PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **attribute logic** across **Python, Java, and SQL** for data-driven risk assessment solutions, partnering with Modelling and Technology teams to build attributes and attribute sets meeting evolving business requirements for moderate-complexity projects.
- Executed **data manipulation and analysis** using **Python (pandas, NumPy, scikit-learn)** and **relational databases (PostgreSQL, MySQL, Oracle)** to validate attribute completeness, consistency, and quality through independent testing and continuous monitoring, reducing attribute defect rates by **18%**.
- Completed bug fixes and production support for attribute development workflows, ensuring accurate implementation in production environments and maintaining **99.2% SLA compliance** across attribute sets serving internal and external customers.
- Maintained comprehensive documentation of all attributes, attribute sets, and user guides; created and updated training materials for attribute development applications, improving team onboarding time by **30%**.
- Recommended and implemented enhancements to attribute development applications, collaborating with cross-functional teams on system reliability, auditing frameworks, and operational efficiency improvements supporting sensitive data sources.
- Demonstrated creative, analytical, and problem-solving skills in moderately complex attribute engineering tasks; communicated project status, technical recommendations, and next steps to management with clear documentation and proactive stakeholder updates.

SKILLS

Programming & Scripting – Python, Java, SQL, C++.

Data Engineering & Analysis – data manipulation, data analysis, ETL pipelines, attribute development, KEL, ECL.

Databases & Systems – relational databases (PostgreSQL, MySQL, Oracle), schema design, data validation, complex queries.

Data Science & Statistics – statistical analysis, regression, hypothesis testing, exploratory data analysis, machine learning fundamentals.

Business Intelligence & Visualization – Power BI, Tableau, dashboards, data modelling, Power Query.

Quality Assurance & Documentation – testing, auditing, bug fixes, user guides, training materials, change-control management.

Professional & Communication – Agile/Scrum, cross-functional collaboration, stakeholder management, excellent oral and written communication.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Banking Payments & Risk Operations Dashboard (HCL Technologies)

- Designed and maintained attribute logic and data pipelines supporting **SWIFT messaging (MT/MX)** and **ISO 20022 message flows** for a banking client's payment-operations platform, enabling real-time risk assessment and transaction-flow visibility.
- Executed **data analysis and validation** using **Python, SQL, and relational databases** to ensure attribute completeness and consistency across **SEPA, instant payments, and cross-border payment** workflows; identified and resolved data quality issues affecting **250+ daily payment messages**.
- Built and deployed **Power BI dashboards** for operational alerting, regulatory compliance reporting, and audit trails, meeting strict SLA and data-protection requirements; documentation and user guides reduced support queries by **22%**.

Ireland Jobs Tracker – Resume Intelligence Engine (Personal Project)

- Engineered an end-to-end **data analysis and transformation pipeline** integrating web scraping, **Python-based data processing**, and **API integration** to ingest job descriptions, extract attributes, and generate tailored resume content at scale.
- Developed **attribute extraction and validation logic** using structured **Python** and **JSON** processing to identify and map job requirements to candidate skills; implemented auditing and quality-assurance checks ensuring **98% accuracy** across **500+ job postings**.
- Orchestrated **CI/CD automation** via **GitHub Actions** for continuous data pipeline execution, validation, and deployment to production; created comprehensive documentation and user guides for tool maintenance and feature enhancements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
