PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **overhead electrical infrastructure documentation** and technical drawings for energy sector projects, applying **methodical problem-solving** approaches to translate complex system requirements into accurate, compliant technical specifications aligned with industry standards.
- Managed **change-control workflows** and **system configuration updates** across interconnected enterprise platforms, coordinating **UAT** and post-implementation support with cross-functional stakeholders to ensure reliable handover and operational continuity in regulated environments.
- Developed **data pipelines and ETL workflows** using **Python** and **SQL** (PostgreSQL, MySQL, Oracle) to automate data ingestion, validation, and reporting for operational dashboards, reducing manual reporting overhead by **40%** and improving data accuracy for stakeholder decision-making.
- Built **production monitoring dashboards** using **Power BI** and **Tableau** to visualize system health, incident metrics, and operational KPIs; established **SLA-driven alerting** and **P1/P2 incident response protocols** using **Splunk** and **CloudWatch**, achieving **99.2% uptime** across critical infrastructure.
- Authored **technical documentation**, **user guides**, and **training materials** (Confluence) to support team onboarding and knowledge transfer; demonstrated **excellent written communication** and **attention to detail** across all deliverables, ensuring clarity and compliance with organizational standards.
- Orchestrated **CI/CD pipelines** using **Jenkins** and **Git** to automate build, test, and deployment workflows; performed **code reviews** and enforced **branching strategies** to maintain code quality and reliability across **Java Spring Boot** REST API services in production environments.

SKILLS

Engineering & Technical Design – overhead electrical infrastructure, technical drawings, system design documentation, change-control management, UAT coordination.

Programming & Scripting – Python, Java, SQL, shell scripting, REST API development, Spring Boot.

Data Engineering & Analytics – ETL pipelines, data warehousing, data modelling, Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, monitoring, production support.

DevOps & CI/CD – Jenkins, Git, code review, branching strategies, deployment automation, change management.

Problem-Solving & Communication – methodical approach to problem-solving, independent task execution, excellent verbal and written communication, technical presentation, stakeholder liaison.

Databases & Integration – PostgreSQL, MySQL, Oracle, data validation, schema management, system integrations, interconnected platform support.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Energy Sector Infrastructure Monitoring & Reporting System (HCL Technologies)

- Designed and implemented **overhead electrical system monitoring dashboards** using **Power BI** and **Tableau** to track infrastructure health, asset utilization, and operational performance metrics across distributed energy assets; integrated **real-time data feeds** from **CloudWatch** and **Splunk** to enable **SLA-driven incident alerting** and **reliable operational visibility**.
- Developed **Python-based ETL pipelines** to ingest, validate, and transform infrastructure telemetry data from multiple cloud and on-premises sources; automated **scheduled reporting** workflows to deliver daily operational summaries to engineering teams and stakeholders, reducing manual report generation by **50%**.
- Authored comprehensive **technical documentation**, **user guides**, and **system handover materials** to support engineer onboarding and knowledge transfer; maintained **attention to detail** across all technical drawings and specifications to ensure compliance with regulatory and safety standards.

Enterprise Systems Integration & Change Management Framework (HCL Technologies)

- Executed **change-control management** and **system configuration updates** across interconnected ERP and business-operations platforms serving energy and utilities clients; coordinated **UAT** cycles, stakeholder sign-offs, and post-implementation support with cross-functional engineering and operations teams to ensure reliable system transitions.
- Integrated backend services using **REST APIs**, **Java Spring Boot**, and **SQL** (PostgreSQL, MySQL, Oracle) to enable seamless data flow across enterprise systems; performed **ad-hoc data validation queries** and **schema management** to ensure data integrity during critical infrastructure deployments.
- Built **CI/CD pipelines** using **Jenkins** and **Git** to automate testing and deployment of configuration changes; enforced **code review** and **branching strategies** to maintain system reliability and reduce deployment risk in production environments serving multiple business units.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
