PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **monitoring dashboards** using **Splunk**, **Dynatrace**, and **CloudWatch** for enterprise-grade applications, achieving **99.2% SLA uptime** through proactive alerting and incident response automation across production environments.
- Automated infrastructure reliability workflows using **Python** scripting, **Shell**, and **cron jobs** for log analysis, system health checks, and scheduled reporting; reduced incident response time by **40%** through predictive alerting pipelines.
- Managed production incidents at **P1/P2 severity** in a regulated financial-services environment, coordinating root-cause analysis, remediation, and post-incident reviews with cross-functional teams; maintained audit trails and compliance documentation (GDPR, regulatory requirements) throughout incident lifecycle.
- Implemented **CI/CD pipelines** using **Jenkins** and **Git** to automate application deployments across **AWS** infrastructure (**EC2**, **S3**, **Lambda**), reducing deployment friction by **35%** and enabling rapid feature releases in compliance-critical environments.
- Built data pipelines and ETL processes using **Python (pandas, NumPy)**, **SQL** queries on **PostgreSQL** and **Oracle**, and **Docker** containerisation to ingest, validate, and report operational metrics; improved data accuracy by **98%** through automated schema validation.
- Collaborated with operations, development, and business-analysis teams across interconnected **ERP** and banking-domain systems to implement change-control procedures, coordinate UAT, and resolve post-go-live reliability issues in a payments-operations environment handling **ISO 20022 message flows** and **SEPA/cross-border payments**.

SKILLS

Site Reliability & Operations – production monitoring, incident management, SLA optimization, on-call response, application support, infrastructure reliability, disaster recovery, change control.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD pipelines, Jenkins, Git, Linux administration.

Programming & Scripting – Python, Java, Shell scripting, REST API development, Spring Boot, data automation.

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy, scikit-learn), Power BI, Tableau, ETL pipelines, data warehousing, schema design.

Financial Services & Compliance – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, payments processing, GDPR compliance, regulatory audit trails, financial-services SLAs.

Enterprise Systems – ERP integration, system interconnectivity, business-system support, configuration management, UAT coordination, cross-system data flows.

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, GitHub Actions, Vercel, Power Query, DAX.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Payments-Operations Monitoring Dashboard (HCL Technologies)

- Architected and maintained a **production monitoring dashboard** for a regulated banking client's SWIFT messaging and payments-operations platform, integrating **Splunk**, **Dynatrace**, and custom **Python** alerting scripts to provide real-time visibility into transaction flows and operational health.
- Implemented **SLA-driven alerting** for **P1/P2 incidents**, reducing mean-time-to-response (MTTR) by **45%** through threshold automation and escalation rules aligned to payment-processing criticality and regulatory obligations.
- Developed **ISO 20022 message validation** and **SEPA payments reconciliation** reporting using **SQL** (Oracle, PostgreSQL) and **Python pandas** ETL; ensured **100% audit-trail compliance** and GDPR data-protection requirements throughout incident triage and post-implementation support.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine (Personal Project)

- Engineered an end-to-end **Python-based automation workflow** orchestrating **Apify web scrapers** → job-description ingestion → **Claude API** (Anthropic) integration with structured-JSON prompt engineering → **reportlab PDF generation** → **GitHub Actions CI/CD** deployment to **Vercel**.
- Designed **constraint-guardrail prompts** for **claude-haiku-4-5** to generate JD-tailored resume content at scale with **99.1% accuracy**, demonstrating hands-on proficiency in LLM orchestration, prompt engineering, and API integration patterns.
- Deployed production-grade reliability patterns including error-handling, retry logic, logging, and CI/CD automation; reduced manual resume-customization time by **90%** through fully-automated AI workflow execution and PDF delivery pipeline.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
