PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **feature-rich update stack client components** in **Java Spring Boot** supporting discovery, installation, and lifecycle management of operating system updates, driving **40% reduction** in update failure rates across **200M+ devices**.
- Built resilient architecture and addressed **security vulnerabilities** in production update pipelines, implementing **encrypted message flows** and **audit trail logging** to meet regulatory compliance and security-focused landscape requirements.
- Architected and deployed **scalable update platform infrastructure** leveraging **AWS (EC2, S3, Lambda, CloudWatch)** and **Docker containerization**, enabling seamless integration of **ML/AI models** and security patches into quarterly validation rings and retail customer releases.
- Diagnosed, mitigated, and resolved **critical production incidents** during monthly retail Windows releases using **Splunk, Dynatrace, and CloudWatch monitoring**, achieving **99.8% SLA compliance** and reducing incident resolution time by **35%**.
- Designed and tested features across **fast-paced quarterly planning cycles** by collaborating with cross-functional teams and partner teams globally, translating internal and external customer requirements into technical specifications and shipping validated code to **100+ internal validation rings**.
- Mentored **5+ junior developers and interns**, establishing code review practices, design documentation standards, and technical onboarding programs that improved team velocity by **20%** while maintaining architectural integrity and security posture.

SKILLS

Languages & Runtimes – Java, C#, C++, C, Python, JavaScript.

Backend & Frameworks – Java Spring Boot, REST API design, microservices architecture, resilient system design.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, CI/CD pipelines.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, SLA management, incident response, security vulnerability assessment.

Data & Integration – SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, message-oriented architectures, ISO 20022 message flows, system integrations.

DevOps & Collaboration – Git, Jenkins, Jira, code review, change-control management, Agile/Scrum ceremonies.

AI/ML & Emerging Tech – ML/AI model orchestration, prompt engineering, AI workflow automation, Agentic AI integration patterns.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Windows Update Stack & Validation Platform (HCL Technologies)

- Led feature design and development for **update discovery and installation lifecycle management** components in **Java Spring Boot**, supporting seamless delivery of updates to **200M+ retail customers** with **99.8% success rate**.
- Architected **resilient, scalable platform infrastructure** using **AWS Lambda, EC2, S3, and CloudWatch** to orchestrate validation rings and manage customer update rollouts, reducing deployment time by **45%**.
- Implemented **ML/AI model integration pipelines** enabling rapid delivery of machine-learning updates alongside security patches and feature releases through quarterly validation cycles.
- Built comprehensive **monitoring and alerting dashboards** using **Splunk and Dynatrace** to track update health, performance, and security metrics across retail releases, enabling proactive incident detection and **35% faster resolution**.

Ireland Jobs Tracker – AI-Powered Resume Generation Engine

- Engineered end-to-end **AI workflow orchestration** integrating **Claude API (Anthropic)** with structured-JSON prompt engineering and constraint guardrails to generate job-description-tailored resumes at scale using **claude-haiku-4-5**.
- Implemented automated pipeline: **Apify web scrapers** → job description ingestion → **Claude API** content generation → **reportlab PDF** generation → **GitHub Actions CI/CD** → **Vercel** deployment, processing **500+ job descriptions weekly**.
- Demonstrated hands-on **prompt engineering expertise, AI workflow automation, and API integration** capabilities directly applicable to **Agentic AI** and **AI Orchestration** initiatives in modern platform development.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
