PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed order processing, stock control and ERP data accuracy across interconnected supply chain systems at HCL Technologies; processed 500+ daily customer and supplier orders on enterprise **ERP platforms**, executing order dispatch with 99.2% documentation accuracy and resolving stock discrepancies within **SLA compliance windows**.
- Supported warehouse operations and inventory management through **stock control, stocktake coordination, and quarantine stock monitoring**; performed routine stock checks, identified data integrity issues, and liaised with Quality teams to resolve ERP system discrepancies, reducing inventory write-offs by **18%**.
- Executed data validation and testing during enterprise **ERP system implementations** and configuration changes; aligned operational processes with new system capabilities, coordinated **UAT** across purchasing, warehouse and operations teams, and ensured post-go-live data migration accuracy across **order processing, stock records**, and supplier interfaces.
- Administered purchasing support functions during peak trading periods and team absences; processed supplier orders, managed purchase requisitions, and maintained vendor data integrity on **ERP systems**, ensuring procurement continuity and **delivery schedule compliance**.
- Drove **continuous improvement and Lean initiatives** within supply chain operations using **process mapping**, root-cause analysis, and cross-functional collaboration; identified workflow inefficiencies in order dispatch and stock reconciliation, implemented process changes that reduced manual handling by **22%**, and documented process improvements in operational runbooks.
- Demonstrated advanced proficiency in **Microsoft Excel** for supply chain analytics, including pivot tables, VLOOKUP, data consolidation, and reporting; created operational dashboards tracking **order fulfillment KPIs, stock turnover metrics**, and supplier performance, delivering weekly reports to supply chain leadership with **99.5% data accuracy**.

SKILLS

Supply Chain & Operations – order processing, stock control, warehouse operations, inventory management, stocktake coordination, quarantine stock management, purchasing support, supplier order management, delivery schedule compliance.

ERP Systems & Data Management – ERP system administration, ERP implementation support, data validation, process alignment, order dispatch processing, stock record accuracy, supplier data maintenance, change-control management.

Business Systems & Integrations – enterprise business systems support, cross-system data flows, system configuration, UAT coordination, post-go-live support, interconnected operations platforms.

Microsoft Office & BI Tools – Microsoft Excel (pivot tables, VLOOKUP, data consolidation, dashboards), Power BI, operational reporting, KPI dashboards, data modelling.

Process Improvement & Lean Methodologies – continuous improvement, Lean journey support, process mapping, root-cause analysis, workflow optimization, operational documentation.

Core Competencies – attention to detail, data accuracy, team collaboration, fast-paced environments, professional communication, organised workflow, proactive problem-solving, IT proficiency, cross-functional liaison.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

ERP-to-Warehouse Order Processing & Inventory Control Integration Platform (HCL Technologies)

- Architected and deployed an integrated **ERP order processing system** with real-time warehouse synchronization and **stock control automation** for a multi-site manufacturing operation; consolidated order receipt, **order dispatch**, and inventory visibility into a single **ERP platform**, eliminating manual data re-entry and reducing order-to-dispatch cycle time from **6 hours to 2.5 hours**.
- Implemented **stock-level monitoring dashboards** using **Excel VBA and Power BI** that tracked **quarantine stock**, reorder points, and inventory discrepancies in real-time; automated **stocktake reconciliation workflows** and data validation checks, reducing manual stocktake duration by **40%** and increasing stock-count accuracy to **99.7%**.
- Led **ERP data migration and validation testing** during system cutover, including order history, supplier master data, and stock ledger transfers; executed comprehensive **UAT** across purchasing, warehouse, Quality, and operations teams, identifying and resolving **100+ data integrity issues** pre-go-live.
- Designed operational **process improvement workflows** for order handling and **continuous improvement initiatives** within the supply chain function; mapped current-state picking, packing, and dispatch procedures, implemented **Lean process changes** including batch-pick optimization and label-printing automation, reducing picking errors by **35%** and improving warehouse throughput by **28%**.
- Developed comprehensive **operational runbooks and user guides** for supply chain team members on **ERP order processing, stock control procedures, and purchasing workflows**; trained purchasing, warehouse, and supply chain teams, achieving **95% process compliance** and reducing helpdesk queries by **42%** within three months post-implementation.

Supply Chain Data Accuracy & Compliance Dashboard (HCL Technologies)

- Built a **Supply Chain KPI Dashboard** using **Power BI and Excel** to track order fulfillment accuracy, **stock control metrics**, supplier performance, and inventory turnover across warehouse and ERP systems; automated daily data pulls from **ERP systems** using **Power Query** and established **DAX measures** for variance analysis and SLA compliance reporting.
- Reduced supply chain data reconciliation time by **50%** through implementation of automated **data validation checks** and discrepancy alerting; identified root causes of stock variances by **25 root-cause analyses** quarterly, improving **data accuracy** from **94% to 99.2%** and enabling faster corrective action with Quality and operations teams.
- Delivered weekly operational reports to supply chain leadership highlighting order processing volumes, **stock control performance**, supplier delivery compliance, and continuous improvement progress; insights drove **three Lean process optimization projects** that collectively improved warehouse efficiency by **24%** and reduced operational costs by **£18K annually**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
