PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed day-to-day operational support and incident response for enterprise financial systems, resolving internal and external queries across multiple mailboxes within agreed service standards using **Splunk, CloudWatch, and Dynatrace** monitoring; coordinated SLA compliance and P1/P2 incident triage with stakeholder communication achieving **99.2% uptime** on production banking dashboards.
- Produced and maintained operational management information (MI) including KPIs, dashboards, and trend reporting using **Power BI, DAX, and Power Query**; developed real-time monitoring dashboards for payments operations tracking transaction volumes, error rates, and service bottlenecks, reducing manual reporting overhead by **40%**.
- Supported business process governance and documentation by creating and maintaining operational procedures, user guides, and process flows in **Confluence**; coordinated quality assurance activities including user access reviews, configuration audits, and post-implementation testing across interconnected banking systems.
- Developed and maintained business process integrations and system interconnections using **REST APIs, SQL (PostgreSQL, MySQL, Oracle), and Python scripting**; automated operational workflows and data reconciliation pipelines for payments processing, reducing manual intervention by **35%** and improving data accuracy across ERP and business systems.
- Supported change-control management and operational delivery through **Jira, Git, and Jenkins CI/CD pipelines**; coordinated UAT activities, documented system changes, and maintained audit trails for regulatory compliance including **GDPR and financial controls**, ensuring traceability across all operational modifications.
- Demonstrated operational excellence in banking and financial services domain, supporting **SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments processing, and cross-border payment reconciliation**; collaborated with business analysts and operations teams to identify recurring issues, propose process improvements, and proactively manage operational risks in a high-compliance environment.

SKILLS

Operations & Business Process Management – day-to-day operational support, incident management, SLA compliance, service-level agreements, stakeholder communication, quality assurance coordination, process documentation, procedure maintenance.

Operational Analytics & Reporting – Power BI, DAX, Power Query, Tableau, KPIs, dashboards, trend reporting, management information (MI), real-time monitoring, data modelling.

Banking & Financial Services Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, payments operations, reconciliation workflows, PSD2, Open Banking, financial compliance, GDPR.

Business Systems & ERP Integration – ERP support, business process integrations, REST APIs, change-control management, UAT coordination, system interconnections, PostgreSQL, MySQL, Oracle.

Production Support & Monitoring – Splunk, Dynatrace, CloudWatch, incident response, application support, SLA management, production monitoring, proactive alerting.

Data Engineering & Automation – Python scripting, ETL pipelines, data validation, SQL, scheduled reporting, workflow automation, Jenkins, Git, CI/CD.

Professional Certifications & Education – MSc Data Analytics (NCI, Dublin), Bachelor of Engineering Computer Science, IELTS Academic Band 7, Full Stack Java Spring Boot & Angular, Coursera Web Development.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SBCI Operations Hub – Unified Query Management & Performance Dashboard (HCL Technologies)

- Designed and deployed a **Power BI operational dashboard** consolidating SBCI day-to-day query volumes, resolution times, and stakeholder satisfaction metrics across customer-facing channels; implemented **DAX measures** to track KPIs including query resolution SLAs, query types, and bottleneck identification, enabling operations team to reduce average response time by **28%**.
- Built an automated **Python ETL pipeline using pandas** to ingest query data from multiple SBCI mailboxes and internal ticketing systems, perform data cleansing and validation, and load into a central data warehouse; pipeline ran on **Jenkins scheduler** every 4 hours, ensuring real-time MI availability for operations managers and supporting proactive issue identification.
- Developed operational procedures and user guides in **Confluence** documenting query classification workflows, escalation protocols, and quality assurance checkpoints; coordinated quality assurance activities including quarterly user access reviews and configuration audits, ensuring compliance with internal governance standards and reducing errors by **32%**.
- Implemented change-control documentation and system integration tracking using **Jira and Git**; mapped data flows and dependencies across SBCI Hub systems, banking APIs, and ERP integrations, enabling seamless UAT coordination and post-deployment validation with **zero compliance gaps** across audit trails.
- Proactively identified recurring operational issues and failure patterns using trend analysis and statistical hypothesis testing; proposed and prioritized process improvements that reduced manual query resolution steps by **18%** and improved stakeholder communication consistency across all SBCI customer channels.

Cross-Border Payments Operations Dashboard & ISO 20022 Reconciliation System (HCL Technologies)

- Monitored and resolved production incidents affecting **SWIFT messaging (MT/MX) and ISO 20022 message flows** for a banking client's cross-border payments operations; managed SLA compliance and coordinated incident response with BAs and regulators, achieving **99.5% availability** for payment processing dashboard.
- Developed **SQL-based reconciliation queries** for SEPA and instant payments workflows, validating transaction integrity across **PostgreSQL and Oracle** databases; automated daily reconciliation reporting using **Python scripts and Power Query**, reducing manual validation time by **45%** and flagging discrepancies within **2 hours** of transaction settlement.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
