PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **Java Spring Boot** microservices and REST APIs for secure, high-quality enterprise applications, architecting complex solutions that met design standards and supported **25+ concurrent users** in large corporate banking environments.
- Built and maintained **AWS**-hosted cloud services (**EC2, S3, Lambda, CloudWatch**) for developing and running internal applications with **99.5% uptime SLA**, ensuring system stability and synchronization across distributed infrastructure.
- Analyzed existing enterprise application codebases and architected new services and APIs to enhance functionality, leveraging **Spring frameworks, PostgreSQL, and Oracle** to deliver **15+ new features** while maintaining code quality and backward compatibility.
- Transformed operational data into actionable insights through **Power BI dashboards, DAX measures, and data modelling**, automating recurring reporting tasks and reducing manual analysis time by **40%** for cross-functional business stakeholders.
- Automated recurring infrastructure and deployment issues using **Python scripting, Jenkins CI/CD pipelines, GitHub Actions, and Docker containerization**, improving software stability and reducing incident resolution time by **35%** in production environments.
- Applied **AI models and prompt engineering** (Claude API, structured JSON constraints, LLM orchestration) to solve complex problems and integrate AI features into application workflows, demonstrating hands-on capability to build intelligent, scalable solutions.

SKILLS

Core Languages & Frameworks – Java, Spring Boot, Spring MVC, Spring Data, REST APIs, Python, SQL.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, CI/CD pipelines, GitHub Actions, Git, Linux, shell scripting.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL query optimization, schema design, data pipelines, ETL, data warehousing.

Data Analytics & BI – Power BI (dashboards, DAX, Power Query), Tableau, data modelling, business intelligence, exploratory data analysis.

AI & Machine Learning – Claude API, prompt engineering, LLM integration, AI workflow orchestration, scikit-learn, supervised and unsupervised learning.

Enterprise & Financial Systems – Application development for large corporate environments, system design, application testing, Software Development Life Cycle (SDLC), Agile methodologies, Jira, Confluence.

Observability & Security – Splunk, Dynatrace, CloudWatch monitoring, production incident management, application resiliency, secure coding practices.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Banking Payments Operations Dashboard (HCL Technologies)

- Designed and developed a **Java Spring Boot** dashboard application for a global banking client supporting **SWIFT messaging (MT/MX formats), ISO 20022 message flows, and payments processing** across SEPA and cross-border payment channels.
- Built secure, high-quality code with real-time transaction-flow visibility and operational alerting, ensuring **99.7% system uptime** and regulatory compliance (GDPR, audit trail requirements) in a production banking environment handling **10,000+ daily transactions**.
- Architected complex system integrations using **REST APIs and multi-database queries (PostgreSQL, Oracle)** to synchronize payment messages across interconnected ERP and business systems, reducing reconciliation time by **45%**.
- Automated data analysis and reconciliation workflows using **Python scripting, SQL, and ETL pipelines**, transforming raw payment data into **Power BI dashboards** for operations teams and leadership reporting.

Ireland Jobs Tracker – AI-Powered Resume Generator (Personal Project)

- Designed and developed an end-to-end **AI workflow orchestration system** integrating **Claude API (Anthropic), prompt engineering with structured JSON constraints**, and guardrails to generate job-description-tailored resumes at scale.
- Architected a secure, scalable pipeline: **Apify web scrapers** → job description ingestion → **Claude Haiku 4.5 LLM inference** → **reportlab PDF generation** → **GitHub Actions CI/CD** → **Vercel cloud deployment**, demonstrating hands-on AI integration and application resilience.
- Engineered advanced **prompt engineering techniques** and constraint-based LLM guardrails to ensure output quality and compliance, reducing manual review time by **80%** and enabling **500+ automated resume variants** per execution.
- Built full-stack automation using **Python, API integration, CI/CD pipelines, and cloud deployment**, showcasing capability to develop intelligent applications that solve complex problems and integrate AI features into production workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
