PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, built, and released **native Android applications** using **Kotlin and Java**, delivering features end-to-end from architecture design through production deployment across enterprise platforms serving millions of users.
- Owned full-stack feature development on **Android Architecture Components**, implementing **MVVM patterns, Dagger dependency injection**, and modern **Android APIs** including concurrency, coroutines, and compose for high-performance mobile experiences.
- Debugged complex **Android OS feature issues** and application runtime problems, collaborating closely with Core Product teams to resolve **25+ P1/P2 mobile incidents** and maintain **99.5% application availability SLA** across production environments.
- Refactored legacy **Android application architecture** using **modern Android design patterns, client-side persistence, transitions and animations** to improve code maintainability and resilience; drove continuous improvement through **code reviews, pair programming**, and architectural advocacy.
- Developed **REST API integrations** and data-binding layers in **Android applications**, connecting mobile clients to backend services via **Java Spring Boot APIs** and **PostgreSQL/Oracle databases**, ensuring data consistency and responsive UI performance.
- Practiced **Agile/Kanban methodologies** across sprint cycles, collaborating with cross-functional product teams and architecture committees; leveraged **AI tooling and Claude API integrations** to automate mobile testing workflows and accelerate feature delivery.

SKILLS

Android & Mobile Development – Kotlin, Java, native Android APIs, Android Architecture Components, MVVM, Compose, coroutines, concurrency.

Mobile Architecture & Design Patterns – architectural patterns for mobile apps, client-side persistence, transitions, animations, Dagger/modern DI frameworks.

Backend & Integration – REST API design and integration, Spring Boot, PostgreSQL, Oracle, MySQL, database-driven mobile applications.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD pipelines, Git, code review workflows.

AI & Automation Tools – Claude API, prompt engineering, AI workflow orchestration, GitHub Actions, automation frameworks.

Agile & Collaboration – Agile/Kanban methodologies, pair programming, code review techniques, cross-team coordination, Jira/Confluence.

Operating Systems & Tooling – Linux, shell scripting, application debugging, monitoring and observability tools.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Native Mobile Banking Dashboard – SWIFT Payments Operations (HCL Technologies)

- Architected and released a native **Android application** for a tier-1 banking client, enabling real-time monitoring of **SWIFT messaging flows**, **ISO 20022 message structures**, and **SEPA/cross-border payment transactions** with **sub-second latency**.
- Implemented **MVVM architecture** with **Dagger dependency injection**, **coroutines for concurrency**, and **client-side persistence** using Room database to cache payment messages and ensure offline functionality; integrated **REST APIs** to backend **Spring Boot payment services**.
- Built operational **alerts, notifications, and compose-based UI transitions** for P1/P2 payment incident visibility; collaborated with banking-domain teams and regulatory stakeholders to ensure compliance with **GDPR and financial audit trail requirements**; supported UAT and post-launch triage across 500+ users.

Ireland Jobs Tracker – AI-Powered Resume Generation Platform (Personal Project)

- Designed and deployed a full-stack web application integrating **Claude API (Anthropic)** for **AI-driven resume generation at scale**, orchestrating end-to-end workflows: **Apify web scrapers** → job description ingestion → **Claude prompt engineering** with structured JSON constraints → **reportlab PDF generation**.
- Implemented **prompt engineering best practices** and guardrails to ensure JD-tailored content quality; deployed via **GitHub Actions CI/CD** and **Vercel**, demonstrating hands-on expertise in **AI tooling, API integration, and automation**—directly applicable to mobile testing automation and feature engineering pipelines.
- Leveraged **modern DevOps and cloud deployment** practices (GitHub Actions, Vercel infrastructure) to deliver a production-grade service; showcased ability to own features end-to-end and advocate for architectural improvements in automated workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
