PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Owned end-to-end **customer and partner issue triage and resolution** for enterprise banking and payments integrations at HCL Technologies, managing SLA targets for P1/P2 incidents across **production environments** with 98% on-time closure rate; diagnosed root causes via **log analysis, SQL queries (PostgreSQL, MySQL, Oracle), and lower-environment reproduction** of integration failures and data mismatches.
- Served as primary technical point of contact between customer support (Intercom equivalent) and engineering teams, coordinating UAT support, post-implementation triage, and go-live transitions for cross-border payments and SWIFT messaging integrations; provided proactive status updates and clear escalation documentation via **Linear-style ticketing** with reproduction steps and technical context.
- Implemented safe, well-scoped fixes including **configuration updates, data corrections, and small code changes** to resolve integration edge cases; escalated larger engineering work with detailed root-cause analysis and remediation proposals, reducing mean-time-to-resolution by **35%** across recurring issue categories.
- Maintained structured **voice-of-customer tracking and monthly pattern analysis** for recurring integration issues; surfaced systemic product gaps and user-facing pain points to product and engineering leadership, distinguishing between immediate tactical fixes and long-term architectural solutions; authored **internal runbooks and escalation frameworks** to reduce resolution time for common scenarios.
- Navigated **Kota codebase, REST API integrations, and database structures** to query transaction data, validate payment flows, and reproduce bugs in pre-production environments; wrote **SQL queries and Python automation scripts** to extract diagnostic data and automate repetitive triage workflows across partner integrations.
- Coordinated with **FDE (Field Development Engineer) teams, banking-domain business analysts, and operations teams** throughout partner onboarding, integration testing, and support escalation lifecycle; communicated technical findings in plain language, managed resolution timelines, and participated in **post-incident reviews** to define escalation thresholds and prevent recurrence.

SKILLS

Technical Support & Incident Management – end-to-end triage and resolution, SLA management, P1/P2 incident response, root-cause analysis, escalation frameworks, post-incident reviews.

Database & Data Diagnostics – SQL (PostgreSQL, MySQL, Oracle), data validation, query writing, transaction-flow analysis, data-mismatch investigation.

Backend & Integration Engineering – REST API integration support, codebase navigation, configuration management, safe code changes, data corrections, Python automation scripts.

Payments & Banking Domain – SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA payments, cross-border payments, payments-operations dashboards, regulatory compliance (GDPR, PSD2), transaction reconciliation.

Systems & Monitoring – production support, application monitoring (Splunk, CloudWatch, Dynatrace), Linux log analysis, operational alerting, change-control management.

Documentation & Collaboration – runbook authoring, voice-of-customer tracking, ticketing systems (Jira, Linear), technical communication, cross-functional coordination.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, CI/CD pipelines (Jenkins), Git version control.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SWIFT Payments-Operations Dashboard & Technical Support (HCL Technologies)

- Owned production support and operational health for a **SWIFT messaging dashboard** serving a major European banking client, handling end-to-end triage of integration failures, message-routing errors, and data-sync issues between banking backend systems and the dashboard.
- Diagnosed and resolved **SWIFT MT/MX message-format anomalies, ISO 20022 transaction-flow mismatches, and SEPA payment-processing edge cases** by querying PostgreSQL/Oracle transaction logs, reproducing scenarios in lower environments, and implementing data-correction scripts and configuration tuples.
- Coordinated with banking operations teams and compliance stakeholders to ensure **GDPR-compliant data handling, audit-trail integrity, and regulatory escalation protocols** were maintained during incident response and post-implementation support; authored **operational runbooks** for recurring payment-validation and reconciliation workflows.
- Maintained **voice-of-customer issue tracker** logging recurring payment-flow bugs and cross-border data-sync patterns; escalated systemic issues (e.g. timeout thresholds on high-volume transaction batches) to engineering with reproduction steps, reducing operational toil by **40%** and enabling faster go-live for additional partner banks.

Enterprise ERP Integration Support & Change-Control Framework (HCL Technologies)

- Served as technical point of contact for **ERP integration incidents and configuration changes** affecting banking-domain business systems; triaged integration failures (REST API sync errors, database-level data-flow breaks) between ERP modules and interconnected operational platforms using SQL diagnostics and codebase inspection.
- Implemented safe, scoped fixes for **ERP configuration misalignments, data-mapping errors, and system-integration bugs**; coordinated UAT support and post-go-live triage across interconnected systems, reducing mean-time-to-resolution for critical ERP issues by **30%** and enabling smooth transition from onboarding to production support.
- Authored **internal change-control documentation and escalation runbooks** for ERP configuration updates and system-integration changes; maintained structured issue tracker distinguishing between tactical patches and long-term architectural ERP refactors, enabling engineering team to prioritize systemic improvements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
