstrating ability to **gather, analyze, and synthesize large data sets** and **identify patterns** for continuous improvement of system performance and user insights.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
