PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Produced **management information and metrics** for deal origination and portfolio management datasets using **Power BI, DAX, and Power Query** ETL pipelines, delivering 15+ monthly dashboard refreshes for investment tracking and financial performance monitoring across ISIF-equivalent portfolios.
- Conducted **ad-hoc reporting and deep dive data analysis** of quantitative and qualitative datasets using **Python** (pandas, NumPy, scikit-learn), **SQL** (PostgreSQL, MySQL, Oracle), and **R statistical analysis** to support portfolio decision-making, uncovering data quality issues across 8+ interconnected business systems with root cause analysis and remediation protocols.
- Designed and deployed **analytics solutions and dashboards** using **Power BI, Tableau, and DAX measures** to present key findings to stakeholders; developed **statistical analysis & financial modelling** frameworks including regression analysis, hypothesis testing, and time-series forecasting on enterprise investment data.
- Coordinated **data team activities** including meetings, documentation of solutions, and training guides; supported **change management activities** and UAT coordination across interconnected enterprise systems, ensuring **data quality** compliance and cross-functional alignment with Portfolio Monitoring, Risk Management, and Investment teams on 12+ system configuration updates.
- Supported **production monitoring** and application reliability using **Splunk, CloudWatch, and Dynatrace** to operationalize analytics pipelines; implemented **CI/CD** via **Jenkins** and **Git** for automated data workflow deployment, reducing manual reporting effort by **35%** and achieving **99.2% SLA** uptime on financial data systems.
- Engineered **data pipelines** and **ETL workflows** using **Python** scripting, **AWS** (Lambda, S3, EC2), and **Docker** containerization to ingest, validate, and transform multi-source investment and portfolio data; created **data warehousing** schemas across **PostgreSQL** and **Oracle** supporting 50+ concurrent analytics queries with **sub-second** query latency.

SKILLS

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing, management information production.

Data Analysis & Statistics – Python (pandas, NumPy, scikit-learn), R, RStudio, statistical analysis, regression, hypothesis testing, time-series analysis, exploratory data analysis.

Financial Modelling & Reporting – Financial data analysis, investment performance tracking, ad-hoc reporting, executive dashboard development, quantitative and qualitative data analysis.

Data Engineering & ETL – Python scripting, SQL (PostgreSQL, MySQL, Oracle), ETL pipeline development, data validation, AWS (Lambda, S3, EC2), Docker.

Monitoring, Reliability & Operations – Splunk, CloudWatch, Dynatrace, production monitoring, application support, SLA management, incident response.

Change Management & Coordination – Change control management, UAT coordination, cross-functional stakeholder alignment, documentation, training guide development.

DevOps & Infrastructure – Jenkins CI/CD, Git version control, Linux, cron jobs, Docker containerization, AWS deployment automation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

ISIF Portfolio Analytics & Management Information Platform (HCL Technologies)

- Architected and deployed an **integrated data analytics platform** consolidating deal origination, portfolio monitoring, and risk management data from 8+ operational systems into a unified **Power BI** and **Tableau** environment, enabling real-time **management information and metrics** visibility for investment performance tracking across climate action, housing, and infrastructure funds.
- Engineered **ETL pipelines** using **Python** (pandas, NumPy), **SQL** (PostgreSQL, Oracle), and **AWS Lambda** to extract, validate, and transform quantitative and qualitative investment datasets; built **data warehousing** schemas supporting 40+ concurrent analytics queries with **sub-second** latency, reducing manual reporting turnaround from **5 days to 8 hours**.
- Designed 12+ **dashboards** and **analytics solutions** using **DAX measures**, **Power Query**, and advanced data modelling to present key investment findings—IRR, fund allocation, portfolio risk metrics, and ESG performance—to Portfolio Management, Investment, and executive stakeholders; refreshed data daily via **Jenkins CI/CD** automation.
- Conducted **deep dive data analysis** and **statistical analysis & financial modelling** on historic investment returns, scenario planning, and fund performance; applied **R statistical methods** and time-series forecasting to identify portfolio anomalies and support strategic decision-making with **98% accuracy** in predictive models.
- Coordinated **data team activities**, **change management activities**, and UAT support across interconnected enterprise systems; documented **training guides** and solution architecture; investigated and remediated **data quality issues** through root cause analysis, reducing downstream reporting errors by **92%**.

SWIFT Payments Operations & Portfolio Risk Monitoring Dashboard (HCL Technologies)

- Built production **monitoring and analytics dashboards** for a banking client's **SWIFT messaging** and payments-operations platform using **Splunk** and **Dynatrace**, tracking transaction flows, **ISO 20022** message compliance, and **SEPA** instant-payment processing with **P1/P2 incident alerting** achieving **99.5% SLA uptime**.
- Conducted **ad-hoc reporting and data analysis** on cross-border payment flows, reconciliation workflows, and regulatory data requirements; developed **SQL queries** across **PostgreSQL** and **Oracle** for transaction validation, audit trail verification, and **GDPR** data-protection compliance reporting.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
